Full Power To Act

While planning homes of tomorrow—whether they be new or modernized... be sure to prepare them for your clients' fullest enjoyment of electrical living.

Make certain you specify wiring adequate to serve *all* their needs ... so they may connect and operate properly the electrical servants they have now, and the marvelous new ones they are sure to want.

Provide that full power in future homes you design by specifying plenty of outlets, switches and circuits, and large enough wire to deliver full power now and in the years to come.

Only with adequate wiring will all electrical appliances have FULL POWER TO ACT . . . efficiently, economically, conveniently.

"Trim Prefab Cost"--Foley

"That house is kind of pretty," remarked eight-year-old Joel, tossing a stone at the hedge. "I think it's a Cozee Home."

"No, it isn't!" exclaimed Billy. "That's a 1957 Cutie Hut. You can tell by the lines. You don't know your houses very well, do you?"

That is a schoolboy conversation that may take place around 1960 if prefabricated homes become as popular as manufacturers hope they will and such names as General Panel, Home-Ola, Dickinson and many, many others become as familiar to us as those of Ford, Buick, Studebaker and Plymouth.

Prefabricated buildings are making their debut at an auspicious time. They have been used for many purposes.

In Hollywood, where colossality is a minimum standard, West Coast Theaters boast completion of the "world's first pre-fashioned theater" in Long Beach. It will seat more than a thousand persons. Mass production of such theaters reportedly is contemplated by Industrialist Henry J. Kaiser.

Steel quonsets have found niany new peacetime uses, among them warehouses, offices, factory buildings, farm buildings, and homes. Probably the most important use of the prefab at this time is as homes.

Recently Northeast Airlines needed personnel at its Anchorage, Alaska, terminal. To provide living quarters for its personnel the firm bought twenty custom-built, six-room houses, complete from ridgepole to doorbell, equipped with oil heat, refrigerators, washing machines, stoves, laundry tubs and special insulation for Alaskan winters. A four-engine plane was converted and equipped to haul them northward.

However, the prefabricated home enterprise struck snags during 1946, and several authorities have labeled the performance "disappointing." This was the implication left by National Housing Administrator Raymond Foley, who recently said that the prefab was just as costly as comparable conventionally-built housing.

Not only has the prefab failed so far to produce housing that is just as good cheaper, but materials shortages have harassed the manufacturers and production has been spasmodic and far short of schedule in many instances.

Take for instance the record of the Home-Ola Corporation of Chicago, which is the manufacturer of the prefab erected here between the Opera House and the War Memorial Building at the time of the American Legion national convention. It fell far short of its 4,000-unit schedule.

President Jacques Willis has stated, however, that "undoubtedly the company will produce 4,600 homes" this year. The HomeOla Corporation claims to have shipped more complete houses on a national scale than any other manufacturer. HomeOla models are distributed through a nationwide group of lumber dealers who sell direct to the individual owner. The homes are approved for mortgage insurance.

"Local building codes are becoming less of a problem, and HomeOla houses meet code requirements in better than 80 per cent of the markets in which they are available," a HomeOla representative stated. "Obviously, this is not a house for metropolitan centers."

Even in inclement Chicago winter weather, HomeOla gas, coil or oil heated homes are comfortable, the representative pointed out.

HomeOla executives see not only a wide-open market for their prefabs at home, but also a definite international market. Until embargo restrictions are lifted, however, shipments for export cannot be scheduled. Since the houses do not use any structural lumber, there is some possibility that special dispensation might permit export before the general regulation is lifted.

"From the standpoint of general economy of the building industry," it was stated, "this non-structural lumber feature is quite important, as is also the fact that the HomeOla principal of modular panels permits the use of only about 25 per cent of the total board feet normally required in a conventional house of similar size."

According to Department of Commerce figures, shipments of factory-built homes totaled 37,200 units in 1946. CAll types of housing erected in 1946 totaled 661,900 units.)

About 79 per cent was of the wood-frame type, 14 per cent stressed skin plywood, 2.5 per cent steel, and less than 1 per cent aluminum. Data on 4 per cent were insufficient for classification. A total of 198 producers in 40 states made shipments some time in 1946, but the bulk of shipments was made by 50 firms shipping 200 or more units each. These firms accounted for about 80 per cent of the total. Eighteen producers shipped 500 or more units, and six shipped 1,000 or more each. Shortages of materials was the basic factor limiting production throughout the year, manufacturers reported.

The bureau of labor statistics released statistics at the end of the year revealing that there is no saving of man hours if both factory and on-site work time are counted in figuring on prefab housing.

Despite the fact that the prefabricated home industry has not carved for itself an enviable record in 1946, the construction industry will do well not to underrate the prefabricated home threat. This is the warning of Professor William H. Scheick, coordinator of the Small Homes Council at the University of Illinois.

Prefab houses, he declared, will compete in the building market only if their manufacturers produce a house better and cheaper.

Competition in the building market by the prefabs may come at one cost level but not at another, he said. "Better, it may mean a more fireproof building, lower maintenance costs, and simpler acquisition of a home for the owner," he added. "Cheaper must mean cheaper per square foot of living space."

VACANT! This is the finished house (located at the Orinda crossroads), and it's vacant—because it's used for display purposes only. The type of finish given the exterior walls is optional, as is the floor plan of this sectional-type prefabricated house.

MATERIALS AT SITE, erection of the sectional prefabricated house begins early in January. This picture shows erection of the floors and part of the outside wall sections.

Greatest Possibilities

Scheick said the greatest possibilities for prefabs in the future seem to be in "small size panels, adaptable to modular planning, adaptable to various layouts (like kitchen cabinets), and possibly prefabricated in a licensed local plant by the same local craftsmen who assemble them."

He warned the builders and contractors "Be fair to yourself; don't underrate prefabs. Get comparisons on cost of prefabs and conventional housing. Start now to keep posted in the development of prefabs.

"Few people seem to be able to regard the subject objectively, being either violently opposed or unduly in favor. Contractors are usually opposed. A progressive contractor must keep himself informed on progress of prefab construction because he may find himself eventually in competition with it or using it himself as supplement to his own business.

Depends on Business Principles

He added that the prefab cannot be considered from purely technical viewpoints because its success or failure depends greatly upon business principles as well.

"Many small houses built in 1946 and some under construction now are a poor example of modern planning," Professor Scheick declared in another of the two talks he gave at the Short Course.

"The average size, 768 square feet of living space, is not enough for the average family," he asserted. "Homes are built for 8,000 and sometimes they have no basement and often no garage."

Dual Influences

Planning of homes is reflected by two influences, he said—the way the public is living, and structural devices. Discussing the first point, he remarked that the advancement in heating, lighting, the automobile, and other devices has a marked influence on the way the modern home is constructed.

"People are better educated on building plans today," Professor Scheick said. "And people are more design minded. People — I should say the women — want the house built for use."

The trend in home building, he said, is toward a one-story house because it is more convenient and safer. "Women want first floor laundries, and even want to eliminate the basement. They want bigger and fewer rooms and are forsaking the dens."

Speaking on the orientation and the use of ground, Professor Scheick said, "The day is past when a person will take any building plan and drop it on any plot of ground. They now think of wind direction, the sun, the size of the lot, and their plan."

Professor Scheick believes that if the basement is eliminated from the home, the utility room should be one-third of the area of a basement. He said that the trend is toward more flexible rooms, and that the "ranch" style home is becoming popular over the favorite American home, the "Cape Cod" style.

A number of organizations have been experimenting with methods of factory building parts of houses, packaging accessories and delivering semi-constructed parts to the building site for erection into the finished home. Such procedures, based on assembly line experience gained during wartime, are felt to be setting a trend toward quality homes at lower cost.

The National Retail Lumber Dealers' Association has announced a new type of house expected to reach the market by the latter part of May.

Oakland Firm Distributes Prefab Sections; Erection by New Crew Required 23 Days

Plywood of several different types is the basic material of the house pictured on this page in various stages of work. It is of the prefabricated type, but is built of sections 4 feet by 8 feet for both walls and floors.

The sections may be assembled according to any design desired, giving more flexibility than ordinary methods of prefabrication.

The vertical ribs or studs of exterior wall sections are 1x3 dressed except on one side, where a 2x3 is used and allowed to project beyond the edge of the plywood to form a tongue. On the opposite edge, the 1x3 is set back from the edges of the plywood, forming a groove. Top and bottom edges are made with similar grooves.

In assembling these wall sections, all joints then will be tongue and groove and when field glued, will form rigid walls. Strength of the walls was tested by Washington University and approved as meeting greater than ordinary requirements.

Such construction is allowed for in the Oakland building code, and is approved. It has been approved for FHA mortgage insurance.

Construction on this job started early in January. The material was brought to the site in two truck loads. Erection required 23 working days by workmen who had never erected such a house before. This does not include work on the foundation, nor such work as wiring, plastering, plumbing, etc. Walls, floors and ceilings were erected in four days.

The Aero-Bilt Sections used in the house are a feature of Special Materials, 3330 East 12th Street, Oakland.

An executive of the firm stressed that such building material is "as cheap as that used in conventionally built homes" and added that its main advantage is the comparatively short time required to produce a completed house.

READY FOR PLUMBING.—This picture shows the wall of the bathroom ready to receive the plumbing. After its installation and inspection, the plywood will be attached to the wall.

While this method is described by the organization as being "not a plan of prefabrication," it approximates the factory construction and serves the same end in reducing cost of the completed unit.

The lumber dealers describe the new-type dwelling as intended for on-site construction. Developed by building industry groups, these homes will employ basic units 16 feet by 24 feet. These units may be combined by fitting them end to end, side by side or on top of each other.

Plumbing and heating plants, interior and finish woodwork and other accessories will be packaged and delivered to the site.

According to proponents of this type of construction, home plans and building materials can be so designed that costly cutting and reworking of materials on the job site are eliminated. These practices are expected to effect the substantial cost reduction.

The full prefabrication processes also are contributing to the trend toward less expensive quality houses. In the words of Harry H. Steidle, manager of the Prefabricated Home Manufacturers' Institute, speaking to the National Home Builders in Chicago:

"Substantial reductions in the cost of homes, particularly those for the lower bracket of wage earners, can come only through more intelligent engineering of the home is exactly the same as that which has reduced the cost of radios, washing machines and refrigerators —namely, better product design coupled with the efficiencies of mass production.

"When the production of material develops to a point where the full benefits of mass production can be developed, you can look for a reduction of at least 20 per cent in the cost of small homes."

The need for lower home sale prices has been cited by Ray Sawyer, National Commander of the American Veterans of World War II. He said a sample analysis of veterans' housing requirements by the Census Bureau showed the average veteran in need of new housing

(Continued on Page 10)

PANELS IN PLACE.—Floor, exterior and interior partition panels now are up, windows are in.

CEILING CONSTRUCTION.—Framework is being put up for the ceiling panels, which prefab men claim provide exceptional insulation through the dead air space between the parts of the panels.

Did You Know That . . .

The Lumber Merchants Association of Northern California is offering a 30-day retail lumber training course to dealers employes in northern California. Initial course will be given at the College of the Pacific in Stockton, beginning April 7. It is approved for GI subsistance payments.

oOo

A new firm has entered the field of electrical contracting and engineering in San Francisco and Oakland. It is Emerson-Wider Co., Inc., with its main office at 2825—22nd Street, San Francisco 10. The firm is headed by William E. Emerson, who formerly was associated with Emerson-Newberry Company. The telephone number is ATwater 9707.

oOo

Geo. Washington, structural engineer, and Washington & Sawyer, Inc., civil engineerig and surveying, announce the opening of new offices at 204 Sacramento Street. Telephone DOuglas 7853.

Dealers Organize; As Protective Measure Of Home Builders

NEW YORK (Special) — More than 2,000 building materials dealers in communities scattered throughout the United States have joined to date in an organized movement to protect the builders of new homes and the remodelers of existing homes in these days of high prices, racketeering and shortages of materials and labor.

Announcement of this concerted attack by local building industry representatives on problems which have beset home owners and home builders and suppliers alike, was made today by H. M. Shackleford, vice president, Johns-Manville, a co-ordinator in organizing the effort.

All of these dealers, and others who will endorse the movement now underway, pledge to carry out the following seven principles:

1. To make every effort to reduce operating costs and to ask prices reflecting only a fair return.

2. To fight the racketeer building market.

3. To see that veterans desiring to build or remodel have first opportunity to obtain available building materials.

4. To use influence to keep the cost of housing to a minimum, and exert every effort against the threat of inflation caused by materials and skilled labor shortages.

5. To represent frankly to customers the quality of products offered in these times when there is such a shortage of standard materials.

6. To keep constantly abreast of new developments in building materials to provide greater economies and better livability in the building and remodeling of homes.

7. To work with reputable manufacturers to accomplish these basic objectives in the interests of customers and the general welfare of the community.

The movement was started only recently, it was said, and the swift endorsement of more than 2,000 dealers to date indicates that a much wider spread of participation may be expected. The plan is being presented before various industry association meetings, and already has the endorsement of the Northwestern and Iowa Associations, it was announced.

IBRM PRESENTS FIRST INSTALLATION GUIDES

CHICAGO.—Nearly 200,000 copies of the first three Installation Guides published by the Institute of Boiler and Radiator Manufacturers have been distributed, according to R. E. Ferry, general manager of the Institute.

Guide No. 1 presents a simple, efficient and economical basis for the installation of a one-pipe forced circulation hot water heating system. Guide No. 2 covers the installation of a one-pipe steam heating system, and Guide No. 3 offers suggestions on the selection and installation of heaters submerged in water for use in small homes. Guide No. 4, recently completed and now ready for distribution, tells how to estimate and install a two-pipe reverse gravity hot water heating system.

#

NON-RESIDENTIAL JOBS DRAIN OFF FEWER MEN

WASHINGTON.—About 368,500 more workers were engaged in on-site construction work of all types in January, 1947, than in January, 1946, according to a bureau of labor statistics report released this week.

The number of workers used on non-residential building construction declined sharply, from 43,600 in January of 1946 to 15,200 in the same month in 1947. Only other decline was a very slight one in airport construction.

Nickel Plating of Nazis Is Reviewed By German Expert

WASHINGTON.—Since the end of the war the Department of Commerce has fostered the publication of many monographs dealing with scientific data gathered in Germany and learned from German experience.

The latest of this series is a 24-page booklet written by an expert, Edmund R. Thews, for the field information agency of the Office of Military Government, dealing with problems involved in nickel-plating work.

Plating Properties

The publication discusses 21 causes of nickel-plating failure and methods of prevention. Thews is a German consulting engineer who has written the report in English.

Peeling after plating is one of the worst problems of the galvanizing industry, the publication states, and one of the most difficult to solve because it arises from so many factors.

Emphasizing harmful effects on nickel plating of organic and metallic impurities in the electrolytes and excessive concentration of organic acids, the report observes:

"Whenever the mechanical properties of the plating, such as tensile strength, hardness, etc., are sufficient to counteract the pulling stresses and the other internal and external forces acting on the film at any one point, peeling is prevented. Where this is not the case, cracking of the film is bound to be induced, especially if the additional force of adhesion is unable to maintain the deposit in its place.

Report Available

"Common external influences tending to overcome the tensile strength of deposits are bending stresses, cuts or cracks in the film, pores or similar surface defaults, sharp edges of corners beneath the film, and reduction of the original degree of adhesion by corrosion effects."

The report can be obtained for a fee from the Office of Technical Services, Department of Commerce, Washington, D. C.

#

Pacific Bible College at Portland is to obtain about 3,000 square feet of classroom and assembly room facilities, together with such necessary furniture and equipment as may become available from government surplus.

ALUMINUM SHOWER CABINET.—The W. R. Ames Co., of 150 Hooper St., is now manufacturing and distributing the Ames Aluminum Shower Cabinet, with initial distribution scheduled for the 11 western states. Expansion of distribution on a national scale is contemplated. This cabinet is ideally designed for use in remodeled or additional bathrooms, as well as for new construction.

The material used is heavy gage, lightweight aluminum which makes the cabinet easy to install. It is composed of five formed sections, all of which slide into interlocking flanges which provide a completely watertight fit. The receptor is one of the five formed sections and is made from ten gage aluminum alloy.

Pittsburgh Woman Builder Producing Cheaper Houses

PITTSBURGH. — Using mass production methods to slice construction costs, a Pittsburgh concern headed by a woman is building 450 homes to sell for as little as $8,650.

Mrs. Eulah H. Rousseau, 24 year old southern woman who heads the building company, said she was turning savings in building costs into added conveniences "in an effor to give veterans the kinds of homes they expect."

Considerable economy has been realized by adapting road building machinery to the site-cleaning and foundation work, she said. While standard materials are used and there is no hint of pre-fabrication in appearance or quality, whole sections of the homes are cut and assembled in the Rousseau shops and then moved to site.

Mrs. Rousseau, who looks more like a magazine cover girl than a builder, said she was prompted to take an interest in business by the acute housing situation. Her father-in-law, S. L. R. Rousseau, architect, has been active here since 1906, and her husband, Marius Rousseau, is a construction engineer.

"High fallutinest feller I've ever seen since they discovered oil on his place."

Importation of All Plywood Only Small Part of U. S. Output

WASHINGTON. —Latest tariff commission reports show that imports of plywood of all kinds have remained at an amount equal to less than one half of one per cent of domestic production.

So far as can be ascertained, the commission said, red cedar plywood was not imported to the United States before the latter part of 1945 or early in 1946.

This information is contained in a TC report on red cedar plywood which indicates none of this product was shipped to the United States during the years 1937, 1938, 1939, and 1943.

In 1946, on the basis of information furnished government sources by the principal producers of this type of plywood, shipments from Canada amounted to 2,400,000 square feet valued at $315,000.

61% Softwood

On the other hand, U. S. exports of plywood in the late prewar years, 1937-1939, averaged $1,300,000 annually. Approximately 90 per cent of this total value was Douglas Fir and a large part of the remaining 10 per cent was birch. It is believed by the commission that no cedar plywood was exported.

This report also states that the total value of plywood of all kinds produced in the U. S. in 1939 was $54 million, of which more than 61 per cent was of softwood, chiefly Douglas Fir. Production data for cedar plywood are not available, TC said.

Probably, it adds, small amounts are made from eastern red cedar (Aromatic cedar) and from imported Spanish cedar. Spanish cedar is not of the same species as domestic cedars and is used for entirely different purposes.

A very small amount of western red cedar plywood was produced in 1946 in conjunction with Douglas fir plywood, but apparently there is no domestic production of plywood of this species on a regular commercial basis.

For Interior Use

Cedar plywood of the type referred to is made with a face of edge grain western red cedar, and a core and back of Douglas fir. Such plywood is not suitable for exterior use, but is used chiefly for interior finishing and as decorative panelling of houses, shops and trailers. In these uses it competes more in the field of hardwood plywood than with Douglas fir and other softwood plywoods.

#

Produce Small Units Air Conditioning for Small Establishments

WASHINGTON. — The Sturtevant division of the Westinghouse Electric Corporation has announced that it is marketing new models of air-conditioning units for small commercial establishments.

The new design in these self-contained units—known as Unitaire—is principally for installation in retail stores, candy shops, restaurants and other commercial establishments. It is being manufactured now at Hyde Park, Mass.

L. Gale Huggins, manager of the department making the new style air-conditioners, said they were being manufactured in two-, three- and five-horsepower sizes. The units have been reduced in size as much as 15 per cent compared with pre-war models which had similar capacities.

The new models are said to be quieter, more easily serviced and 20 per cent lighter.

PAINT SALES INCREASE

WASHINGTON.— Total paint, varnish, lacquer and filler sales in January, 1947, are up $27,381,122 over the same month last year. More than a third of the dollar volume sales increase was in the trade sales category.

The survey covers some 680 manufacturers, which accounted for approximately 90 per cent of the total value of the industry, according to bureau of the census figures.

Prefab Boom

(Continued from Page 9)

accommodations able to pay no more than $43 a month in rent or $5,500 to purchase a home.

Further, the survey indicated the average weekly income of prospective renters is $44; that of prospective buyers, $48.

Another example of modern factory methods in home building is that of the Fox Metal Products Corporation of Denver, Colo., which is expected to benefit from a guaranteed market contract for production of aluminum prefabs.

One of the smaller firms in the far western area is stepping up its production from one to ten complete houses a day this month and expanding its personnel nearly six times. It is the South Bend Fabricating Company of South Bend, Wash., which manufactures its homes almost exclusively of Douglas fir plywood.

Its initial production effort will be distributed in the southwest Washington area to assuage the local housing shortage. This packaged home includes all utilities, the heating system, an automatic washer, fixtures, etc.

Special roof truss construction eliminates the need for bearing partitions and allows maximum flexibility of room arrangement. The improved system of construction employed in the company's engineered homes was devised by A. S. Hansen, Seattle contractor.

Raymond Lewis is president of the South Bend Fabricating Company, as well as the Raymond Lumber Company. He has been associated with lumber production on Willapa Harbor.

The South Bend product was praised recently by an official of Harbor Plywood Corporation, who declared: "The job looks as if it had been built by conventional methods. A close study reveals more precision, better finish, greater strength and higher quality of material than is used in homes built by the old-style methods."

Plastic-type Floors Laid Like Cement

The production of a new type plastic composition flooring for use in residential construction is provided for under a guaranteed market contract which Housing Expediter Frank R. Creedon has requested the Reconstruction Finance Corporation to negotiate with the Kompolite Co., Brooklyn, New York.

The new product, which goes under the trade name of "Oaktred", will furnish a new source of supply for flooring, one of the building materials still in shortest supply.

The company will furnish the flooring material — Oaktred — in powder form in moisture-resistant bags or drums. The ingredients include sawdust, asbestos, binding chemicals which result in high strength and resilience, and color. The material will be mixed with water on the site and then troweled on like cement to a minimum thickness of 5/8th of an inch.

The result is a monolithic flooring which can be sanded to a smooth finish and then varnished or shellacked, similar to hardwood strip flooring. The flooring can be applied either on subflooring or on concrete, or, in the case of a conversion, can be applied over old flooring. It can be scored to resemble tile or random-width oak flooring. The finish flooring has a color similar to that of medium oak flooring.

The high proportion of sawdust in the material gives the plastic composition flooring more of the qualities of hardwood flooring than of concrete. It is cooler to the touch than wood flooring but has much the same walking quality as wood flooring.

The company agrees to provide supervision and instructions to contractors. The flooring is installed by masons and then finished like hardwood flooring by sanding and varnishing or shellacking.

DIRECTS FOREIGN RUBBER FACTORIES

LOS ANGELES.—Fred S. Carpenter, longtime resident of Los Angeles has been appointed director of manufacturing for the United States Rubber Export Company, Ltd.

Carpenter's new position places him in charge of all foreign factory operations, including plants in South America, Mexico, Cuba, South Africa, and elsewhere throughout the world. His headquarters will be in New York the announcement stated.

Recently he returned from Sumatra and Malaya where he had been a member of a survey party to inspect the company's plantations.

LEASE GRAZING LAND

COULEE DAM, Wash.— The Bureau of Reclamation announced today that it will lease nearly 39,000 acres of land in the Columbia Basin Project, and that bids will be accepted until April 1 at its irrigation division offices in Ephrata. They will be opened at 2 p. m. on that day.

R. B. Williams, acting district manager, said 120 acres is agricultural land that has been used for dry-farming, and the balance is grazing land scattered throughout the project.

#

CARSON RESIGNS JOB

WASHINGTON. — Resignation of Ivan D. Carson, head of its rent control operation, to accept a position with the war assets administration, was announced to day by the office of price administration.

Rent control will be administered under the direct supervision of OPA Commissioner Max McCullough until congress determines the nature of the rent program and the agency that will administer it.

TOURNAPULL CARRYALL.—Shown above is the Model D Tournapull and E-4 Carryall. The Tournapull is a new model developed for high speed dirt moving on small yardage projects. The Carryall Scraper has a load limit of four tons and a 3.3 yard capacity. It has an 85-h.p. gasoline engine.

Plans Awaiting Approval

SACRAMENTO, Calif., Sacramento County.—The State of California, Division of Architecture, School Section, Public Works Bldg., Sacramento, Calif., announced the following modifications March 28 for the approval of plans and specifications for school projects in Southern California:

Classroom addition at W. Claud Hudnall Elementary School, est. cost $85,000; owner, Inglewood City School Dist., Los Angeles County; architect: R. C. Flewelling, 816 W. 5th St., Los Angeles.

Administration, kindergarten and classroom constr. at Bella Vista Elementary School; est. cost, $100,000; owner, Montebello Unified School Dist., Los Angeles County; architect, Kistner, Curtis & Wright, Architects Bldg., Los Angeles.

Bleachers at City College, est. cost $90,000; owner, Santa Monica High School Dist., Los Angeles County, architects, Marsh, Smith and Powell, Architects Bldg., Los Angeles, Calif.

Classroom constr., est. cost, $225,000; owner, Newport Harbor Union High School, Orange County; architects, Marsh, Smith & Powell, Architects Bldg., Los Angeles.

Los Angeles City High School District, A. S. Nibecker, Jr., architect: David Starr Jordan Sch., one 2-unit bungalow, est. cost, $12,000; Thos. Jefferson high school, 2-unit bungalow, est. cost, $12,000; Canoga Park high school, 2-unit bungalow, $12,000; San Fernando high school, two 2-unit bungalows, $24,000; Havenshurst Ave. school, 2-unit bungalow, $24,000; Arnestev Ave. school, 2-unit bungalow, $12,000; Carson St. school, two 2-unit bungalows, $24,000; Compton Ave. school, two 2-unit bungalows $24,000; 118th St. school, 2-unit bungalow, $12,000; Lorena St. school 2-unit bungalow, $12,000; Fourth Street school, 2 - unit bungalow, $12,000; Amerila St. school, 2-unit bungalow $12,000.

Six-classroom addition, est. cost, $100,000; owner, Niland Elementary School Dist., Imperial county; architect, O. G. Bowen.

Retining wall at San Rafael Elementary School, est. cost, $9600; owner, Pasadena City School Dist., Los Angeles County; architect, R. W. Ware.

Auditorium, cafeteria and additions at Allan Ave. School, $115,000; owner Burbank Unified School Dist., Los Angeles County; architects, Kistner, Curtis & Wright, Architects' Bldg., Los Angeles, Calif.

Classroom construction and toilet facilities at Oak View Gardens Sch., est. cost, $113,000; owner, Nordhoff Union Elementary School District Ventura County; architect, Maynard Lyndon, 921 Westwood Blvd., Los Angeles.

Work shop, est. cost, $90,000; Technical High School; owner, Santa Monica City School Dist., Los Angeles County; architect, J. Harold Meistrom, 726 10th St., Santa Monica.

Construction at Thos. Jefferson School, est. cost, $168,000; owner, Burbank Unified School Dist., Los Angeles County; architects, Marsh, Smith & Powell, Architects' Bldg., Los Angeles, Calif.

Cafeteria Bldg., est. cost, $71,000; owner, Los Nietos School Dist., Los Angeles County; architect, W. H. Harrison, Architects' Bldg., Los Angeles, Calif.

Classroom construction at the same school, est. cost, $71,000; same architect.

Metal shop bldg., est. cost, $50,000, owner, Fullerton Union High School Dist., Orange County; also at same school wood shop bldg and arcade at $110,466; machine shop bldg., at $94,534; W. H. Harrison, architect, Architects' Bldg., Los Angeles, Calif.

New intermediate school bldg. Unit No. 3, $125,000; owner, El Centro Sch. Dist., Imperial County; architect, A. E. Hansen, 832 S. Glendalo Avenue, Glendale, Calif.

PLANS and Speculations

St. Mary's Boys' High School at **Phoenix, Ariz.**, is to obtain about 1,000 square feet of surplus structures to be converted into industrial arts classroom facilities.

oOo

Coolidge school district No. 21 of Pinal County, Ariz., obtained approval of an application for 1,000 square feet of agricultural and mechanical arts classroom facilities, together with surplus furniture and equipment.

oOo

Gilroy Union High School at **Gilroy, Calif.**, obtained approval of its application for necessary furniture and equipment from government surplus so that it can accommodate 53 veterans compared with 25 who are now receiving training.

oOo

Yuba County Junior College at **Marysville, Calif.**, is to obtain about 1,920 square feet of surplus structures for administration and other facilities, together with necessary surplus furniture and equipment.

oOo

San Francisco supervisors have not directed a resolution to the state legislature authorizing the governor to appoint a federal state commission to determine whether or not transcontinental trains should be brought over the next Bay bridge.

oOo

State civil service exams will be given May 13 to candidates for a $220-270 position as assistant forest technician. College graduation with specialization in forestry, or equivalent technical experience is required

oOo

An assistant right of way agent will be selected by state civil service exams to be given May 6. Two years professional experience is the requisite.

oOo

State engineers are working out plans for a road to connect Aptos and Seacliff.

AIA Rates T-E-W Bill As Big Step In Redevelopment

WASHINGTON.—The Taft - Ellender - Wagner housing bill has been given qualified approval by the urban planning committee of the American Institute of Architects in a statement to the senate committee on banking and currency, according to the announcement by Louis Justement, chairman of the Committee.

The statement approved the establishment of a national housing commission to coordinate government agencies having to do with housing, but stated that the commission could function more effectively if it consists of five members rather than as set up in Title II.

The committee also suggested elimination of the section of the bill setting up new terms for financing housing for low - income families, on the grounds that they were contrary to sound mortgage practice.

The bill's provisions for urban redevelopment were approved with reservations.

#

ABANDON RENT LID—WASHBURN

SACRAMENTO. — Elimination of rent control from new construction in order to stimulate rental building was urged Wednesday by Earl Washburn, director of the state re - employment and reconstruction commission. Washburn was with the Legislature's interim committee which studied the veterans' housing problem throughout the state.

#

ARCHITECTURE RULES AVAILABLE FOR $1.03

SACRAMENTO—Copies of Title 21, Public Works, of the California Administrative Code, may be obtained from the Printing Division, Documents Section, 11th and "O" Sacramento 14. This volume contains the rules and regulations of the State Division of Architecture. Its total cost is $1.03.

T-E-W Bill Heads List of Two Dozen Up Before Congress; 'Not Socialization'—Taft

WASHINGTON.—An idea of the complexity of housing legislation now before congress can be gained from the fact that a total of 24 bills dealing at least in part, with major housing issues, are in the legislative mill.

A goodly share of these deals with public housing and rent regulations. For example, H. R. 1750, introduced by Rep. Helen Gahagan Douglas, of California, would allocate a billion dollars for expenditure by the President's office on public housing for veterans.

Finish 2549 Hearings

H. R. 285, Rep. Rabin's contribution, permits the President to authorize unlimited quantities of housing wherever shortage is proved to exist.

Leading all house legislation in interest to the construction field still is the Wolcott bill, H. R. 2549 which would eliminate almost all provisions of the Patman Housing Act, basis for operation of the national house administration.

Former Mayor LaGuardia of New York, a noted public housing enthusiast, appeared before the senate banking and currency committee hearing the Taft-Ellender-Wagner long - range housing bill last week and is to appear before Wolcott's group Tuesday.

While the house side was busy with winding up its Wolcott bill hearings, the senate banking and currency committee has just completed its hearings on the revamped Wagner-Ellender-Taft bill over the weekend.

Socialized, Like Health

In an interview with the Daily Pacific Builder's Washington correspondent, Senator Robert Taft denied that the public housing bill is socialistic, and compared it with government operation in the fields of health and education.

"It is the same kind of operation that we have always tried to carry out," he said. "I feel very strongly that we should establish a minimum floor under essential services of this kind so that, as far as possible, we can eliminate poverty and hardship."

The T-E-W bill as it was being considered by the senate committee, conceivably could cover a 45-year period. This, indeed, is long-range planning.

In fact, this one feature has led to some objection on the part of committee members, evidenced as hearings progress. These questions have arisen in connection with possibility of changing money values over such a long period of time.

'Industry Not Capable'

Senator Taft's opinion that industry cannot house the "lowest 20 per cent of the urban population"—making government subsidized housing necessary—has been expressed and re-stated many times.

"I just don't think private enterprise building can take care of this lower income group," he concluded.

GROOVER AND I

PURELY PERSONAL

Meyers Safety Switch Co., Inc.: You may have noted several skips on this column last week. You boys are responsible. I charge it all to your 1947 calendar with the "California Desert Scene" — I "lister. easy" to the call of the desert and high mesa country.

☆ ☆ ☆

I don't claim my initials are on the two Joshua trees in the foreground, but am willing to bet I have more than once made desert camp within two miles of the spot that picture was made. The Whitewater Mountains in the background never change.

☆ ☆ ☆

The days, symphony of sun, sky and sand. Nights — a lullaby of stars and vibrant silence. This land was bottom of a sea just day before yesterday as rocks measure Time—about eight million years.

☆ ☆ ☆

The world of protocol, premier and president seems very far away—and unimportant.

Rail Shipments Up In Lumber, Grain

WASHINGTON. — Car loadings of forest products totaled 50,585 cars for the week ending March 22, an increase of 1,870 cars over the preceding week and an increase of 9,192 cars above the corresponding week in 1946.

This announcement by the Association of American Railroads would indicate that a considerably greater percentage of lumber is being moved over the nation's railroad system week by week in spite of a growing shortage of box cars which has seriously hampered short haul movements.

A heavy increase in the number of carloadings for grain also was reported, a danger signal for shippers of building materials. Cars needed for grain and grain products went up to 53,717, an increase of 2,149 over the preceding week and 10,260 cars over the same week of 1946. About 80 per cent of the increase in grain cars was concentrated in the western districts alone.

Ore loadings likewise mounted in the week ending March 22.

#

PABCO PROMOTES CLAY LILLESTON

Promotion of Clay Lilleston to the post of Pabco northern district manager, building materials division, with headquarters in Seattle, Wash., was announced today by Jas. E. Holbrook, vice president-sales, The Paraffine Companies Inc.

Paraffine, long established in the northwest, is a leading manufacturer of paint, roofings, linoleum and other building materials marketed as "Pabco Products".

Lilleston's elevation is in keeping with the firm's policy of recognizing sound performance and promoting from within the ranks. He joined Paraffine in 1933. In 1934 he served in the southern district office at Los Angeles.

Western Power Interests Warm Up for Fight On Rates as Set Forth by Senator Butler

WASHINGTON.—(Exclusive).—With congress prepared to consider Department of Interior budget matters this week, a review of western power developments in Washington cannot be amiss.

The National Reclamation Association, established "to promote the cause of reclamation by irrigation," the government, and west coast private power interests all are tied up closely in a brewing storm centered on a number of bills now in committee.

The house committee on public lands is winding up hearings on H. R. 1886 which was introduced in February by Congressman Rockwell of Colorado. Over on the senate side a similar committee has shelved S. 530, an idential bill introduced by Senator Butler of Nebraska, until a report is forthcoming from Interior.

There is one passage in Section 2 of these measures that has become the fulcrum on which all interested groups are concentrating their pressure. It reads:

Repayment Issue

"The Secretary (of Interior) is authorized to enter into repayment contracts to furnish water for municipal water supply or miscellaneous purposes and to enter into repayment contracts for the sale of electric or water power or lease of electric- or water-power privileges, provided that . . .

"any sale of electric or water power or lease of electric- or water-power privileges made by the Secretary in connection with the operation of any project or division of a project or supplemental works of a project shall be for such periods not to exceed forty years and at rates which will afford irrigation the maximum benefits compatible with the cost of generation of electric power within the area served by the project when such electric power is or could be generated by the most efficient or least expensive available method and which will produce net power revenues at least sufficient to cover all amounts allocated for payment from net revenues in accordance with the allocation of costs and provisions due repayment thereof established by the congress in authorizing the construction of each project, division of a project, or supplemental works on a project . . . ."

A little background is necessary to clarify this part of the proposed bill and why it has stirred up such a fuss.

In trying to get the Reclamation Act of 1939 amended, as this bill would do, the National Reclamation Association (NRA) has accused the bureau of reclamation and its divisions of "approving and abetting the manipulation of funds". NRA believes that Secretary Julius Krug is going further in this respect than did his predecessor, Secretary Ickes.

Originally, the reclamation law provided for repayment of principal on western power projects and irrigation developments in 40 years. Money for initial development came from sale of public lands and revenue from resources of these lands (except timber). Thus, a revolving fund was set up under the old Reclamation Act of 1902.

This system of payment prevailed until the Dust Bowl program was instituted in 1930, when payment for project development became an outright government subsidy. Under the Roosevelt tenure the direct grants were to be

(Continued on Page 7)

MOVE GENEVA STEEL IN 80,000-LB. LOTS

Reduced freight rates between Geneva, Utah and west coast points are predicated on a minimum 80,000 pound loading of cars, Columbia Steel Co. announced Wednesday. Carload orders for less than 80,000 pounds will be shipped in combination cars with other shipments unless the customer specifies otherwise.

Home Builders Open National Campaign to Get Rentals Started

WASHINGTON. — Edward R. Carr, president of the National Association of Home Builders, announced the launching of a nation-wide drive to erect more rental housing for veterans Wednesday.

No Meet Here Yet

NAHB has decided to take the direct approach, go into the field to advise its members of the best methods of planning, financing and constructing rental projects. The expected net result will be early erection of a large number of low-cost and moderate - priced rental housing developments for the veterans' use.

Coming at this time, a series of introductory meetings at which this information will be laid before the builders all over the nation is expected to stimulate rental housing construction this building season.

The initial meeting will be held in Boston, Mass., on March 31, with subsequent sessions in several other large eastern cities. Milton W. Morris, executive-secretary of the San Francisco Association of Home Builders, told a Daily Pacific Builder reporter that no meeting had been scheduled for his organization. No meetings had been announced in the Bay Area, Wednesday.

The NAHB approach is a simple and direct one:

Operating builders, not theorists, will be talking to home builders on their home ground.

Study FHA Doctrine

The association is convinced that the rental building program has bogged down chiefly in the federal housing administration offices where red tape paper procedure and time delays have discouraged contractors bent on going into new rental properties, often on a very large scale.

Much of the criticism that has been directed at the home builders for not putting up rental units stems from the complex procedures encountered when the contractor goes to the FHA office to process his paper work, NAHB said. "It is here that the applicant becomes discouraged," a spokesman said.

With this in mind, the association's educational plan will stress "608" procedures from the selection of land to the finishing processes. The subject matter will deal with number of rooms, number of units per project, working over plans and specifications and the complex financial setup with regard to FHA assistance.

In short, many people are convinced that the attempts by FHA to educate through their field offices have resulted in confusion more than inspiration.

Goal in Sight

Carr feels that the new home builders' plan for spring education will be especially helpful by getting down to fundamental facts. The consultants will cover their subjects step by step, using the old blackboard talk principle. The fact that they will be qualified, successful builders in their own right will lend weight to their conferences.

"We are determined to get a lot of rental projects built this year to meet veterans' rental needs," Carr said. "This is the most practical approach to this problem in our estimation, and is one that will produce more rental units than any other."

HAULS AIR-ENTRAINED CONCRETE. — The Standard Machinery Company, 450 Bayshore, are exclusive northern California distributors of the "Dumpcrete", shown above. It has been thoroughly job-tested over rough hilly construction roads.

The Dumpcrete dumps directly into one-yard buckets, forms for walls, foundations and slabs. This adaptable body also may be used for hauling sand, gravel, earth or other materials. Its high discharge makes it ideal for stockpiling these materials.

Daily Pacific Builder

LARGEST CONSTRUCTION DAILY IN THE WEST

Vol. 57—No. 66 FIRST SECTION SAN FRANCISCO, FRIDAY, APRIL 4, 1947

Copyright 1946 by F. W. Dodge Corporation

PLANS and Speculations

Purchase of a sulphuric acid factory at Richmond by the General Chemical Company, which operated it as a war industry, has been completed; the price was $325,000.

oOo

San Francisco city planning commission has employed Ladislas Segoe, nationally known planning consultant of the firm of Segoe & Segoe, at $100 a day. He will begin work on modernization of the zoning code.

oOo

The San Bruno personnel board will hold a civil service examination on May 3 for the newly-created position of city recreation director at a monthly salary of $300.

oOo

California will obtain $3,915,150 in federal funds for hospital construction during the next fiscal year if its plans are approved by the Suregon General, and also $185,808 for survey and planning work.

oOo

Walnut Creek city planning commission has recommended adoption of the first section of a proposed master streets and highways plan. It calls for a 50-foot width on Main Street, with a 20-foot setback.

oOo

Construction on Oakland's improvement program for which more than $15 million in bonds was voted, awaits only the go-ahead signal from the office of the housing expediter, whoch has taken over CPA functions.

oOo

Yolo County supervisors will make formal application for $20,000 from the state department of finance to augment funds already set aside for construction of Stephens Bridge.

oOo

Two engineering extension courses started Tuesday, March 25, in the Engineering Building on the Berkeley UC campus. They are Air Conditioning (819CD) and Machine Design (810AB).

oOo

Exams for candidates for state assistant construction inspector $310-370) will be held May 10. Education equivalent to graduation from college with major work in architecture or engineering and two years of experience in building or engineering is required.

Westinghouse Adds Vice - President Neal To West Coast Office

Westinghouse Electric Corporation today announced the appointment of R. A. Neal, vice president, formerly of Pittsburgh, Pa., as general manager of the company's Pacific coast district operations.

The move in no way changes the duties or responsibilities of Chas. A. Dostal of San Francisco, vice president in charge of sales for the Pacific coast district.

Westinghouse has just completed lease arrangements to operate the 57-acre Sunnyvale, Calif., works formerly operated by the Joshua Hendy Iron Works. Other Westinghouse plants in the Pacific coast district are located at Emeryville and Los Angeles, Calif., Portland, Ore.; Seattle, Wash., and Salt Lake City, Utah

#

FAVOR INCREASE

WASHINGTON. — The senate banking committee has voted unanimously to continue limited rent control through next February 29. The house banking committee meeting in closed session, was reported to have rejected the senate plan, veering toward a flat ten per cent increase in rents.

TEW Bill Under Fire; Termed Six Billion Dollar Squander on Socialism Experiment

WASHINGTON.—The Taft-Ellender-Wagner bill that is kicking up such a fuss in the ranks of the construction industry is still being hotly discussed here. Following are the opinions, in brief, of prominent organizations of the building industry:

Building Products Institute: "We approve the establishment of a Housing Commission, but we do not approve the establishment of a Housing Administrator . . . We also are unable to approve the revisions in Title IV, which deals with research and statistical activities of the proposed Housing Administrator.

National Association of Home Builders: "We believe that this bill's slum clearance provisions, its plan to coordinate government agencies, its "aids to private enterprise", and its public housing proposals should be broken into separate bills and each of these acted upon individually. We are against this bill."

Mortgage Bankers Association of America: "The program (under S-866) attacks an elephant with a pea shooter. It would spend six billion dollars for a six per cent solution. We consider that the solution is unrealistic; that it will make no substantial dent in our national problem; that to solve our problem by subsidized housing must mean the ultimate expenditure of tens of billions of dollars; that such a program is unnecessary, and that the problem can and should be solved by business and community action.

National Home and Property Owners Foundation: "In these days of excessive taxes and enormous federal budgets, six billion dollars is an extraordinary amount to squander on an experiment into state socialism which has already been demonstrated to be a failure."

Chamber of Commerce of the United States: "Our opposition to S-866 and to other bills of similar nature now before this committee, is based primarily upon a fundamental conviction that the improvement of housing is by its nature an activity which should be carried out by the people of each community."

GROOVER AND I

Good Friday

"And the Angel answered and said unto the women, Fear not ye: for I know that ye seek Jesus, which was crucified.

OKAY BUCK BILL ON RENT CONTROL

WASHINGTON. — Senate banking subcommittee approval of a bill to decontrol all new construction started on or after February 1, 1947, has sent the measure to an executive session of the full committee.

Senator Buck of Delaware introduced the legislation, so new as yet it has no number classification.

It was learned that original wording of the measure has been changed to "on or after" the date of February 1, this year, so that only new construction begun following the end of January would be affected. On all such building government restriction would be entirely removed, a committee counsel said.

This bill also would continue rent control until February 29, 1948, giving full operation to the office of Frank R. Creedon, housing expediter.

#

EXCLUDE UTILITY SPACE

WASHINGTON. — Space occupied by a utility room in a house without basement need not be included in the maximum of 1500 square feet area permitted under the veterans housing program, provided its area does not exceed 150 square feet. Where the utility room xceeds 150 square feet, the excess is included in the 1500 sq ft. maximum

Willett Is President Of Sacramento SEA

D. C. Willett was elected president of the Structural Engineers Association of Central California at its first official meeting, March 25. L. C. Hollister was chosen vice-president.

Both officers will serve a two-year term on the board of directors. A. A. Sauer was the third director elected to the two-year term. Elected to the board of directors to serve one year were W. C. Kiedaisch and M. A. Koontz.

O. T. Illerich was named secretary-treasurer. Committee chairmen were appointed at the meeting. They are: E. D. Francis, professional activities and welfare; A. L. Enger, legislation; W. Popper, program; F. W. Ervast, publicity, and W. S. Wassum, membership.

#

ARCHITECTS NAMED TO STUDY UN NEEDS

WASHINGTON.—The American Institute of Architects appointed a committee to confer with officials of the United Nations regarding the UN's urgent architectural problems this week. Its members are Eric Gugler, chairman; Ralph Walker, and Edgar I. Williams, all of New York City.

President James R. Edmunds recommended that AIA members refrain from communicating with the UN regarding the development of the site, perding a report from the committee and a discussion of the subject at the Institute's annual convention, which will be held at the end of April.

#

DUTRO TO MARKET AL-RO-DOR LINE

The Dutro Company, 837 31st St., Oakland, has acquired distribution of AlRoDor aluminum rolling doors, manufactured by The Acme Company of Oakland, who have been builders of wood and metal doors and partitions for over 50 years.

Standard size doors will be manufactured and carried in warehouses for immediate delivery. Present standards include 8 and 16 foot AlRoDor doors for one- and two-car home garages. Custom built doors will continue to be manufactured.

House Rejection of BFC Fund Appeal Will Go to Senate

WASHINGTON. — The federal works agency is not too upset over its failure of the house appropriations committee to approve its request for $20 million in deficency funds for operation of the surplus property program through the rest of fiscal 1946-1947.

George H. Field, commissioner of the bureau of community facilities, FWA constituent, told the Daily Pacific Builder's correspondent today that his agency would go before the senate in an effort to have some deficiency money appropriated for the program for schools and colleges. He does not feel, however, that the refusal constitutes any serious blow to the setup.

"Even if we got the full $20 million," Comissioner Field said, "it would be only a drop in the bucket, for that money would provide only four million additional square feet of floor space."

He estimates there is need for one million square feet right now—a conservative minimum estimate. With the $75 million appropriated last summer, approximately thirteen million square feet will be completed.

There appears to be a tendency on the part of congress to favor encouraging schools to put in their own money. This would be accomplished under the Aiken Bill now in committee. BCF would make partial grants and approve all contracts.

When the surplus property program started last year, it cost BFC $5.50 per square feet to tear down, remove to campus and erect the buildings. Some small structures ran as high as $9.00. It has found that lumber can be moved for as little as $40 per thousand board feet.

This program takes labor and some building items such as electrical and plumbing fixtures away from other type projects and this has been one reason congress has been reluctant to approve its continuance.

The Aiken Bill arrangement certainly would require the same use of materials but congress seems to favor the erection of permanent building as a more worthwhile investment.

The house committee gave public buildings administration, another FWA branch, all of the $2,700,000 it requested.

#

Super Service Plant For Mission District To Be Complete In '47

The Mission district will have a "super service "automotive establishment this year. Jess Lanning, Chrysler-Plymouth dealer at 3030 Mission, announced today a $250,000 expansion move extending from Army to 26th Street and Mission to Bartlett.

Lanning's establishment opposite Sears-Roebuck has been planned to make use of the proposed new freeway on Army. It was designed by Architect C. W. Dawson. Its several units include a heavy duty repair shop covering ten thousand square feet of floor space has just been completed. This unit contains ten twin posts Hydraulic Weaver Hoists enabling mechanics to perform work standing up and increase efficiency.

Other features include underground piping and conduit to provide separate water, air, oil and electric connections at each hoist space for individual mechanic's use.

Contractor Wilford Lee stated that work on a new super service extension unit has been started, and remodeling of the old building to include expansive display rooms, offices, and a parts department will follow.

Sell Hydroelectric Power to Pay Cost Of Reclamation Jobs

WASHINGTON. — Representative Rockwell of Colorado yesterday introduced two new reclamation policy bills aimed at simplification of the reclamation subcommittee's work of the past few weeks.

Both these measures were filed and referred to the house committee on public lands. (They are to be known as H. R. 2873 and 2874.)

For some time the reclamation subcommittee has been studying ways of lusing hydroelectric power in repayment of irrigation construction costs borne by the federal government. These bills also deal with some other phases of the Reclamation Act of 1939.

For a long time government has been desirous of working out a system whereby the sale of generated power would, in turn, compensate, at least in part, for the cost of construction of irrigation projects.

The effect of Rep. Rockwell's bills that went into the congressional mill this week will be to separate some of the issues in legislation on which the committee has been hearing testimony for several weeks.

Power contracts could be made for 50 years. Rates would be sufficient to accomplish these things:

1—Pay a share of operation and maintenance costs and provide for replacements.

2—Repay power unit construction costs in 67 years with interest at 2 per cent.

3—Repay the share of irrigation costs assigned by the Secretary of the Interior to power revenues.

4—Cover such other charges as the Secretary considers proper.

Both bills cover the above points. One, however, adds provisions of a bill authored by Rep. Jones of Ohio, pertaining to the paying back of certain project receipts not needed to pay contract obligations.

#

PRELIMINARY REVIEW ZONING REVISIONS IS COMPLETED BY SEGOE

Ladislas Segoe, planning consultant engaged by the San Francisco city planning commission, left San Francisco on Wednesday, after meeting with the commission on zoning revision matters for a week.

The world famous planning expert will visit San Francisco several times during the work on revision of the zoning law to check progress and to counsel on problems encountered. Probably he will make another trip here before July 1.

The present zoning law revision is the first since its enactment in 1921, which was just four years after the nation's first zoning ordinance was drawn up.

Segoe is consultant to the cities of Detroit, Buffalo, Cincinnati, Grand Rapids, Charleston, W. Va., and to the Tennessee Valley Authority.

#

PRIORITIES CANCELED

WASHINGTON. — Powers delegated to the housing expediter to issue HH and HHH priority ratings, and to give priority assistance in procurement of surplus property needed for the veterans' emergency housing program have been revoked, CPA announced.

#

SURPASS '46 OUTPUT

Truck trailer production in January totaled 7,523 units, according to a report released today by the bureau of the census. This figure represented a 9 per cent increase over the 6,886 units produced in December 1946.

CPA PERMITS GRANTED

SAN FRANCISCO. — The Civilian Production Administration, Gilbert H. Knoles, district director, 1355 Market Street, has announced the following permits granted for construction of commercial and industrial buildings in the San Francisco area:

STORE BLDG. auto & tractor supply, $5,000; Fortuna; owner, E D Barnes, Fortuna, Calif.

RESTAURANT (revised), $9,105; 746 Broadway, San Francisco; owner, New Joe's Restaurant, 536 Broadway, San Francisco.

BANK, $8,000; 77 Pacific Ave, Santa Cruz; owner, Co 1st Nat Bank of Santa Cruz, Santa Cruz.

FURNITURE & APPLIANCES, $5,-169; 2074 Addison, Berkeley; owner, R M Roelse, 665 Blair Ave., Piedmont.

FROZEN FRUIT Processing, $10,-000; 165th St., Ashland; owner, C L Bernardi, et al, 1280 Gilmore, San Leandro.

GROCERY, $6,195; 128 E Sonora, Stockton; owner, Jack Chan, 128 E Sonora, Stockton.

CONSTRUCTION EQUIPMENT rental, $2,206; Greenbrae; owner, Alfred A Finnila, 74 Hazel, Larkspur.

GARDEN SUPPLIES, nursery stock, $2,200; Santa Ross; owner, Glen Story, 2127 N Slater, Santa Rosa.

REPAIR RETAIL STORE Bldg, $4,-820; 2145 University, Berkeley; owner, Montgomery Ward & Co, 619 West Chicago, Chicago, Ill.

BEAUTY SHOP (evicted), $4,600; 233 North C St, Tracy; owner, L R Von Dack, 46 West 10, Tracy.

COMMUNITY CENTER, $39,600; Arlington and Rincon, Berkeley; owner, Arlington Avenue Community Church, 264 Arlington, Berkeley.

BUILDING (3-story), $9500; Richmond; owner, Matt Brikovich, 920 McLaughlin, Richmnod.

BUILDING (auto repairs), $6000; 1070 13th St, Richmond; owner, Harry J Acredolo, 1070 13th St, Richmond.

BUILDING (elementary school), $80,-000; Five Points; owner, Westside School District, Five Points.

BUILDING (farm machinery repairs), $12,950; Washington and South Sts, Hollister; owner, Tiffany Motor Co, 820 San Benito St, Hollister.

MACHINE SHOP, $6500; San Bruno; owner, Harold Z Shaw, 484 Elm St, San Bruno.

CURTAIN LAUNDRY, $3350; 1900 19th St, Sacramento; owner, Earl Lockhart, 1716 Capital, Sacramento.

SWIMMNG POOL, $75,000; Oak Park, Stockton; owner, City of Stockton, Stockton.

REPAIR FIRE DAMAGE, $5150; Dunsmuir; owner, O F Crenshaw, Dunsmuir.

REPAIR (store building), $4500; 72nd Ave and E 14th St, Oakland; owner, G J Cummings, 851 Trestle Glen, Oakland.

ADDITION and REPAIRS (drug warehouse), $17,180; Oakland; owner, McKesson & Robbins, 831 Castro, Oakland.

ELEVATOR REPAIRS, $4000; San Francisco; owner, John Breuner & Co, 571 Sutter, San Francisco.

FOOD STORE (complete), $6500; Maiaga; owner, John Mugnaini, Box 659, Route 3, Fresno.

ADDITION (to store building), $43,-000; Richmond; owner, S H Kress & Co, 1006 Macdonald, Richmond.

REPAIR (store building), $6000; Fulton and Tulare, Fresno; owner, Roselyn & Gartner for J C Penney, Fresno.

LAUNDRY (self-help), $2760; 3rd and Tucker, Selma; owner, Harry W Thaten, 1707 Grove, Selma.

WAREHOUSE (water service) $1658; 108 Center, Centerville; owner, Alameda County Water District, 116 S Main, Centerville.

MACHINE SHOP, $7500; 355 26th St, Oakland; owner, W D Patterson, 2545 Broadway, Oakland.

BUILDING (telephone service), $17,-000; 225 Linden Ave, South San Francisco; owner, Hugo Frank, 505 Main St, Hayward.

SERVICE STATION, $4090; Sonoma and Highway, Vallejo; owner Howard L Kleckner, 300 Redwood St, Vallejo.

EXTENSION (to maintenance shop), $2500; Shell and Escobar, Martinez; owner, Shell Chemical Corp, 100 Bush St, San Francisco.

BUILDING (for fire-fighting apparatus), $2500; Richmond Refinery, Richmond; owner, Standard Oil of California, 225 Bush St, San Francisco.

BUILDING (accounting office) $6000; 28th and S Sts, Sacramento; owner, Frank Marulo, 2016 27th St, Sacramento.

PRINTING PLANT (newspaper), $36,000; 2322 Valdez, Oakland; owner, East Bay Labor Journal, 2111 Webster, Oakland.

1-8—COMMERCIAL BLDGS.

4/4/47 4
Plans Under Study—Site Acquired—Office Building (35 Stories)
SAN FRANCISCO, Calif. SE corner Sacramento and Sansome Sts., ½ block long on Sansome and 165 ft. on Sacramento (site presently occupied by Greyhound bus terminal under lease, to run 3 years yet)
Owner—Niantic Corp., Louis L. Levy, president, 300 Montgomery St., San Francisco, Calif.
Architects—Hertzka and Knowles, 85 Post St., San Francisco, Calif.
Structural Engineer—W. Adrian, 417 Market St., San Francisco, Calif.
35 stories, with space devoted principally to insurance offices; modern features to include push-button garage which parks and delivers automobiles automatically, garage space for tenants and customers, movie and television theater for business lectures and meetings for tenants, skyroom restaurant with banquet rooms having panoramic view of entire city, helicopter landing on roof, conference and meeting rooms, compite clinic, stores and bank for convenience of tenants.

4/4/47 3
Preliminary Plans in Progress
Fruit Storage & Packing Plant
SAN FRANCISCO, Calif., 3rd and 10th Streets.
Owner—Levy and Zentner Co., 200 Washington St., San Francisco, Cal.
Architects—Hyman, Appleton & Wolfard, 68 Post Street, San Francisco, Calif.
Frame and concrete, 1-story, 70x300

4/4/47 8
Plans in Progress—Application Filed For Building Permit
Store Remodel Est. Cost $70,000
SAN FRANCISCO, Calif., 2660 Mission Street.
Owner — The Columbia Outfitting Company, 1109-11 Market St., San Francisco, Calif.
Architect—Marcus P. Miller, Room 469, Board of Trade Building, Los Angeles, Calif.
Renovating and remodeling three stories and mezzanine, and exterior of building.
Contractor—Not selected.

4/4/47 4
Working Drawings in Progress
Display and Office Building
SAN FRANCISCO, Calif.
Owner—Peterson Tractor & Equipment Co., 923 Harrison St., San Francisco, Calif.
Architect—Irvin William Goldstine, 821 Market St., San Francisco, Calif.
Class C construction, one-story.

4/4/47 8
Completing Plans—Construction to Start as Soon as CPA Approval is Granted
Jewelry Store Cost $140,000
OAKLAND, Calif., Alameda County, 1950 Webster St.
Owner—Gelly Miller (jeweler), 1708 Telegraph Ave., Oakland, Calif.
Architect — John B. Anthony, 178 Grand Ave., Oakland, Calif.
Engineer—Irvin Goldstine, 178 Grand Ave., Oakland, Calif.
Steel frame and brick, two stories, with provision for future 3rd floor; glass front, stores and arcade on lower floor, offices above.

9-10—EDUCATIONAL BUILDINGS

4/4/47 9
Bond Election in Amount of $400,000 Set for April 14
High School Bldgs. (Improvements)
CLOVIS, Calif., Fresno County.
Owner—Clovis Union High School District, Frank Heath, principal, Clovis Union High School, 5th St., Clovis, Calif.
Survey by Architect Frank Wynkoop & Associates, 821 Market St., San Francisco, and Stoner Bldg., 7th and Chester Ave., Bakersfield, Calif.
Includes construction of new buildings, the rebuilding and equipping of buildings acquired for Hammer Field, purchase of new equipment and improvement of present buildings and grounds. The buildings applied for from Hammer Field include a cafeteria, gymnasium and agricultural shop to be converted to permanent facilities. Plans include a new 1400-seat auditorium and a new classroom building to be erected when building costs and availability of materials permit.

4/4/47 9
Low and Only Bidders—Award Expected April 8—School Addition
STOCKTON, Calif., San Joaquin Co
Hazelton Elementary School, Lincoln and Jefferson Streets.
Owner—Stockton Unified School District, Andrew P. Hill, city superintendent of schools, San Joaquin and Lindsay Sts., Stockton, Calif.
Architect—John U. Clowdsley, Exchange Bldg., Stockton, Calif.
Frame and stucco, 1-story; includes one classroom, library, cafeteria and kitchen, concrete playyard.
Low Bidder—O. H. Chain, Elks Bldg., Stockton, Calif. $94,979.
Other bidders April 2 were:
M. H. Hennings, Stockton, Calif. $96,560.
Wallace D. Harkins, San Francisco, Calif., $97,740.

YOU GET EXTRA PROFITS
from American Mutual's All American Plan
Here's a simple way to get three important extra's . . . **Complete Insurance Protection . . . Protection At Its Best . . .** and **Savings Through Lower Costs.** American Mutual's All American Plan for Contractors shows you quickly and simply how you may get these three extra's for your next contract:
Complete Protection—American Mutual writes practically every type of insurance coverage for all types of construction projects. All forms are modern, and comprehensive to give maximum protection.
Protection At Its Best—Every American Mutual policy is backed by complete service to assure maximum value to you for the insurance dollars you spend.
Savings Through Lower Cost—Since 1887, American Mutual has returned 20% or more to policyholders—more than $100,000,000 in dividends.

Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.3375
Truck driver (less than 4 cubic yards water level capacity)	1.25
Unskilled Labor	
Flagman	1.15
Laborer	1.15

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor for which rates are not shown above shall be not less than $1.375, per hour.

The minimum wage paid to all intermediate labor for which rates are not shown above shall be not less than $1.15 per hour.

The minimum wage paid to all unskilled labor for which rates are not shown above shall be not less than $1.15 per hour.

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays—one and one-half (1½) times the above rates.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules, and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the District in which the work is situated, at the office of the Associated General Contractors in San Francisco and at the office of the County Engineer, or County Surveyor at the county seat of the county in which the work is to be performed.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids.

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p. m. on April 23, 1947, at which time they will be publicly opened and read in the Assembly Room of said building, for repairing and constructing State Highway in accordance with the specifications therefor, to which special reference is made, as follows:

Humboldt County, across Klamath River at various locations (1-Hum-84, 4G-B, C, D), the substructure for a bridge to be constructed and about five-tenths (0.5) mile of approaches to be graded and surfaced with imported base material

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Skilled Labor	
Carpenter	$1.75
Cement finisher	1.875
Concrete mixer operator (one cubic yard capacity or less)	1.60
Concrete mixer operator (over one cubic yard capacity and paving type)	1.90
Motor grader operator	2.10
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.10
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.25
Reinforcing steel worker	1.75
Roller operator	1.95
Tractor driver	1.95
Truck driver (18 cubic yards water level capacity or more)	1.7125
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.5875
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.526
Intermediate Grade Labor	
Concrete vibrator operator	1.375
Jackhammer operator	1.375
Oiler power shovels or cranes	1.50
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.3375
Truck driver (less than 4 cubic yards water level capacity)	1.25
Unskilled Labor	
Flagman	1.15
Laborer	1.15

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor for which rates are not shown above shall be not less than $1.375 per hour.

The minimum wage paid to all intermediate labor for which rates are not shown above shall be not less than $1.15 per hour.

The minimum wage paid to all unskilled labor for which rates are not shown above shall be not less than $1.15 per hour.

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays—one and one-half (1½) times the above rates.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules, and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans and forms of proposal, bonds, contract, and specifications may be obtained at the office of the Division of Architecture, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the District in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions).

The Department of Public Works reserves the right to reject any or all bids and to waive any informality in any bid received.

No bidder may withdraw his bid for a period of thirty (30) days after the time set for opening thereof.

PLANS and Speculations

Exams will be given May 17 for an associate engineering personnel examiner, $345 - $425. The state personnel board has set April 26 as final filing date.

oOo

Attorney General Fred N. Howser has instituted proceedings in the **Butte County** superior court for condemnation of land along the Feather River for levee purposes.

oOo

WAA again called for bids on the Kirkland Railroad Classification Yard at Leavenworth and Beach Sts., San Francisco. Final date for bids is April 10.

oOo

Improvement to the Butte County fairgrounds in **Gridley** is estimated to require expenditure of $14,000 from county taxes plus about $80,000 in state funds set aside for permanent improvements.

oOo

Congestion, distribution and parking will be considered in the study, the **San Francisco Bay Area Council's** transportation and traffic committee declared Thursday, in a statement of policy.

oOo

Samuel Kahn, president of the **Market Street Railway**, this week accepted the assignment of Municipal Railway and charged that no accumulated funds were available to enable the city to make regular payment on an outstanding debt of $2,200,000 owed his company on the original purchase price of $7,500,000.

#

Scrub Oak Used In New Hardwood Floor; Market Guaranteed

Production of a new-type hardwood flooring equal in top quality to conventional hardwood flooring is provided for under a guaranteed market contract which Housing Expediter Frank R. Creedon has requested the Reconstruction Finance Corporation to negotiate with Laminated Wood Products Co., Knoxville, Tenn.

The material is a three-ply cross-laminated hardwood flooring 12 inches wide and in any desired length. The flooring is made in a continuous glue press from small-size, cull-type hardwood logs not ordinarily adapted to the production of hardwood flooring. The best part of the log is used for the top layer, the remainder going into the other two layers. Because of its width—12 inches as contrasted with the 2 ¼ inch width of conventional flooringthe new type flooring can be laid with less labor. The cost of the flooring itself is competitive with conventional hardwood flooring.

The new-type flooring, which taps a new source of a building material still in short supply, was developed by the Tennessee Valley Authority as a part of its long-range conservation and reforestation program. Up to now the principal use of scrub oak has been as fire wood, and as such offered little incentive for farmers of the Valley to remove these low-prices trees, which are detrimental to the better timber, from their timber stands.

The company has taken over the TVA pilot plant, converting it into a production plant. Starting production in April, the company will produce at the rate of 3,600,000 square feet a year. Its plans call for the establishment and operation of three additional plants elsewhere in the Tennessee Valley, each of which is to have an annual production of from 12 to 15 million square feet of the new type flooring.

RFC has already granted the company a loan of $130,000.

New Creedon Order Clarifies Status of CPA's Regulations

Housing Expediter Frank R. Creedon today issued Expediter Priorities Order 5 (EPO-5) which transfers to his office regulations and orders previously administered by the civilian production administration on behalf of the veterans emergency housing program.

Taken over by the housing expediter are Priorities Regulations 1, 3, 5, 7, 7A, 8 ,22, 33, and 35, and veterans housing program orders 1, 3, 4 and 5, and Order L-357. Certain directions, supplements and interpretations to these regulations and orders are also taken over. Applications for authorization for non-housing construction under VHP-1 should be filed on the same form as before — CPA 4423.

Three other CPA regulations—PR 19, PR 28, and PR 32—are revoked, but their provisions relating to housing are retained by the housing expediter. Provisions of PR 13 on special sales of unused building materials are incorporated in Schedule A to PR 33 by an OHE amendment effective today. PR 28 is reissued and amended by the housing expediter to make it conform to a previous CPA action discontinuing issuance of CC ratings on March 31. Applications for RR ratings under PR 28 should be filed on the same form as before—CPA 541 A. PR 32, continuing inventory controls on building materials, is issued by the housing expediter covering a considerably narrower field than the former CPA PR 32.

Several other regulations—HPR, HEPR 6, Direction 8 to PR 33, and EPO 1—have been amended to include necessary cross references with the revised regulations. The housing expediter also issued an appeals order, establishing a procedure to be followed in filing appeals from all housing expediter regulations and orders except VHP-1 and those regulations which provide for appeals to be addressed elsewhere than to the housing expediter or the national housing agency.

All communications with respect to the regulations and orders transferred by CPA, including applications for authorization under them, appeals and requests for interpretation, should be made to the Office of the Housing Expediter, Washington 25, D. C.

COMMITTEE REFUTES PUBLISHED REPORT

WASHINGTON (Exclusive). — A house banking and currency committee spokesman branded as erroneous a published report that a tentative committee vote favored a 10 per cent across-the-board increase in rents.

The members of Congressman Wolcott's banking committee considered the measure in closed session again Wednesday and finally postponed further action until Apr. 16.

Did You Know That . . .

Dean Hammond, noted aircraft designer and manufacturer, has been appointed chief engineer of the Kaiser-Frazer Corp. at Willow Run, Michigan. D. L. Mapes has been named general superintendent of the materials division for the firm.

oOo

E. J. Stuber has entered the employ of the Bethlehem Pacific Coast Steel Corporation, fabricated steel construction division, as contracting engineer with offices at Alameda. Formerly associated with the Bethlehem Steel Company in the metallurgical department at the Lackawanna plant, Stuber served during the war as a lieutenant in the U. S. navy inspection of navy materials and in the contract termination section.

oOo

Truck bodies with an approximate weight 1,500 pounds lighter than the average now are being constructed from a combination of aluminum and a veneer kraft plywood laminate.

GROOVER AND I

TURKISH AID

You may keep your grief moderate in weeping over the plight of the Turks.

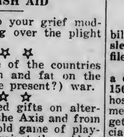
☆ ☆ ☆

Turkey is one of the countries which grew rich and fat on the last (or is it the present?) war.

☆ ☆ ☆

Turkey received gifts on alternate days from the Axis and from the Allies—the old game of playing both ends against the middle.

☆ ☆ ☆



The odds are better than 7 to 3 that our next "loans" will include 150 million dollars or more of aid to Turkey.

☆ ☆ ☆

As it became evident this deal was in the bag there were interesting developments in Turkey:

☆ ☆ ☆

Merchants filed applications for permission to INCREASE their EXPORT grain shipments!

Lyons President of Stockton Exchange

Ed Lyons was elected president of the Stockton Builders' Exchange last weekend, succeeding C. H. Garner.

Other new officers include Vice-President Tom Dowling and Treasurer E. R. Muzio. Frank Kent was re-elected secretary. Four new directors were named. They are: W. T. McCarthy, J. H. Simpson, Ray Stirm and Muzio. Outgoing directors are: E. F. Mitchler, J. F. McGovern, Corbin Shepherd and J. A. Allen.

#

MATERIALS TRADING IS 91% MORE IN 1947

WASHINGTON. — Trading in construction materials during February of this year, at $304 million, and $382 million respectively, was 91 per cent greater than the same month in 1946. The compilation was released by the department of commerce Monday.

#

SELL ELECTRICAL GOODS

WASHINGTON. — Surplus electrical equipment which originally cost the government more than $5.5 million, is offered for sale by war assets administration. One of the largest inventories is in San Francisco. It will be sold on a competitive bid basis.

Pole line hardware will be sold on competitive bids and at fixed prices. A large stock is located at Los Angeles.

#

TIN UNCHANGED

No change in existing controls on tin and tin mill products is under consideration at present, the Civilian Production Administration has informed the tin plate industry advisory committee.

Senate Forges Ahead on Construction Bills; Road Building, Airports Being Considered

By PHILIP G. BRADY

SACRAMENTO.—While the Assembly is wrapped up in the multi-billion dollar highway program, the State senate has rolled up its sleeves and daily committee meetings are tackling some 1500 bills filed with that body.

About 10 per cent of the measures awaiting consideration have a direct bearing on some phase of the construction industry. These 150 bills range from housing, schools and road construction through hospitals, public works and workmen's compensation, and not forgetting safety, license and financial regulation.

To keep the industry abreast of the Sacramento story, the Daily Pacific Builder presents a review of legislation affecting the industry now before senate committees. This, and the articles to follow, will focus attention on the most vital bills.

Some 30 bills have been filed specifically on road construction, including two (S. B. 1379 and S. B. 1423) which appropriate $760,000 to the Regents of the University of California for establishment of a School of Highway and Road Engineering. Both the education and transportation committees are studying this measure.

Other bills are listed numerically for convenience; those starred are of attested great importance:

S.B. 126 extends exemption from parking restrictions to vehicles owned or operated by contractor engaged in authorized work on highway.

*S.B. 274 appropriates $2,475,000 to relocate a portion of Route 5 to clear Santa Clara reservoir.

S.B. 408 adds highway from Fresno to Ventura, specific route, to state primary system.

S.B. 409 adds state highway route from Merced to Route 4 near Stockton to be called Merced-Port Stockton highway.

S.B. 410 adds state highway route from Turlock to Los Banos via Stevinson.

S.B. 412 adds "straight line" highway from near Patterson to San Jose.

S.B. 502 adds state highway route from Albany to Richmond-San Rafael ferry.

S.B. 526 changes descriptions of certain highway routes.

S.B. 628 provides $100 for damages to state highway trees.

S.B. 697 requires highway commission to submit entire budget to Governor prior to January 15 for inclusion in regular budget.

S.B. 777 increases membership, if Highway commission from 7 to 9, with 8 members representing definite geographical districts.

S.B. 785 authorizes and validates inter-city agreements limiting powers to vacate public streets and highways.

S.B. 786 authorizes and validates agreements between towns, cities, and counties on opening and closing public thoroughfares.

S.B. 818 provides for laying out, opening and altering private or by-roads in same manner as public roads except that only one petitioner is required.

S.B. 827 authorizes Division of Beaches and Parks to establish a new cross-state trail from Sierra Trail in El Dorado county to junction with Coast and Redwood Trail in Humboldt county.

S.B. 857 adds state highway route from Colusa to connection with Route 45 at Codora, Glenn county.

S.B. 858 adds state highway from Redwood highway near Longvale to connection with Route 7 between Willows and Corning.

S.B. 859 appropriates $25,000 for a new "Farm to Market Roads" bureau to study desirable roads, considering transportation of agricultural, mineral, and timber products.

*S.B. 897 requires Public Works department to call for alternate bids, specifying asphalt or concrete pavement and to accept lowest bid except under special conditions.

S.B. 983 adds roads from Marin-Sonoma line to Russian river, near Jenner, and from Westport to Ferndale, to existing Route 56.

S.B. 1038 authorizes Golden Gate Bridge and Highway district to transfer, and Highway commission to accept, Sausalito lateral which thereafter shall be a state highway.

S.B. 1039 emergency act appropriating $5,000,000 for a new highway approach in Marin county to Golden Gate Bridge, and permits funds to be used for reconstructing present approach.

S.B. 1040 adds highway from terminus of Marine boulevard in San Francisco to junction with Route 2, to Route 2.

S.B. 1043 requires public works department to realign and reconstruct highway from Ignacio to Sears Point.

S.B. 1285 adds to Route 69 a new section from a point in Albany to Washington School, Richmond, and omits designation of Bay Bridge approaches as portions of this route.

*S.B. 1424 provides funds repaid to state for approaches to Bay Bridge shall be used only for construction and improvement of highways in northern counties.

S.B. 1434 provides highway commission shall adopt transversable highways on legislative state highway routes and the state shall maintain them.

S.B. 1506 re-allocates state highway construction moines to give larger percentage to County Group No. 2 and limits construction moines to those expended for rights of way, construction and construction engineering.

S.B. 1507 repeals law prohibiting opening of street or highway at grade into expressway after completion of construction of it.

Airports

S.B. 1393 grants to City and County of San Francisco all State interest in submerged lands contiguous to S. F. Airport, San Mateo county.

*S.B. 1451 (California Uniform Airports Act) provides for acquisition, establishment, operation and regulation of airports by political subdivisions and authorizes removal of airport hazards and acquisition of approach easements and rights by condemnation or contract. Prohibits encroachments thereon.

S.B. 1529 includes airports in the present law protecting certain businesses from injunction on grounds of nuisance

Parking

S.Rs 172-173 amending Vehicle Parking District act to allow acquisition of property for off-street parking and operating directly or by contract such facilities and allows unincorporated territory to be in district.

4c COPPER DUTY TO BE RE-VOTED SOON

WASHINGTON. — The Senate finance committee yesterday failed, on a tie vote, to reach a decision on the proposed suspension of import duties on copper to permit more of this commodity to reach American manufacturers of commodities requiring its use.

Senator Baldwin of Connecticut said he told the finance committee in an executive session that failure to suspend the four cents per pound duty charge would mean a "cutback in production with resulting unemployment and high prices."

A house - approved bill already calls for a two-year suspension of the import duty and Senator Baldwin would have the Senate group follow this procedure.

Official Proposals
FIRST PUBLISHED TODAY

Santa Clara County
9.1 Mile Grading and Surfacing

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received by the Department of Public Works, Division of Highways, at the office of the District Engineer, 2001 Van Ness Avenue, San Francisco, until two (2) o'clock P. M., on Thursday April 17, 1947, at which time they will be publicly opened and read, for performing work as follows:

In Santa Clara County, about 1¼ miles west of Merced County Line (1V-SC1-32.C), about one-tenth (0.1) mile in length, to be graded and bituminous surface treatment applied.

Plans and specifications, and forms of proposal, bonds, and contract may be obtained at the above address.

No bid will be considered unless it is made on a proposal form furnished by the District Engineer, and is made in accordance with the provisions set forth under Section 2, "Proposal Requirements and Conditions" of the Standard Specifications. Each bid must be accompanied by a proposal guaranty in accordance with the requirements of article (f) of the said Section 2 of the Standard Specifications.

The Department of Public Works reserves the right to reject any or all bids.

The quantities listed in the State Highway Engineer's Estimate hereinafter stated, are approximate only, being given as a basis for the comparison of bids, and the Department of Public Works does not, expressly, or by implication, agree that the actual amount of work will correspond therewith, but reserves the right to increase or decrease the amount of any class or portion of the work, or to omit portions of the work, as may be deemed necessary or advisable.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Asphalt plant dryerman or fireman	$1.60
Carpenter	1.75
Flagman	1.15

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of their classifications.

The minimum wage paid to all skilled labor, for which rates are not shown above, shall be not less than $1.375 per hour.

The minimum wage paid to all intermediate labor, for which rates are not shown above, shall be not less than $1.15 per hour.

The minimum wage paid to all unskilled labor, for which rates are not shown above, shall be not less than $1.15 per hour.

Overtime one and one-half (1½) times the above rate.

Sundays and holidays one and one-half (1½) times the above rate.

The rates of wages, including overtime, holiday and Sunday rates, above specified are subject to the effect, if applicable hereto, of executive orders of the President of the United States and to any modification thereof and to any and all lawful orders of the President or any other authorized Federal officer or agency, insofar as the same may be applicable to this contract. In case of any inconsistency, the rates fixed by any such applicable Federal order, whether higher or lower, shall control.

The foregoing quantities are approximate only, being given as a basis for the comparison of bids, and the County of Shasta does not, expressly or by implication, agree that the actual amount of work will correspond therewith, but reserves the right to increase or decrease the amount of any class or portion of the work, or to omit portions of the work, as may be deemed necessary or expedient by the Engineer.

The attention of the bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the County Clerk, Hall of Records Building, Redding, California, and they may be seen at the Office of the County Surveyor of Shasta County.

No bid will be considered unless it is made on a blank form furnished by the County of Shasta and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

The County of Shasta reserves the right to reject any or all bids.

LARGEST CONSTRUCTION DAILY IN THE WEST

Vol. 57—No. 68 SAN FRANCISCO, TUESDAY, APRIL 8, 1947

Copyright 1946 by F. W. Dodge Corporation

PLANS and Speculations

Westinghouse Electric Corporation which recently leased the Joshua Hendy Iron Works at Sunnyvale, has an option to buy the plant by Nov. 30, 1948, for $3,468,240.

oOo

Establishment of super highways and efficient train service between San Francisco and San Jose will be the objectives of a rapid transit committee formed Tuesday night in Redwood City by representatives of the counties of San Francisco, San Mateo and Santa Clara.

oOo

High bid for the $362,168-Salinas guayule plant was presented by California Mineral and Metals Products Company, at $92,000.

oOo

A senate subcommittee recommended establishment of the $28,750,000 naval post-graduate school at Monterey.

oOo

The state division of highways has submitted sketches of a proposed freeway and underpass beneath the Garces Circlye to the Bakersfield city council.

oOo

The senate finance committee of the State Legislature approved a bill calling for a report by May 15 on emergency higher education needs in the Sacramento and Los Angeles areas.

oOo

The Bay Area Council's traffic and transportation committee has invited communities interested in the new span to apply for hearing dates, so a schedule may be set up.

oOo

Abandonment and removal of about one mile of track on Sacramento Street in Lodi has been authorized by the state public utilities commission.

oOo

Creation of a state housing authority to spur construction of low rent permanent housing in San Francisco was endorsed by Mayor Roger Lapham this week. He said the measure would permit the city to augment federal aid with state loans to finance a planned program for six San Francisco projects.

oOo

Governor Warren may call a special session on housing "right away," he said today.

oOo

Mayor Lapham has announced that $56,450,000 will be asked of the voters, to cover the city's traffic and transportation needs only—unless the supervisors enact new taxes in the meantime.

oOo

Greenwood Avenue sewer district in King County, Wash., was advanced $6,500 by FWA to finance preparation of plans and specifications for a sanitary sewerage system and treatment plant to cost $1,233,000.

oOo

WAA will take bids for sale of buildings at Salinas army air base on April 17.

oOo

Butte county supervisors have arranged to buy 33 acres of Gridley property for use as the county's fair grounds. Price is $34,000.

HEIMAN SERVICES TODAY AT 1:30 P. M.

Funeral services for Samuel Heiman will be held Tuesday afternoon at 1:30, at the mortuary of Halsted & Company, Sutter and Polk. The well-known San Francisco architect died here Sunday afternoon.

Surviving are his wife, Dorothy, and two sons, Warren and Lawrence. He was a member of Marin Lodge No. 191, F. & A. M., San Francisco Bodies A. & A. S. R. and Islam Temple A. A. O. N. M. S.

AED to Collect Scrap Iron, Steel In National Drive

WASHINGTON.—That old bugaboo, the scrap iron shortage, popped back into the news today with announcement by the Associated Equipment Distributors that they are launching a nationwide drive to bring in the waste.

William A. Danner, president of AED, urgently called on 1,000 distributors and manufacturers to start at once sending all their old scrap to the nearest dealer.

Simultaneously he requested each of the 45 local equipment distributor associations to organize for furious scrap gathering efforts.

Immediate action is required, he feels, to avoid a further slowing of deliveries of construction equipment. The present shortage threatens to curtail these deliveries drastically.

The Scrap Iron and Steel Institute points out that most steel mills use substantial quantities of scrap material in making ordinary grades of steel. They mix this with new pig iron in as high proportions as 50 to 60.

The scrap used for this purpose may be either iron or steel since it already has been refined. This earlier treatment also shortened the process in new manufacture, thereby speeding the mill process and increasing capacity.

Danner declared:

"Anything made of iron or steel is valuable as scrap—old construction equipment, parts, pipe, worn-out tanks, boilers, etc. Search trough your equipment yards and other places for such materials and get them on their way to the steel mills and foundries."

#

Posting Ordinance Sent to Judiciary At Builders' Request

A proposed ordinance to require a posting of notice of issuance of building permits which came before San Francisco supervisors for final passage Monday was referred back to committee at the request of Milton W. Morris, representing the Associated Home Builders.

The ordinance would force contractors to pay a ten dollar fee to cover the cost of posting notices at the site of new construction or for work on existing buildings, or else for legal advertising. It directs that this shall be administered by the officer which issues the permit to build, presumably the city's Central Permit Bureau.

When the matter next comes up in the judiciary committee, the home builders' organization will ask for drastic revisions. Milton W. Morris, executive secretary, has stated that the $10 fee is exorbitant and that such posing may be justified for existing structures but is not where new construction is concerned.

#

STATE LEADS NAREB

Membership in the National Association of Real Estate Boards jumped 1,259 during the first quarter of 1947, making a total of 36,500, C. Armel Nutter, Camden, N. J., chairman of the membership committee, announced today. The number of local real estate boards increased 10 to a total of 891 during the same period.

The largest gain, 444, was recorded by California, which moved its total, the largest of any state, to 6,973.

#

DUPLATE ADDITION

PITTSBURGH. — Construction of a $385,000 addition to the Duplate department at Pittsburgh Plate Glass Company's Creighton, Pa., plant will be started early in April, according to Richard B. Tucker, executive vice president of the firm.

Berkeley Official Refutes Statement A.B. 1332 Endorsed

The statement that the Pacific Coast Bldg. Codes Conference recently went on record opposing A. B. 735—a fire safety bill—was refuted today by Harry A. Cobden. It appeared March 25 in the Daily Pacific Builder.

Cobden, who is chairman of the state committee on revision of the State Housing Act, said in a written statement: "The meeting did not go on record opposing Assembly Bill 735." In fact, he said, the PCBCC had endorsed A.B. 735 on February 20.

Reaction of the building officials, however, is not agreed upon in building circlec. An architect who attended described the building officials' failure to go on record as "only a hairline distinction."

Admittedly, the March 21 meeting was called because some of the building officials desired to have the endorsement of A.B. 735 revoked, and to swing support to A. B. 1332, which is patterned after the uniform building code.

In a recent interview, Cobden freely admitted that A. B. 735 was not perfect legislation because it was hastily drawn up, under pressure because of recent tragic fires. It is better than A.B. 1332, he maintains, on grounds that the latter is not retroactive, while 735 is.

The committee chairman pointed out that a companion measure to 735 already has been passed. It provides for a committee to study and revise A.B. 735 should it become law, over a two - year period.

Meantime, it was pointed out in other quarters that passage of the stringent bill promoted by the state division of housing would drain off much construction labor and material at a time when neither is over-plentiful.

If the bill should become law, but state officials overlook failure to comply with it during the housing shortage they not only are ignoring the "health, safety and welfare" of the state of California—only justification for such a law—but such policy would be an open invitation to damage suits.

#

Portland Firm Gets Guaranteed Market

Housing Expediter Frank R. Creedon has requested the reconstruction finance corporation to negotiate a guaranteed market contract with the C. D. Johnson Lumber Co., Portland, for the production in 1947 of 7,000 prefabricated houses.

Called Prenco (for Prefabrication Engineer Company, a department of the C. D. Johnson Lumber Co.), this house represents prefabrication to an unusually high degree. The house is shipped from the factory already assembled into sections instead of the usual panels; heating, plumbing, and electrical systems have already been installed, and the finish paint job has been applied, all before shipment from the factory. The sections are hauled to the building site on trailers. At the site the sections are placed on previously prepared foundations and bolted and sealed together. When utility connections are made, the house is ready for occupancy. A six-man crew, including the foreman, can assemble the two bedroom house, ready for occupancy, in a day.

Did You Know That . . .

Glide In Overhead Door Company has opened an office in San Jose, at 403 Keyes Street, which features complete stock and installation facilities. The telephone number is BAllard 6161.

oOo

Loren Cato, formerly assistant advertising manager Anglo-California Bank, San Francisco, has been appointed advertising manager of Jacuzzi Bros., Inc., Richmond, manufacturers of farm and industrial pumps.

Education Committee Considers Proposals For $50 Million New School Construction

By PHILIP G. BRADY

SACRAMENTO.—California will get some $50 million in new schools if the Legislature passes just ten bills now being considered by the senate.

Some $30 million of this sum would go to aid impoverished school districts under a bill filed by Senator Fred H. Kraft, (r., San Diego), a pharmacist and accountant, who has authored or co-authored 123 bills and thrown in a concurrent resolution for good measure.

The other bills would set up state colleges in Chico, San Diego, Humboldt, Sacramento, as well as two colleges in San Francisco. In addition, the state would construct a chain of rado stations for educational purposes and establish a $750,000 wine-making school.

Of immediate importance is S.B 1214 filed by Sen. Gerald J. O'Gara (d., San Francisco) which would increase from $4000 to $15,000 the cost of reconstruction, alteration or addition to school buildings that may be done without the approval of the state division of architecture.

Under S.B.367 the division of school house planning would be abolished and its functions transferred to the Department of Education.

Sen. Kraft's $30 million measure is bound to get considerable attention as the San Diego druggist is a member of the education committee which is considering it. A similar bill (S.B. 888) has been filed by Sen. DeLap, Richmond attorney.

S.B. 238 would create a state school building commission consisting of the superintendent of public instruction, finance director, public works director, and a member each from the assembly and senate. This commission would distribute the $30 million to impoverished school districts for school building sites, construction and furnishing of school buildings.

The bill defines an impoverished school district as one whose tax rate is within one - half cent of maximum and whose bonds issued exceed 95 per cent of the limit. Cost of administering the act, which is an emergency measure, is limited to $225,000.

The next largest individual measure is one filed by Sen. O'Gara to establish a new San Francisco State College. S.B. 1490 appropriate $500,000 for acquisition of real property, while S.B. 1489 calls for $3,600,000 for construction and improvements.

Sen. O'Gara also sponsored a measure (S.B. 624) calling for $1,200,000 for purchase of land and construction and equipment of buildings for Hastings College of Law at San Francisco.

Other school bills, in numerical order, follow:

S.B. 173 appropriates unspecified sum for construction of buildings and purchase of equipment for Chico State College.

S. B. 489 appropriates $2,200,000 for completion of construction of buildings, improvements on San Diego State College.

S.B. 593 appropriates $150,000 for acquisition of additional real property for use of Humboldt State College.

S.B. 594 appropriates $2,250,000 for construction and improvements at Humboldt State College.

S. B. 909 appropriates $750,000 to the Regents of the University of California for construction and equipment of a viticultural building for research in wine and viticulture.

S.B. 1125 provides $1 million each from balance of Fair and Ex-

(Continued on Page 7)

Congresswoman From California Denounces Wolcott Rent Measure

WASHINGTON. — Helen Gahahan Douglas, representative from California, is the latest member of congress to raise her voice in protest against the Wolcott bill which would shift rent controls to advisory boards and eliminate building regulations at Federal levels altogether.

The measure as it now lies dormant in the housing banking and currency committee until after an Easter recess of the house, would bring down a double-barrelled blow on the heads of 50 million rent payers in the country, she maintained.

First, the congresswoman said it would leave the tenant without recourse to federal support in fighting eviction cases and rent raises because most of the renters cannot afford to hire attorneys to fight out their cases in the courts.

Secondly, she avowed passage of the Wolcott bill would remove the last of the government con-

Rec Bureau Orders Materials for Four Reclamation Projects

Materials and equipment for irrigation works on four projects, and construction of a warehouse on a fifth, have been ordered by the bureau of reclamation under five contracts amounting to more than half a million dollars, Secretary of the Interior J. A. Krug announced today.

Two of the contracts call for steel reinforcement bars for canal linings on the Columbia Basin project in Washington, Commissioner of Reclamation Michael W. Straus said. One contract, amounting to $109,345, provides for bars for the lining of the West Canal. Approximately 281,000 acres will be served by this canal which will run past Soap Lake and the town of Ephrata to the vicinity of Quincy. The other contract, amounting to $97,463, is for reinforcement bars for the lining of the Inlet Feeder Canal which will transport water from Grand Coulee pumping plant discharge pipes to the equalizing reservoir to be formed by the North and South Coulee dams. Both contracts were awarded to the Southwest Steel Rolling Mills, Los Angeles, the lowest bidder.

Power cable for the Keswick and Shasta Power Plants on the bureau of reclamation's Central Valley project is ordered in a third contract, amounting to $73,092. The contract was awarded to the General Electric Company, Denver. Shasta Power Plant ultimately will have an installed capacity of 379,000 kilowatts, and Keswick, 75,000 kilowatts.

FHA PERMITS ISSUED

SAN FRANCISCO, Calif.—Federal Housing Administration, D. C. McGinness, district director, 815 Montgomery St., San Francisco, Calif., has announced the following list of permits granted by the above office for the construction of dwelling or rental units (other than for owner-occupancy) in the San Francisco area for applicants as noted:

1 UNIT—Pittsburg; Charles R Russey, 817 Columbia Park, Pittsburg.
17 UNITS—San Francisco; Gus Moeller & Sons, 6260 Geary Blvd, San Francisco.
9 UNITS—Sacramento; J D Smith, 2956 23rd St, Sacramento.
4 UNITS—Sacramento; Paul Y Dong, 3406 Stockton Blvd, Sacramento.
3 UNITS—San Francisco; G Greenleaf, 326 Halloway Ave, San Francisco.
2 UNITS—Sacramento; E A Cochran, 2725 7th Ave, Sacramento.
2 UNITS—North Sacramento; Helen Erickson, 1933 El Monte Ave, North Sacramento.
2 UNITS—Capitola; A T Buck, Route 1, Box 141D, Santa Cruz.
1 UNIT—San Jose; H G Wick, 342 Westcourt, San Jose.
2 UNITS—San Mateo; Francis H Kappeler, 716 Nevada Ave, San Mateo.
1 UNIT—Pittsburg; Charles R Russey, 817 Columbia Park, Pittsburg.
2 UNITS—Sacramento; Herbert F Morris, 3863 Jeffrey Ave, Sacramento.
2 UNITS—San Francisco; Peter Mortensen, 3638 28th St, San Francisco.
3 UNITS—Redwood City; Lloyd B Osborne, 4255 Jefferson Ave, Redwood City.
2 UNITS—Petaluma; S Rodrigues, 215 Kent St, Petaluma.
4 UNITS—Oakland; M J Steffensen, 1300 Webster St, Oakland.
2 UNITS—Ripon; Alvin TenDolle, Box 24, Ripon.
2 UNITS—San Jose; E T Komsthoeft, 701 Willow Glen Way, San Jose.
2 UNITS—Fresno; Ray Dunn, 3606 Washington, Fresno.
2 UNITS—Stockton; Delucchi, Gala Co, Inc, 125 W California St, Stockton.
4 UNITS—Concord; David Z Davis, 135 Cross Rd, Oakland.
2 UNITS—Sacramento; Roy J Brown, Route 7, Box 482C, Sacramento.
1 UNIT—Santa Cruz; Arthur Steiner, 28 Avalum Ave, Santa Cruz.
1 UNIT—Daly City; State Building Corp, 1435 Paloma Ave, Burlingame.
1 UNIT—Elk Grove; Thurston R Campbell, Box 75, Elk Grove.
1 UNIT—Watsonville; Anthony Sancellieri, Box 450, Watsonville.
1 UNIT—Fresno; Lauren Turck, 1030 Rowell Ave, Fresno.
1 UNIT—Stockton; Percy G Grable, 956 S Ore Ave, Stockton.
1 UNIT—San Francisco; Jack Kelly, 1508 Ocean Ave, San Francisco.
1 UNIT—Sacramento; 2649 Castro Way, Sacramento.
52 UNITS—Pittsburg; Pittsburg Homes Co, 9035 A St, Oakland.
7 UNITS—San Francisco; J & S Construction Co, 156 Castenada Ave, San Francisco.
12 UNITS—Fair Oaks; G L Kimball, Route 1, Box 41, Fair Oaks.
1 UNIT—Sleepy Hollow; Frank Healon, 582 4th St, San Rafael.
1 UNIT—Salinas; I R Harrison, 641 May Ave, Salinas.
4 UNITS—Calistoga; R W Eaton, Washington and Gerrard Sts, Calistoga.
2 UNITS—Fresno; Charles J Vagim, 1462 Bisham Ave, Fresno.
2 UNITS—Merced; Board of Supervisors, Merced.
2 UNITS—Stockton; Louis Rubino, 3311 N Sutter, Stockton.
2 UNITS—Sacramento; Charles A Henson, 2209 11th Ave, Sacramento.
10 UNITS—San Mateo; Quality Home Builders, 2500 El Camino Real, San Mateo.
2 UNITS—Fresno; Robert W Lee, 2129 Blackstone, Fresno.

Official Proposals

Construction of a Ferry Boat

NOTICE TO CONTRACTORS

Sealed bids to construct, furnish, and deliver to the dock at Astoria, Oregon, a single screw 660 H.P. steel hull, diesel ferry will be received by the Oregon State Highway Commission in the auditorium on the third floor of the Public Service Building, Portland, Oregon, at 9:00 a.m. on **Thursday, April 24, 1947.** The principal dimens are as follows: Length, 180 ft. 0 in.; Beam, Moulded, 50 ft. 0 in.; Depth, Moulded, 13 ft. 6 in.; and Draft D.W.L., 8 ft. 0 in.

Prequalification of bidders will be required in accordance with provisions of Secs. 98-102 to 98-106, O.C.L.A., Inclusive. Full information for bidders may be obtained at the office of the Oregon State Highway Commission, Room 319, State Office Building, Salem, Oregon. Proposal blanks, plans, specifications, and form of contract may be inspected at the same place and may be obtained by eligible bidders upon payment of $2.00 per each set.

A complete set of plans and specifications may be inspected at the offices of the Associated General Contractors, in Portland, Oregon; Seattle and Spokane, Washington; San Francisco, California; and Boise, Idaho; and at Builders Exchange Cooperative, Portland, Oregon.

The right is reserved to reject any and all proposals or to accept the proposal deemed best for the State of Oregon.

Copyright 1946 by F. W. Dodge Corporation

GROOVER AND I

$5 PER DAY, AND LEFT-HAND DRIVE

Some years ago an obscure fourline paragraph under a Detroit dateline announced the death of David Buick, builder of the first Buick automobile, who died in penniless poverty.

☆ ☆ ☆

Henry Ford is the only one of the automobile crowd who never let go. From its alley garage beginning the control of the Ford Motor Company has remained in the Ford family.

☆ ☆ ☆

There are those who will attribute Ford's long and active life to the fact he was a practicing prohibitionist.

☆ ☆ ☆

He also demonstrated he was an impractical and visionary pacifist.

☆ ☆ ☆

Immediately following World War I Ford chartered the good ship "Oscar II", loaded aboard a group of economists and peacemakers, sailed to Europe to present a Peace formula. Before the ship reached its destination the "experts" were in such a row among themselves that the ship turned back without unckingding. (Sounds like Moscow today.)

☆ ☆ ☆

In addition to forcing the Nation to build highways, Ford forced all other auto manufacturers to adopt the left-hand drive. Time was when all other cars had right-hand drives. The "lefties" will point to the 8 or 9 hundred million dollar Ford fortune and claim it is too much for one family, that it should be divided up among the workers who earned it, etc., etc., & etc.

☆ ☆ ☆

By remaining intact the Ford Company has done more for its workmen than would have been the case had it been divided up and dissipated in countless forgotten bankruptcies—and besides the Ford fortune IS divided up among the workmen — every payday. Its a continuing process.

☆ ☆ ☆

The Saga of the Ford Empire might well be called the story of this Republic with its free, competitive enterprise.

☆ ☆ ☆

Some years ago Ford threw the Industrialists of this country into a tizzie and tailspin by announcing the adoption of a minimum $5.00 per day wage rate. It was unheard of—it was treason—it was bankruptcy—

☆ ☆ ☆

and it was one thing for which no union was able to take any part of the credit.

(Continued on Page 7)

Price Peak Impending, Say Pacific GC's; Climb of 12 Per Cent Expected During Year

Fifty-three per cent of 268 general contractors in all parts of the country polled by F. W. Dodge Corporation, fact-finding organization of the construction industry, believe that the peak in construction costs has been reached.

In some areas, notably in New England, the South Atlantic states and the East South Central states, opinion was preponderant, at least 4 to 1, that costs had attained their highest level.

Only in the Pacific states was opinion general that the peak had not been reached, and here further cost climbs ranging from 11 to 12 per cent during the current calendar year were expected.

The minority, or 125 general contractors, believe that further increases can be expected, the average increase anticipated by them being 8.2 to 10.2 per cent above current levels.

Stable Since January

At the same time the poll indicated that prices for most building materials, with the exception of lumber, Portland cement, structural steel and cast-iron soil pipe and fittings, have tended to remain stable since January 1.

More than half of the contractors reported prices stable for all except two items: lumber and portland cement. Lumber costs have declined in some areas with the over-all trend stable to downward, while portland cement, structural steel, cast-iron soil pipe and fittings have tended to increase since the first of the year, the Dodge survey shows.

The other items, mentioned most often as having remained stable since January 1, in the order of stability reported, are: structural clay tile, brick, building blocks, clay sewer pipe, building plaster, warm-air furnaces, hardwood flooring, and cast-iron radiation.

Forty-three per cent of the contractors reported that the average wage of some building craftsmen in their respective areas of operation had increased since the first of the year, and 76 per cent said that they expected increases later in the current building season. The amount of the increases varied but 10 per cent was most frequently mentioned as the average wage increase of craftsmen effectuated since January 1 or expected this spring.

In general, wage increases since January 1 are most frequently reported to have become effective in the Middle Atlantic states, the west south central states and the Pacific states. Anticipated increases are frequently reported in all areas excepting the east south central states of Kentucky, Tennessee, Alabama and Mississippi. In this latter area, for example, 45 per cent reported that increases have already taken place, and 45 per cent said increases will take place in the average wage level of craftsmen within the next few months.

Unusual High Cost Spotted

General contractors, by extremely high majorities, reported that the following unusual factors con-

(Continued on Page 6)

OHE's Channeling of Pig Iron Into Soil Pipe Production Will Hurt Pressure Pipe Product'n

WASHINGTON.—(Exclusive).—While the cast iron pressure pipe supply is not as serious now as it was last summer, there are still going to be instances during the 1947 building season when failure to obtain this commodity will hold up the completion of residential developments.

A spokesman for the Cast Iron Pressure Pipe Institute in Washington, the organization that represents the nation's manufacturers, said today his industry will feel keenly the decision of the Office of Housing Expediter to channel a substantial portion of the April pig iron output into the making of cast iron soil pipe.

Soil pipe is essential to the completion of new homes. While acknowledging this, the Institute argues that main extensions, using the pressure type conduit, is as important a requisite.

The pressure pipe factories have not had too much trouble over the winter in supplying their dealers. Transportation difficulties have loomed as a major problem, particularly affecting the west coast regions.

Mills that load their products on ships in Alabama and ship by the Panama Canal to California have experienced difficulty in moving the material after it reaches the coast ports. Much of the short haul consignments go by truck from the west coast docks but the truck operators have been overburdened as a result of the freight car shortage.

New Record in '48

A continuing shortage of raw pig iron—though much less severe than during 1946—still handicaps the pressure pipe manufacturers. (One Pennsylvania mill was forced to close down last week.)

Given an even chance on the supply of its principal raw material, the industry feels that is can maintain operation capacity sufficient to supply the nation's housing needs.

According to the predictions of Claude C. Blair, president of the Paving Brick Institute, these needs will mount during 1947 as expressed in new city and suburban street construction.

He estimated today 30 per cent of the record-breaking road building expenditures for the next five years would go for new city and suburban improvements. This will take mounting quantities of cast iron pressure pipe to service housing areas.

In 1943 the volume of municipal paving laid down declined to the lowest point in 30 years. It ttoaled less than $60 million in cost. At that time, of course, residential

(Continued on Page 6)

T-E-W Bill Would Drain Off More Materials–SCPI

WASHINGTON.—The Structural Clay Products Institute today gave a new twist to arguments placed before Congress in opposition to passage of the Taft-Ellender - Wagner long range housing bill.

Making this measure into law would not help to end the housing shortage, Roy A. Shipley, president of SCPI, said, because private builders would then utilize the supply of materials available for residential construction.

"The only methods the bill presents for improving the housing supply are various credit devices," Shipley stated. "As a matter of fact, credit is available to veterans and others in greater supply and at lower interest rates than ever before."

The Institute's president feels that operation under a bill such as the T-E-W legislation would increase the competition for available supply of materials and tend to further increase the cost of home building.

"The greatest stimulus to private residential building would be the assurance that the Federal government does not intend to upset the market for housing and the removal of the building controls which introduce a strong element of confusion and uncertainty into the entire industry," he added.

"Removal of rent controls on newly constructed housing would result in the building of far more rental units than the T-E-W bill contemplates. No Federal expenditure or subsidy would be required and no new financing aid would be needed to stimulate the increased volume of rental housing.

"Brick and tile and other basic materials are being produced at a rate which will meet all building requirements this year, in addition to permitting a record quantity of new housing construction."

Architects Compete for $125,000 in Prizes For Design of St. Louis Federal Memorial

ST. LOUIS.—An architectural competition of nation-wide artistic and historic significance was announced here today with the offering of $125,000 in prizes to secure a design for a $30 million federal memorial to Thomas Jefferson and the pioneers of the western expansion of the United States. Site of the memorial is 80 acres now cleared in the downtown center of the St. Louis riverfront, an area historic as the funnel of early migration to the west.

Announcements mailed today invited all architects who are citizens of the United States to enter the competition, which is sponsored by the Jefferson National Expansion Memorial Association, a national group of interested citizens, who raised the necessary funds by private subscription. Geo. Howe, Philadelphia, internationally known Fellow of the American Institute of Architects, is directing the contest as professional adviser to the association.

Distinguished among contemporary designers for work both in this country and France, Howe summed up his views on architecture recently at one of the world forums of Princeton University's bicentennial celebration. Of college architecture in the United States, he said, according to Time Magazine, "collegiate Gothic and collegiate Georgian buildings are neither Gothic nor Georgian, but charnel houser of the mind, from which the corruption of death filters into the collective unconscious."

He has made his emphasis on originality clear to the sponsors of the present competition and indicated that his idea of a memorial is not a mausoleum and that there will be little likelihood of erecting a charnel house on the St. Louis side of the Mississippi.

The competition is open to architects, including construction engineers. Students in these fields are also eligible. Landscape architects, Painters, sculptors and laymen may take part in the contest by associating themselves with an architect. Architects are encouraged to compete as members of such associations.

The competition will be held in two stages and will require approximately a year to complete. At the end of the first stage next September, five finalists will be named to compete in the second stage. Each of these will receive $10,000.

The author, or authors, of the final winning design will receive a prize of $40,000 and be recommended to the Department of the Interior for employment in executing that design. A second prize of $20,000 and a third of $10,000, together with two honorarium awards of $2500, will be made.

BRIDGE AUTHORITY WILL ADDRESS BICB MEETING; CODE REPORT SCHEDULED

Glenn B. Woodruff, consulting engineer and former designing engineer for the San Francisco-Oakland Bay Bridge, will speak Wednesday on "Proposals for a Second Bay Crossing".

He will speak at a luncheon meeting of the Building Industry Conference Board to be held at the Commercial Club.

A recognized authority on bridge construction, he will analyze the army - navy - and the state's proposals for a new bay crossing.

The advisory committees on the San Francisco building code will present a report.

SHOP EQUIPMENT, BUILDING MATERIAL PUT ON AUCTION

The stock and equipment of two construction businesses will be sold at public auction. Machine shop equipment owned by Curle Manufacturing Corp. was put to bid on the premises at Room 200, 500 Sansome, at 10:30 a. m., Tuesday, April 8.

On April 10, at 10:30 a. m., the entire stock of Coast Building Co. will be sold on the premises at the corner of 22nd and Harrison Sts.

HOSPITAL BUILDING LAGS

WASHINGTON.—Latest Veterans' Administration reports on progress of the hospital building program tell of the inability of this program to keep up with need for bed space.

New space provided since V-J day lags far behind the veteran requests for beds, VA announced.

Congressman Hinshaw, California, Lone Engineer in House, Recommends Liberal Arts Grounding for Engineering Students

WASHINGTON.—Congressman Carl Hinshaw of California still is booming for a greater representation of engineering talent in Congress.

He is convinced, and trying to convince others, that the national legislative bodies now display far too little engineering talent in their ranks.

Himself a member of the house for nine years, Congressman Hinshaw served as president of a realty board in California before his entrance into national politics. Yes, he is a graduate engineer.

In his clarion call for more engineering ability in the Washington seats of honor, the Californian has mentioned emphatically the presence of two engineers in the senate — Ralph Flanders of Vermont, and George W. Malone of Nevada.

Perhaps he feels a bit alone in his profession on the house side but certainly he has a point in urging engineers to enter public life. He has proposed one reform in engineering studies at the college level that has gained considerable attention.

Need Liberal Arts

Speaking to members of American Society of Civil Engineers in Washington, he recommended delving away with the bachelor of science in engineering degree and bringing back the plain bachelor of science degree for engineers.

He stands for a broader education base for engineering students. His objective would be specialization in the postgraduate field.

Congressman Hinshaw explains it for himself:

"There is no other profession that I know about that gives a professional degree in an undergraduate college, and the result to

(Continued on Page 8)

DROP PLUMBING SUIT

WASHINGTON. — The Department of Justice announced that dismissal of conspiracy charges against 76 plumbing industry defendants in federal court at Cleveland "ends the case as far as we are concerned."

It was a criminal action and under the law the Justice Department has no further recourse. It was said there were no similar cases currently under prosecution in the plumbing industry field.

Pig Iron Allocation

(Continued from Page 1)

building was limited almost entirely to war housing.

Blair looks for the 1948 volume of new street construction to surpass the record of $485 million established when home building reached its all-time peak in 1927.

Street Work Up

"In fact," says Blair, "expenditures for streets probably will exceed all past records for the next five years, in view of the pent-up accumulated demand for new homes and as a result of the increasing trend toward developing outlying areas for residential purposes."

The present high cast iron pressure pipe follows pretty closely that for housing and street development. This is natural since utilities are heavy users of this type of pipe and their service demands are increased as housing is extended.

"Repair and maintenance of city streets also is expected to reach a new high level within the next year or so," Blair added. "Funds spent for this purpose during the war were insufficient to meet the needs, and a considerable portion of the money was spent on pavements which would have been replaced entirely under normal conditions.

"Most local communities will have ample funds to improve their street systems and from now on should encounter no difficulty in obtaining the materials and labor required for new construction and improving existing streets."

Expansions Limited

But in spite of this optimistic prediction, the fact remains that suburban expansions will be limited to some extent by the availability of cast iron pressure pipe, industry representatives say.

Price Trend

(Continued from Page One)

tribute to the high costs of building at present:

1. Labor inefficiency caused by irregular flow of materials, 239 to 22.

2. Delays in construction owing to inadequate supply of skilled workers, 209 to 39.

3. Excessive expenditure of time in shopping for and obtaining materials, 197 to 53.

Many general contractors reported that the greatest contributing factors to high present-day costs were the low productivity of building mechanics, the low level of skill of some craftsmen, and the failure of workers to do "a day's work for a day's pay".

Respondents in general said that they expected improvement in these retarding factors, many in the next year or two. The general view was that improvement would come only when the supply of materials and the numerical and qualitative strength of the labor force was adequate to meet the demands for construction.

The consensus, 155 to 66, was that there would be a drop in the current high rate of contract letting before the industry attains continuous recovery. The majority felt that costs would stabilize below present levels; the average expected construction cost drop was 14 per cent, computed from responses of those anticipating that stabilization would occur at levels below those of the present time.

Skilled Worker Shortage

There is a shortage of skilled craftsmen in some trades in all regions, with varying intensities, the survey shows. The most acute shortages are generally reported to be among brick masons, carpenters and plasterers, with frequently reported shortages of plumbers, electricians, especially in the East and Middle West, and lathers, except in New England and the south Atlantic states

Only 31 general contractors of all those polled indicated there were no shortages in any trades in the areas where they operate. The most intensive shortages of craftsmen were in the east central states of Ohio, Indiana, Illinois, Michigan, and Wisconsin, followed by the middle Atlantic states of New York, New Jersey and Pennsylvania, and the west north central states of Minnesota, Iowa, Missouri, North and South Dakota, Nebraska and Kansas. The least shortages were reported in the west south central region composed of Arkansas, Louisiana, Oklahoma and Texas.

Productivity of Workers

The majority of general contractors do not believe that productivity per man-hour of on-site workers will be increased in 1947 as compared with 1946, while at the same time few believe it will be less than last year. As to productivity per man-hour this year compared with last, the summary of opinion shows it will be: more, 106; less, 25; same 140. However, a majority of contractors in New England, the Pacific states and the west south central states said they expected higher productivity this year over last.

Lump-Sum Bidding

In the aggregate, the general contractors reported that 34.6 per cent of their present work, by dollar volume, is being done on a lump-sum basis, while the remainder is being done on cost-plus-fixed-fee contracts.

CALROCK ASPHALT BLOCKS
Manufactured Under 22,000 lbs. Pressure per Square Inch
Standard Size 1"x4¾x9½—in Red and Black
A highly wear-resistant dustless floor, warm under foot, for warehouses, factories, loading docks. Widely used for roofing decks.

Engineer Hinshaw

(Continued from Page One)

the budding engineer is that because he has a bachelor degree in engineering he is satisfied and we are satisfied to call him an engineer. That is one big reason for the relatively low standing of engineers in the wage systems of our county. So-called 'engineers' turned out of our colleges before the war were a dime a dozen. Actually, they were little more than educated draftsmen or surveyors.

"If the standards and the standing of the engineering profession are to be improved, the title must be withheld until it is well earned in adequate, well-rounded preparation."

Seeking an answer to his question of why more engineers are not found in public life, Hinshaw said that while the engineer is naturally congenial among his fellows because they understand and speak his language, he is shy and reticent in public contacts.

Other Fields Important

The congressman described this reticence as a product of the engineer's early training—in school and college and in his apprenticeship.

"He is raised in the cloistered precincts of the laboratory and drafting room where hang the admonition, 'Silence—Brains at Work,'" he said. "He seldom learns to speak. His thoughts are expressed in calculations made with infinite care, which blossoms in neatly drawn lines on a drafting board, and bear fruit in the form of amazing new structures. He is the current example of that ancient proverb, 'By his works ye shall know him'.

"It is well that the engineer is known by his works . . . But if that man who has those qualities so desirable in places of public leadership is to achieve his place, he must some place, somehow, learn to talk—to speak to the people in terms which they will not only understand, but in a manner which they will enjoy hearing."

Hinshaw holds to the belief that there is so much to learn in undergraduate engineering studies that the student is precluded from learning in other fields—history, philosophy and literature. This, the congressman claims, separates the student's world almost completely after the first year and rarely ever again permits him to meet the liberal arts student on common ground.

Has Civic Interest

The protagonist in this move for liberalizing engineering instruction does not believe that engineers lack interest in public affairs.

"Certainly not," he says, "because, as is quite evident by their works, engineers are engaged in creating things for the convenience and benefit of the public most of the time."

Vol. 57—No. 70 SAN FRANCISCO, THURSDAY, APRIL 10, 1947

Copyright 1946 by F. W. Dodge Corporation

PLANS and Speculations

Some sort of amalgamation of San Francisco and San Mateo counties is being studied by the real estate boards of both counties.

oOo

U. S. Engineers will conduct a hearing on an application by the Port of Redwood City to have a new steamer turning basin installed by the federal government at the junction of Redwood Creek and Boundary Slough.

oOo

Six new traffic signals will be installed along El Camino Real in Burlingame at Rosedale, Adeline Hillside, Sanchez, Oak Grove and Howard Avenues.

oOo

A freeway which will bypass Lafayette is contemplated by the state department of public works. It would parallel the existing highway but would not pass through the community.

oOo

Final plans for what probably will be known as the Susanville Memorial Park were presented to Susanville city officials and the public park committee.

oOo

Napa opponents to Putah Dam have formed a committee to formulate a definite new water program in Napa County—an alternative to the proposed high level reclamation dam on Putah Creek.

oOo

Sacramento Planning Engineer Glenn Hall has started a study to convert a city-owned gravel pit into a park.

oOo

A legislative bill has been introduced appropriating $750,000 (or more) for purchase of a new state fair site and planning of the new grounds.

oOo

P G & E will spend about $500,000 in extension of new power lines in Sierra and Nevada Counties in 1947.

oOo

Formation of an assessment district in Stockton's proposed Colonial Heights for water and sewage plants is imminent.

oOo

Mountain View's civic improvement club has outlined a four-point development program that includes extension of Pine Street as a major truck artery connecting with Arnold Industrial Highway; construction of an adequate sewage disposal system, building of a community recreation building and of a new elementary school.

oOo

Endorsing a proposed tuberculosis sanatorium in Contra Costa County is being considered by the Contra Costa Real Estate Board.

oOo

A chapter of the Napa County Builders' Exchange may be formed at St. Helena. Builders are expected to present a resolution calling for adoption of the uniform building code to the St. Helena city council next week.

oOo

Six counties: Butte, Yuba, Sutter, Yolo, Glenn and Colusa, will complete steps necessary for formation of a water development organization at a meeting next Friday in Yuba City.

#

SANTA CLARA PLUMBERS START BID DEPOSITORY SYSTEM ON $500 JOBS

SAN JOSE. — The Santa Clara County Master Plumbers' Association, Inc., has established a bid depository system in Santa Clara County covering plumbing, heating, piping, air conditioning, utility work and repair jobs costing $500 or more.

The service will begin April 15. Offices of the Santa Clara County Master Plumbers' Association, Inc. are located at 516 Bascom Avenue, San Jose.

'Unions' Flagrant Demands May Kill Construction Mart'

WASHINGTON.—The National Association of Home Builders this week came out into the open on the construction labor issue with publication of its Washington Letter.

"If there was ever a time for organized labor in the building trades to stop, look and listen, that time is certainly today," NAHB warned.

Protecting this statement, the letter told of the growing demands for increased wages in the construction industry.

The association has been advised, it said, that heavy wage increases are being demanded in city after city. Serious strikes are starting and more are in the offing.

The home builders were told that although present wage levels exceed anything in history, A. F. of L. leaders "seem determined to take full advantage of the unprecedented demand for construction of all types and hope to force further wage increases at this time."

Jurisdictional Issues

In some areas, the publication added, these demands would add $1,000 to $2,000 to the cost of veterans' homes.

"Coupled with such demands, tens of millions of dollars of both residential and commercial projects are being abandoned daily," NAHB said. "Excepting for a limited class of commercial projects, the construction industry, already being priced out of the market, simply cannot stand higher labor costs."

Over the name of Frank W. Cortright, executive vice-president, the letter points out the condition would be more tolerable if labor bargained for increases on the basis of growing productivity and a full day's work.

But this is not the case, according to the home builders' executive. Lathers, he says, are not offering to return to pre-war levels of 55 bundles applied daily instead of 35. Bricklayers are not offering to lay 800 to 1,000 bricks daily as against 400 to 500.

"Make-work practices are not being modified on jurisdictional disputes being sensibly resolved," the letter adds.

Labor-Saving Devices

"There are no offers to permit increased use of labor-saving devices which would result in lower costs, an enlarged market, and more work for labor.

"All in all, labor leaders seem determined to force even higher wages or extended strikes and thus destroy the greatest construction market in the history of this country."

#

ORDER CONSTRUCTION ON WASHINGTON JOB

Construction of discharge pipelines and outlet structures for 16 pumping plants on the Roza Division of the Yakima project in Washington, has been ordered by the bureau of reclamation, Secretary of the Interior J. A. Krug announced today. The contract was awarded to Schoumann & Johnson, Seattle, Wash., on their low bid of $773,131.

#

PEAK IN SEPTEMBER

WASHINGTON. — The Labor Information Bulletin for March, issued by the Labor Department in Washington, predicts the peak of the 1947 construction program will be reached "by September" and that more than 2.5 million onsite workers will be needed in new construction.

About a million new permanent dwelling units will be started and 950,000 will be completed during 1947, the bulletin states.

GROOVER AND I

COMMUNICATION

Something is wrong. On one hand we insist upon being International Bursar and Almoner to the entire world, while on the other hand—

it is too easy for some person to toss a monkey-wrench into our domestic economic machine.

☆ ☆ ☆

Sooner or later we'll bumble into a situation sufficiently severe to leave us with the realization no individual nor group can justify an advantage which is gained at the expense of the entire people.

☆ ☆ ☆

In connection with the Boston Policemens' strike, it was stated: "No person has a right to strike against the Public Interest." You may not agree, but—

Oregon, Montana REA Loans Told

WASHINGTON.—Rural electrification loans in Oregon and Montana were announced this week by the REA administrator. They are part of loan allocations totaling $5,355,000 to 23 rural electric systems in 14 states.

The locations, recipient cooperatives and amount of loan:

Oregon, Lane County: Blachly-Lane County Cooperative Association, Blachly, $215,000 including $89,800 for previously approved construction and $31,320 for system improvements.

Oregon, Deschutes County: Central Electric Cooperative Inc., Redmond, $75,000 including 33,500 for previously approved construction.

Montana, Ravalli County: Ravalli County Electric Cooperative, Inc., Corvallis, $73,000 including $38,000 for previously approved construction and $1,500 for system improvements.

Utah, Iron County: Escalante Valley Electric Association, Inc., Modena, $116,000.

#

FIRE TOLL APPALLING, DECLARE STATISTICIANS

WASHINGTON. — Committees of experts preparing data for the President's Conference on Fire Prevention are faced with the fact that America's fire losses for 1947 are rising. Losses for the first two months of this year already have exceeded last year's losses for the same period by more than 20 per cent.

Losses so far this year totalled $121,939,000. Losses for the 12 months ended February 28, 1947, were $581,347,000, the greatest this country has ever known. This exceeded by nearly $20 million the highest annual fire waste the nation has ever experienced, $561,980,000.

#

RR PURCHASES LESS

WASHINGTON. — The Association of American Railroads disclosed today that expenditures for iron and steel products of all kinds during 1946 amounted to $520,546,000, compared with $520,876,000 in 1945.

The railroads spent $52,678,000 for purchases of lumber and all other forest products. This was a decrease of $296,000 below the preceding year.

Bureau of Community Facilities Plans and Specs Loan Program Up for Renewal by July

WASHINGTON. — (Exclusive). — Unless somebody takes action soon to legislate for revival of the advance planning program administered by the bureau of community facilities of the federal works agency, that important program of project plan preparation is going to be through. Time is running out. The program expires June 30.

Loans to municipalities covering the cost of preparation of plans and specifications for civic improvements have been handled by this bureau since the setup was authorized under the War Mobilization and Reconversion Act (Title V) of 1944.

Redistribute Funds

To date, $54,319,000 of the $65 million authorized by congress has been advanced to communities financing plan preparations. This work has covered specifications for streets and highways, schools, sewers, local public buildings and many other civic developments. In all, the advantage of these plan cost advancements to local governments has extended to 6,563 locations.

But no bill has been introduced on Capitol Hill to continue this loan service to communities beyond the June 30 deadline.

There is one measure now in congress, however, which would let the program down easy. It is S. 1008, introduced by Senator Claude Pepper.

This bill would authorize BCF to take unused funds from states with balances still on hand and redistribute these to other states whose planning allocations have been exhausted. Such a practice is not permitted under the Title V provision of the War Mobilization and Reconversion Act of 1944. By that legislation, all unused portions of the planning funds allocated to the various states would have to be returned to the U. S. Treasury on June 30.

Senator Pepper's bill, if passed, will continue the program only briefly. Largest single source of planning funds, under such a legislative arrangement, would be New York since there $651,000 remains available for financing preparation of plans and specifications. The distribution of funds under the WMR Act largely was placed on a population basis. This gave loan shares to New York, California and Illinois. Ninety per cent of the total $65 million was distributed by the population pattern. This amounted to $62,917,000. The other 10 per cent, $2,083,000, was apportioned at the discretion of the federal works administrator, Major General Philip B. Fleming.

That system, and New York's own planning program, account for the large unexpended balance there.

State Has $39,120

As of March 30, latest date for which fund figures are available, California has $39,120 left.

Key figures in any attempt that might be made to revive the BCF planning cost program are Senator Revercomb (r., W. Va.) and Congressman Dondero (r., Mich.). These men are chairmen respectively, of the senate and house public works committees.

Rep. Dondero is understood to have made no comment on his convictions regarding restitution of the planning advances. Sen. Revercomb, on the other hand, said on February 20 that "we should continue to appropriate funds against the future." His reference hit the supporting beam of the whole BCF program—a system of storing up a large volume of planned public work against a future time when there might not be so many jobs available and the construction planned now could take up the slack of a depression period.

BCF figures that planning costs run approximately three per cent of construction outlays. This indicates that a tremendous backlog of public works projects has already been planned and blueprinted. Discontinuance of the advance planning June 30 would halt the accumulation of these shelved plans and specifications.

Site Selection for Second Bay Span Is 'Toughest Problem'

Building the next San Francisco Bay bridge will be a cinch compared to solving the question of where to put it, according to Glenn B. Woodruff, an outstanding bridge authority.

The San Francisco expert spoke before about thirty members of the Building Industry Conference Board, meeting for lunch at the Commercial Club. He outlined briefly the plans drawn up by the joint army-navy board and the California Toll Bridge Authority.

Importance of analyzing traffic problems of the whole Bay Area was emphasized as preliminary in making the decision.

The citizens' committee recently organized through the Bay Area Council was described by Woodruff as "the body best equipped to do this." The committee will hold hearings and conduct an independent study shortly.

"It is to be hoped that they will come up with an answer upon which everybody can agree," commented Woodruff, "so that construction of the facility can proceed at the earliest possible date."

The engineer praised members of the citizens' committee as alert, civic-minded men, representative of the entire area.

"I do not believe a better selection could have been made," he said.

A report on the proposed San Francisco building code was to have been delivered by William H. Popert, chairman of the industry advisory committee, but was postponed.

#

Builders' Troubles Ease Up—Tyler

The time required to complete new homes is being shortened by the greater flow of materials from factory to building site, Tyler S. Rogers, president of Producers' Council, national organization of building products manufacturers, stated Wednesday.

"Whereas seven to nine months or more were required to complete the average dwelling until last year, the time has been shortened to four and five months in many instances," Rogers said.

"A gradual increase in the productivity of labor, as well as the increased flow of materials, has contributed to the shorter building time."

#

SKANDERUP PRESIDENT PENINSULA EXCHANGE

SAN MATEO—George Skanderup, Redwood City, was named president of the Peninsula Builders' Exchange, it was announced today. Oscar W. Person is vice-president.

Other officers are Henry Park, treasurer; Joseph Nash, secretary; and Herman Holsher, director-at-large.

Herman G. Nelson, Exchange manager, announced that a high jinx event will be held soon for all members of the Peninsula building fraternity.

#

Plans were disclosed recently for a new baseball park in Alisal. It will be erected on a tract of land donated to Salinas County some time ago.

NEW Improved SCOOPMOBILE Five NEW IMPROVEMENTS!

1 NEW "Shovel Action" BUCKET
A full load . . . plus! No more ramming into stock pile. Simply ease SCOOPMOBILE into pile and lift bucket with a full load . . . easier on the machine . . . faster, fuller!

2 HAND LEVER CONTROL
Two hand levers at operator's fingertips give positive, flexible control of bucket action. No more trip rope and "shock dumping" from unhandy elevations.

3 DISCHARGE ACTION
Full loads can now be discharged from very top of rack. (Up to 8 ft.) Partial loads can be discharged by closing bucket at any height while pouring.

4 NEW COUNTER BALANCE
The new SCOOPMOBILE keeps its feet on the ground! New counter balance (optional) is easy to attach to rear of Scoopmobile to accommodate heavy loads at top of rack.

5 CONTROLLED DIGGING ACTION
Improved double sheaves and mechanical improvements give entirely new control of digging angle. New design of bucket means NO spillage over rough terrain.

EDUCATORS TO STUDY COLUMBIA BASIN JOB

COULEE DAM, Wash.—Educators from all parts of the United States will visit the Columbia Basin Project of eastern Washington this summer to witness construction activities on the million-acre development and to study geological wonders in the famed Grand Coulee and other parts of the Big Bend area. The tour is part of a study course arranged by the Eastern Washington College of Education, Cheney, Wash.

Known as "The Columbia Basin Workshop", the course will include visits to the Grand Coulee Dam, the Grand Coulee and Dry Falls, and the Potholes Dam, which will be the fourth longest in the Nation. Instructors also will visit the bureau of reclamation development farm near Moses Lake, study settlement problems, and hear talks by bureau of reclamation officials.

The tour of the Basin, arranged in cooperation with the bureau of reclamation, will be conducted by Dr. Otis F. Freeman and Marion H. Surbeck of the Eastern Washington College of Education.

#

DOMESTIC WATER SYSTEM SHIPMENTS GAINING

WASHINGTON.—February factory shipments of domestic water systems totaled 64,455 units valued at $4.7 million, according to a report released today by the Bureau of the Census. The number shipped in February was 8 per cent higher than the number for January, and 72 per cent higher than the number for February 1946.

Cost of W-E-T Bill Program Exhorbitant, Local Builder Protests

The urban public housing program proposed in the W-E-T housing bill will cost $4,752,000,000 in rental subsidies—twelve times the proposed loans to Greece and Turkey—but will help pay rent for only 500,000 city families, Philip F. Heraty, President of the Associated Home Builders of Alameda County, Inc., pointed out today.

"The number of people to be benefited by this bill is inconsequential compared to the total volume of new housing that we need to improve housing for all the people and to eliminate slums," Heraty said. "Yet, the cost, for this small number, is staggering.

Demonstrated Ability

"Five hundred thousand units of public housing are not going to solve anything. This program can only have one effect. It will call a halt on the great progress home builders have made in reaching down into the moderate and low cost markets. It will take us down a blind alley and leave our real problems unsolved.

"It has only been in the last ten years that private builders have had the tools of financing by which they could get into lower cost housing. They proved they could use them. Before the war interrupted, FHA figures show, they were building for people with an average income of $2,250. That is low cost housing. By 1941, builders were producing at the rate of over 600,000 houses a year."

The country will be tossing away its chances for a demonstration of what private enterprise can do under postwar conditions in providing a big volume of housing at low cost if the W-E-T bill is permitted to become law, Heraty said.

oOo

Kills Off Enterprise

"No business man can compete with government subsidy and the W-E-T bill's public housing program coupled with its other features for programming and reimplementation of the building industry will kill off this country's opportunities to show what can be done in housing by private enterprise methods," he said.

West Coast Building Leads the Nation; 40,000 Permits Out

Housing permits for 120,758 dwelling units were issued from December 24, 1946, the date when the permit system replaced the HH-priority system, through Feb. 28, 1947, the Office of the Housing Expediter announced today.

Of the 120,758 new units authorized, about 18 per cent were to be built for owner occupancy by veterans, non-veterans and farmers. And of the remainder, 69.8 per cent were to be built for sale to veterans and 12.3 per cent for rent to veterans.

The FHA district office in New York City reported that 51.4 per cent of all permits issued there were for rental units; San Diego, 26.1 per cent, and Seattle, 24.6 per cent.

Pacific Coast states led all other regions in the total number of units for which permits—nearly 40,000—were granted. More than three-quarters of these were approved by the Los Angeles and San Francisco FHA district offices.

GROOVER AND I

AMBASSADOR TO INDIA

On March 18th this Column queried as follows: "While a year England is withdrawing from India—are we supposed to rush in there and pick up the White Man's Burden?"

☆ ☆ ☆

In this day of critical paper shortage why is the Editor so foolish as to allow me to use good newsprint on questions, the answers to which are in the bag?

oOo

☆ ☆ ☆

Dr. Henry F. Grady is an esteemed Californian who has proven he has diplomatic and executive capabilities superior to some of the men who have received free rent at 1660 Pennsylvania Avenue.

☆ ☆ ☆

Dr. Grady is now packing up his Lares and Penates, preparatory to establishing his residence in India, where he will be the first United States Ambassador to that country.

☆ ☆ ☆

England will withdra wfrom India by June 1948. Dr. Grady will have a year in which to become accustomed to his role as a Burden picker-upper.

☆ ☆ ☆

England will withdraw from Inpaid debt to India of many hundred million pounds sterling—the exact total is unimportant, but there is a question of dipomatic protocol:

☆ ☆ ☆

Should our Ambassador pick up the dinner check?

Large Construction Jobs Cut From City Budget by Lapham

Mayor Lapham cut more than three and a half million dollars from the proposed municipal budget this week, and many of the deletions fell in the construction category.

Development of McLaren Park was put off indefinitely with elimination of a $275,000 funds. Other park department requests eliminated were funds for a Golden Gate Park warehouse, Harding Park irrigation system, developments for Sunset, Sutro and Buena Vista Heights, Fleishhacker playgrounds and a refreshment center for Fleishhacker zoo.

A $450,000 item for rehabilitating Kezar stadium's seats, press box and convenience stations was ruled out, along with developments at Yacht Harbor, a new Golden Gate Park administration building and an outdoor rifle range.

Other items pared from the list: $25,000 for opera house repairs; $248,181 for a new deYoung Museum elevator, roof repairs and ventilating system remodeling; construction at Legion of Honor, $80,700—$10,000 for new parking area; $22,000 for replacement of cornices; new buildings at Log Cabin Ranch, $76,414; Noe Valley health center, $29,015.

#

EQUIPMENT DEALERS TO MEET ON MONDAY

Construction Equipment Distributors monthly meeting will be held Monday, at 6:30 p. m., at the St. Julian Cafe, Secretary A. E. Mason announced Friday.

Dr. L. T. Pockman, sone of President L. T. Pockman, will speak on "JetPropulsion". A sound movie, "Radar and Sonar", will be presented by a representative of Pacific Telephone & Telegraph Co.

Less Than 10% of Pig Iron Certified To Soil Pipe Makers'

WASHINGTON—(Exclusive)—The office of Housing Expediter Frank R. Creedon today confirmed the report that he is allocating 36,300 tons of foundry and malleable grade pig iron during April for exclusive use in the manufacture of cast iron soil pipe.

10% to Soil Pipe

While certain trades feel that this allocation will take considerable amounts of the product away from them, OHE explained that it really represents a very small proportion of total anticipated production.

Government looks forward to an output in these grades during April of between 400,000 and 450,000 tons. A total overall April production, including basic grades that go into steel making, of 4,500,000 tons to 5 million tons is expected.

OHE makes a point of the fact that the amount of pig iron certified to the cast iron soil pipe producers is under 10 per cent of estimated foundry and malleable grade output.

Change Slight

In pre-war years housing items consumed 32 per cent of pig iron in these grades, OHE said. And last year less than 35 per cent went into housing items by actual count.

Broadening its argument to include the total pig iron production in all grades, Creedon's office said that before the war—in 1929—the steel industry was putting 15 per cent of its mill turnover into foundry and malleable grades. At present, according to OHE, the industry makes 10 per cent of its output in these grades. Thus, a change in allocation of foundry and malleable iron reflects only slightly in the overall steel production figure.

Few Metal Allocations

Roughly, 10 per cent in the stipulated grades for cast iron soil pipe production would be only one per cent of overall output.

In March of this year between 150,000 tons and 160,000 tons was allocated to housing items by CPA. This makes the drop in April to 36,300 tons look like a substantial one.

Allcations for cast iron soil pipe are the only ones remaining in the metals field since expiration of the War Powers Act April 1.

LOS ANGELES AND BAY AREA WAGE VARIANCE SHOWN IN ANALYSIS

WASHINGTON.—A wage analysis showing the union wage scales for selected building trades in 75 large cities highlighted the gap between wages paid in Los Angeles and in San Francisco.

Bricklayers in the southern city receive $2.00, and in San Francisco, $2.25. Carpenters in Los Angeles get $1.65, compared to San Franciscans' $1.75. Wages paid other crafts in the respective cities are: electricians, $2.00 (L.A.) and $2.00 (S. F.); painters, $1.50 and $1.75; plasterers, $2.00 and $2.25; plumbers, $2.00 and $2.00; building laborers, $1.15 and $1.25.

Wage scales in four eastern cities exceeded San Francisco's slightly. They are Newark, N. J., New York City, Philadelphia, and St. Louis. The only other city whose scale equaled San Francisco's was Houston, Texas.

DISCUSS STATE'S WAR SURPLUS RESALE PLAN

Operation of the state's new war surplus housing program under which barracks and other buildings will be sold to veterans for home construction will be explained at a conference of veterans' service representatives in Room 214, Veterans' War Memorial Building, this Friday, at 10 a. m.

Copper, Steel Probe Looms in Congress Over 4c Import Tax

WASHINGTON—Two congressional inquiries of interest to contractors loomed today as legislators wrestled with production and distribution problems in copper and steel.

On the house side Representative Crawford's proposal to investigate thoroughly all phases of the copper industry in an effort to determine the extent to which Anaconda and Kennicott might be monopolizing the trade, rested in the rules committee pending further action.

The two largest copper-producing firms are said to be withholding imports of raw copper to the United States until congress passes the duty import bill which would suspend the tax of four cents per pound on incoming copper. Anaconda and Kennicott, it was reported, have assured they would import 25,000 tons a month with suspension of the tax charge. This is thought to be enough to satisfy the automobile industry and other users, including the construction trades.

Most of these imports—virtually all of them—will come from Chile as soon as the duty is suspended. After the first of next year a sizable quantity of the near-precious metal will come also from Canadian mines.

As the import suspension bill is now riding through committee, the principal contention is whether the period of suspension should be for 18 months or two years. The western copper producers stand strongly opposed to the longer period until assured of a premium price payment plan in another bill which has just cleared a house subcommittee. This is the Russell measure, which was to have been sent to the full House Lands committee yesterday.

With a premium price payment plan which would compensate them for excessive production costs, the western interests no longer fear the cheaper copper imported from Chile or Canada would drive them out of business.

Chairman Kenneth S. Wherry (r., Nebraska) of the senate small business committee, yesterday appointed a subcommittee to investigate the steel problems of small steel users, manufacturers, and fabricators.

Senator Edward Martin (Pa.), was named chairman of the five-man subcommittee. Other members are Senators Harry P. Cain (Washington), Irving M. Ives (New York), Allen J. Ellender (Louisiana), and Spessard L. Holland (Florida).

Senator Wherry said the group will look into complaints about steel distribution and supply.

AISC CHIEF ENGINEER VISITS SAN FRANCISCO

Colonel Jack Singleton, chief engineer of the American Institute of Steel Construction, with headquarters in New York City, was in San Francisco this week conferring with architects and engineers.

Colonel Singleton spoke before a joint meeting of the Sacramento section of the American Society of Civil Engineers and the newly-formed Structural Engineers Association of Central California. His topic was "Recent Developments in Structural Engineering Design."

He predicted many improvements in fabricated structural steel in both design and construction, "which will be of material help to engineers and contractors".

PRACTICAL
and ECONOMICAL
for modern transportation!
THE PROBLEM of obtaining maximum overhead clearance plus the desired coverage for awning protection of transportation equipment has been successfully and economically solved in an unique truss designed by ARISTON'S engineering staff. The utilization of the uplift effect of the cantilever trusses permits a reduction in the depth and weight of the center suspended truss, producing a more pleasing design that is both practical and economical. Write or telephone for complete information.

ETS-HOKIN & GALVAN

"When We're Working in Close Quarters
We TRAXCAVATE"

says Mr. J. E. Nelson of the firm of Johnson & Nelson, Marin County Contractors. "Our IT4 TRAXCAVATOR is the ONLY RIG for close-in work around foundations and concrete forms, and that's only one of the many jobs it does for us. It's one machine that keeps busy."

TRAXCAVATE for PROFIT

All over the country contractors are calling the Traxcavator "the busiest machine on the job," and here's why: They use it for land-clearing and for leveling; they use it for excavating and for truck loading; they use it for backfilling and for cleanup work. From the time the job is started 'til the earthwork is completed the Traxcavator is busy. That spells *profit* for the contractor because the profitable machine is the one that keeps busy. That's why we say

LOS ANGELES, Calif., Los Angeles Co.—The Metropolitan Water District of Southern California, 306 W. 3rd St., Los Angeles, Calif., received bids April 4 for furnishing sluice gates and valves for the upper feeder water softening and filtration plant of the Colorado River Aqueduct.
The bids were taken as follows:
(1) sluice gates: 12 54-in., 2 60-in. and 12 12-in. hydraulically operated; 4 24-in. and 20 8-in. manually operated;
(2) hydraulically operated gate valves: 12 36-in., 12 30-in., 12 24-in., 24 20-in., 14 16-in., 24 14-in., 5 8-in., 3 6-in. and 9 3-in.;
(3) manually operated gate valves: 2 36-in., 2 18-in. and 4 16-in.;
(4) manually operated mud valves: 2 12-in. and 5 6-in.;
(5) hydraulically operated btterfly valve: 1 5x10.5-ft.;
(6) manually operated flap valves: 12 18-in.;
(7) combination of schedules.
The bids were:
Fluer & Stowell Co., f.o.b. Milwaukee, Wis., Sch. 1, $56,904.50.
Chapman Valve Manufacturing Co., f.o.b. Indiana Road, Mass., Sch. 1, $77,415; Sch. 2, $109,323; Sch. 3, $6426; Sch. 4, $633; Sch. 6, $8804.
Westinghouse Electric Corp., f.o.b. Sunnyvale, Calif., Sch. 5, $5157.
Consolidated Steel Corp., f.o.b. Los Angeles, Sch. 5, $10,000.

4/8/47 43
Stilling Wells and Piping
Low and Only Bidders
DAVIS DAM PROJECT, Arizona-Nevada and MISSOURI BASIN PROJECT.—The following submitted bids April 4 to the U. S. Bureau of Reclamation, Customs House, Denver, Colo., under Spec. 1723 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Loudon, Ariz.; Oral, S. D., and Casper, Wyo., at the option of the bidder, wrought iron stilling wells and piping and accesories for Davis power plant, Davis Dam Project, Arizona-Nevada; for Angosturo Dam, Angostura Unit, Missouri Basin Project, South Dakota, and Keyhole Green Dam, Kortes Unit, Missouri Basin Project, Wyoming:
Thompson Pipe & Steel Co., Denver, Colo., Item 1, $2479; 10,260 lbs.; item 2, $2038; 5911 lbs.; item 3, $2505; 11,457 lbs.; ship all items 240 days; f.o.b. Denver; total bid, $7337; terms net. No equalization offered.
California Piping & Engineering Co., Compton, Calif., Item 1, $33,823; 12,450 lbs.; Item 2, $2365; 6250 lbs.; item 3, $4670; 14,100 lbs.; ship all items 100 days; f.o.b. Compton; terms net.

4/8/47 43
Bulkhead Gates and Frames
Low and Only Bidders
MISSOURI BASIN PROJECT, Wyoming.—The following submitted bids April 3 to the U. S. Bureau of Reclamation, Customs House, Denver, Colo., under Spec. 1722 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Casper, Wyo., one 11.62-ft. by 11.62-ft. bulkhead gate, not including rubber seals, and three 11.62-ft. by 11.62-ft. bulkhead gate frames and storage supports fo rthe main units at Kortes Dam, Kortes Unit, Missouri Basin Project, Wyoming. The installation will be made by the government:
American Bridge Co., Denver, Colo., item 1, $6639; ship 330 days; 24,500 lbs.; item 2, $17,204; ship 300 days; 70,800 lbs.; both items f.o.b. Ambridge, Pa.; terms net. No equalization offered.
Newport News Shipbuilding & Drydock Co., Newport News, Va., item 1, $7200; ship 240 days; 27,000 lbs.; item 2, $21,300; ship 210 days; 72,000 lbs.; ship both items f.o.b. Newport News, Va.; terms net. Combination bid, $26,300. No equalization offered.

4/8/47 43
Control Board Extension
Contract Awarded
RIO GRANDE PROJECT, New Mexico-Texas.—Wolff & Mann Manufacturing Co., Baltimore, Md., was awarded contract by the U. S. Bureau of Reclamation, Customs House, Denver, Colo., under Spec. 1662 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Engle, N. M., one (1) extension to present main control and relay board, consisting of front vertical section, rear vertical section, top cover plate and channel mounting base; two (2) rows of terminal cabinets for extension to the present terminal cabinets located under the main control board; one installation in Elephant Butte power plant, Rio Grande Project, New Mexico-Texas. The apparatus will be installed by the government.

4/8/47 43
Flap Gates
Low and Only Bidders
CENTRAL VALLEY PROJECT, California.—The following submitted bids April 2 to the United States Bureau of Reclamation, Customs House, Denver, Colo., under Spec. 1713 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Concord, Calif., flap gates and piping accessories for Ygnacio and Clayton canals pumping plants, Central Valley Project, California. The materials will be installed by the government:
Berkeley Steel Construction Co., Inc., Berkeley, Calif., item 1, $540; item 2, $550; total, $1190; ship 120 days; 2400 lbs.; f.o.b. Berkeley; terms net. No equalization offered.
Stearns-Rogers Manufacturing Co., Denver, Colo., item 1, $880; item 2, $910; total, $1770; ship 120 days; 2275 lbs.; f.o.b. Denver; terms net. No equalization offered.
Consolidated Steel Corp., Los Angeles, Calif., item 1, $1161; item 2, $1194; total, $2355; ship 120 days; 2035 lbs.; f.o.b. Los Angeles; terms net. No equalization offered.
Willamette Iron & Steel Co., f.o.b. Portland, Ore., $2250 lbs.; total bid, $4190.75; net.
Leavenworth Steel, Inc., Kansas City, Kan., f.o.b. Leavenworth, 1500 lbs.; total bid, $3466; net. No equalization offered.
Lacy Manufacturing Co., f.o.b. Los Angeles, Calif., 2800 lbs.; total bid, $2570; net. No equalization offered.

4/7/47 43
Synchronous Motors
Low Bidders
CENTRAL VALLEY PROJECT, California.—The following submitted three low bids April 1 to the U. S. Bureau of Reclamation, Customs House, Denver, Colo., under Spec. 1699 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Calif., six (6) 22,500-hp., 13,600-volt, 3-phase, 60-cycle, 0.95 leading power factor, vertical-shaft, 180-rpm. synchronous motors for the Delta-Mendota pumping plant, Central Valley Project, California. The apparatus will be installed by the government:
Allis-Chalmers Manufacturing Co., Denver, Colo., $1,598,900; $537 each lin. ft. for increase or decrease; ship 800, 825, 890, 920 and 980 days; 2,500,000 lbs.; f.o.b. Milwaukee; $50 engineer and $35 mechanic; terms net. No equalization offered. 30% price clause.
Westinghouse Electric Corp., East Pittsburgh, Pa., $1,668,580; $500 per lin. ft. increase or decrease; ship 900, 960, 1005, 1035, 1065 and 1095 days; 2,320,000 lbs.; f.o.b. East Pittsburgh; $56 engineer and $41 mechanic; terms net. Equalization offered. 30% price clause.
General Electric Co., Denver, Colo., $1,717,602; $500 per lin. ft. for increase or decrease; ship 720, 762, 804, 846, 888 and 930 days; 2,700,000 lbs., Schenectedy, N. Y.; f.o.b. destination; $50 engineer and $35 mechanic; terms net. Will equalize. 30% price clause.

4/7/47 43
Outlet Pipes
Low Bidders
COLORADO - BIG THOMPSON PROJECT, Colorado.—The following submitted three low bids April 1 to the U. S. Bureau of Reclamation, Customs House, Denver, Colo., under Spec. 1710 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Fort Collins, Colo., two 72-inch outlet pipes with expansion joints, manholes, supports, bends, flanges and flange bolts for installation in the outlet works at Horsetooth Dam, Colorado-Big Thompson Project, Colorado. The outlet pipes will be installed by the government:
Thompson Pipe & Steel Co., Denver, Colo., $55,270; ship 180 days; 465,000 lbs.; f.o.b. Denver; terms net. No equalization offered.
Darby Corp., Kansas City, Kan., $55,944; ship 360 days; 430,000 lbs.; f.o.b. Kansas City; terms net. No equalization offered.
Western Pipe & Steel Co. of California, Los Angeles, Calif., $61,325; ship 180 days; 455,000 lbs.; f.o.b. Los Angeles; terms net. No equalization offered.

4/7/47 43
Transporting Portland Cement
Low and Only Bidders
COLORADO - BIG THOMPSON PROJECT, Colorado.—The following submitted bids March 31 to the U. S. Bureau of Reclamation, Customs House, Denver, Colo., under Inv. F-46,411-A for transporting 15,040,000 lbs. bulk portland cement from (1) Laramie, Wyo.; (2) from Boettcher, Colo., and (3) from Loveland, Colo., to east portal of Ramshorn tunnel and/or south portal of Prospect tunnel, approximately three miles south of Estes Park, Colo., and unloading the cement into ground-level hopper:
M. L. Haag, Akron, Colo., item 1, 40c; item 2, 16½c; no bid on item 3; guaranteed delivery 475 tons weekly; terms 10% 30 days.
G. L. Griffin, Fort Collins, Colo., item 2, $0.1907; guaranteed delivery 475 tons weekly; terms 1% 20 days.

4/7/47 43
Dump Truck Rental
Contract Awarded
HUMBOLDT COUNTY, Calif.—E. H. Riley, Box 42, Project City, Calif., at $3.7775 per hour, submitted low bid and was awarded contract April 2 by the State Division of Highways. G. F. Hellesoe, district engineer, 546 W. Wabash Ave., Eureka, Calif., for the rental of five 4½ x 6½-cu. yd. dump trucks for approximately 500 hours' use in Humboldt County.
J. & K. Trucking Co., Los Angeles, Calif., at $4.15 per hour, submitted only other bid.

4/7/47 43
Contract Awarded
Transformers
PORT PECK PROJECT, Montana. —Standard Transformer Co., Warren, Ohio, at $11,200.35 for Sch. No. 1, using item 1A and Sch. No. 8, was awarded contract by the Bureau of Reclamation, purchasing agent, U. S. Customs House, Denver, Colo., under Sch. 1634 for four oil-immersed, self-cooled, outdoor type transformers, each with single pole, distribution type lightning arresters; one oil-immersed, self-cooled outdoor type transformer with standard taps and three oil-immersed, self-cooled outdoor type potential transformers for the Wibaux Station.

4/7/47 43
Air Compressor
Contract Awarded
SAN FRANCISCO, Calif.—Edward R. Bacon Co., 17th and Folsom Sts., San Francisco, Calif., at $2720, net 30 days, 7 days' delivery, awarded contract by Purchaser of Supplies M. H. Gerry, 270 City Hall, San Francisco, Calif., under bid No. 3869 for furnishing and delivering one 105-cu. ft. air compressor.

4/7/47 43
Metering Unit
Low and Only Bidders
FORT PECK, Montana.—The following submitted bids April 2 to the U. S. Bureau of Reclamation, Customs House, Denver, Colo., under Spec. 1704 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Whately, Mont., one (1) 69,000-volt, 60-cycle, 3-phase, oil-immersed, self-cooled, outdoor type metering unit with three single-pole, outdoor, line type lightning arresters for 3-phase, 69,000-volt, ungrounded-neutral circuit, case-mounted, for the metering station at Montana Power Co.'s tap to the 54-kv. Fort Peck-Whately line, Fort Peck Project, Montana. The apparatus will be installed by the government:
Westinghouse Electric Corp., Denver, Colo., $4662; $48 ratio and phase angle test; $150 for impulse test; ship 265 days; 10,000 lbs.; f.o.b. E. Pittsburgh; terms net. Will equalize; 30% price clause.
General Electric Co., Denver, Colo., $6932.50; ship 700 days; 8650 lbs. from Pittsfield, Mass.; f.o.b. destination; terms net. Will equalize; 30% price clause.

4/7/47 43
Coupling Capacitors—Bids Wanted
MISSOURI BASIN PROJECT, Nebraska.—Until May 2, 2 p. m. bids will be received by the U. S. Bureau of Reclamation, Customhouse, Denver, Colo., under Spec. 1771 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Gering, Nebraska, three coupling capacitors with potential devices, 10 carrier-current coupling capacitors, and 10 single-frequency 400-ampere, carrier-current line traps, for the Gering, Bridgeport, and Sidney substations, Power Transmission Lines Unit, Missouri Basin Project. The apparatus will be installed by the Government. No charge for copies of the specifications to prospective bidders; to others $0.50, not returnable

4/7/47 43
Hollow Metal Doors
Low and Only Bidders
CENTRAL VALLEY PROJECT, California.—The following submitted bids March 27 to the U. S. Bureau of Reclamation, Customs House, Denver, Colo., under Spec. 1668 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at

BID OPENING SCHEDULE

BUILDING PROJECTS

Bid Opening Date	Project	Noted In Issue
4-11— 2:00 P.M.	—Painting, Misc. Repairs Sandpoint, Idaho	3-10
4-11—	—Additional Housing, Los Alamos, N. M.	4- 3
4-11— 2:00 P.M.	—Community Center Development, Los Alamos, N. M.	4- 3
4-14— 2:00 P.M.	—Steam Plant Alterations Longview, Wash.	3-19
4-14—10:00 A.M.	—Indigents' Barracks Salinas	3-21
4-14—	—School Addition Reedley	3-28
4-14— 4:00 P.M.	—City Hall Newport Beach	3-26
4-14— 2:00 P.M.	—Insecticide Laboratory Building and Insecticide Compounding Bldg., Riverside	3-31
4-14— 8:00 P.M.	—Equipment Shed Richmond	4- 7
4-14— 7:30 P.M.	—Schools (Foundations and Reconditi0n), Hanford	4- 9
4-14— 8:00 P.M.	—Bus Barn (Alter Butler Bldg.), Paso Robles	4- 8
4-14— 1:00 P.M.	—Firehouse Sacramento	4-10
4-14— 2:00 P.M.	—Shell Housing, Etc. White Sands, N. M.	4-10
4-15— 8:00 P.M.	—School (Addition), Near Grass Valley	4- 8
4-15— 8:00 P.M.	—Elementary School Oxnard	3-26
4-15— 2:00 P.M.	—Officers' Quarters and Utilities, Sonoma County	3-26
4-15— 2:00 P.M.	—Pile Foundations (New Juto Mill), San Quentin	3-26
4-15— 2:00 P.M.	—Library Bldg. Addn. Los Angeles	4- 2
4-15— 8:00 P.M.	—School Addn. Near Grass Valley	4- 3
4-15— 2:00 P.M.	—Officers' Quarters and Utilities Near Merced	3-24
4-15— 2:00 P.M.	—Public Works Building Addition Sacramento	3-18
4-16— 2:00 P.M.	—Emergency Housing, Stockton	3-28
4-16—10:00 A.M.	—Garages Davis Dam Project, Ariz.-Nev.	3-26
4-16— 8:00 P.M.	—Classroom Buildings Norwalk	4- 1
4-16— 8:00 P.M.	—School Additions Buena Park	4- 7
4-17— 2:00 P.M.	—Primary School Clarkston, Wash.	4-10
4-17— 8:00 P.M.	—Cafeteria Building Porterville	4- 7
4-17—11:00 A.M.	—Naval Reserve Armory Everett, Wash.	4- 2
4-17—11:00 A.M.	—Married Officers Qtrs. Corona	4- 3
4-18— 2:00 P.M.	—School Building Woodburn, Ore.	3-28
4-18—	—Factory Building Richmond	4- 7
4-18— 2:00 P.M.	—Stadium Renovation, San Francisco	4- 3
4-18— 4:00 P.M.	—School Stockton	4- 7
4-21— 8:00 P.M.	—Fire Hall Annex Burlingame	4- 7
4-21— 8:00 P.M.	—Shop Building Fallon, Nev.	4- 9
4-22— 7:30 P.M.	—Electrical Sys. San Leandro	4- 3
4-22— 8:00 P.M.	—Furnace Room and Heating Plant Reno, Nev.	3-19
4-22—10:00 A.M.	—County Bldg. Porterville	4-10
4-22— 2:00 P.M.	—Vending Booth Addn. San Francisco	4- 2
4-22— 2:00 P.M.	—Storage Room San Francisco	4- 2
4-23— 1:00 P.M.	—Federal Jail Eklak, Alaska	3-18
4-23— 2:00 P.M.	—Holstway Doors and Car Gate San Diego	3-24
4-23— 1:00 P.M.	—Disassembly Plant Flagstaff, Ariz.	4- 8
4-23— 7:30 P.M.	—Junior High School Addition, Downey	3-28
4-24— 2:00 P.M.	—Memorial Hospital Newcastle, Wyo.	3-26

Coram, Calif., the hollow metal doors, complete with frames, hardware and all other accessories, except caulking compound, necessary for the complete installation of the doors in the battery and oil house 230-kv. switchyard, Shasta power plant, Central Valley Project, California. The doors will be installed by the government:
M. Reuter & Sons, Portland, Ore., $1398; ship 300 days; 2700 lbs.; f.o.b. Portland; terms 1% 30 days. No equalization offered.
Price Building Specialties Co., San Francisco, Calif., $1443; ship 300 days; 2700 lbs.; f.o.b. Portland; terms net. No equalization offered.
Colorado Builders Supply Co., Denver, Colo., $1936; ship 300 days; 2600 lbs.; f.o.b. St. Paul, Minn., with freight allowed to destination; terms net. No equalization offered.
George T. Gerhardt Co., San Francisco, Calif., $2320; f.o.b. San Francisco; 24,000 lbs.; 30 days; ½ of 1% 20 days.
Aetna Steel Products Corp., New York, N. Y., $2820; f.o.b. Coram; 30 days; ½ of 1% 10 days; ¾ of 1% 20 days.

4/7/47 43
Pumping Units—Bids Wanted
GILA PROJECT, Ariz.—Until May 8, 2 p. m. bids will be received by the U. S. Bureau of Reclamation, Custom House, Denver, Colo., under Spec. 1777 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Yuma, Arizona, six motor - driven, vertical - shaft pumping units, complete for installation in six relift pumping plants, "A" and "B" canals and laterals, unit 1, Yuma Mesa Division, Gila Project, Arizona. The apparatus will be installed by the Government. No charge for copies of the specifications to prospective bidders; to others $1.00, not returnable.

4/7/47 43
Pumping Units
Bids Wanted
YAKIMA PROJECT, Wash.—Until May 7, 2 p. m. bids will be received by the U. S. Bureau of Reclamation, Denver, Colo., under Spec. 1770, for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Yakima, Washington, two motor-driven, horizontal - shaft, single-stage, centrifugal type pumping units, each complete with pump, motor, flexible coupling, base plate, and all accessories required for a complete operating unit, for the Terrace Heights Pumping Plant, Roza Division, Yakima Project, Washington. The apparatus will be installed by the Government. No charge for copies of the specifications to prospective bidders; to others $1.00, not returnable.

4/7/47 43
Traveling Crane
Bids Wanted
SHOSHONE PROJECT, Wyo.—Until May 8, 2 p. m. bids will be received by the U. S. Bureau of Reclamation, Custom House, Denver, Colo. under Spec. No. 1773 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b cars at Colby, Wyoming, at the option of the bidder, one 3-motor, floor-operated 25-ton traveling crane for the Heart Mountain Power Plant, Shoshone Project, Wyoming. The crane will be installed by the Government. No charge for copies of the specifications to prospective bidders; to others $0.75, not returnable.

4/7/47 43
Circuit Breakers, Disconnecting Switches, Etc.
MISSOURI BASIN PROJECT, Wyo.—Until May 7, 2 p. m. bids will be received by the U. S. Bureau of Reclamation, Customhouse, Denver, Colo., under Spec. 1769 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Casper, Wyoming, five (5) 115-kilovolt, 800 ampere, 3 pole, single throw, outdoor-type power circuit breakers; complete with bushing current transformers; two (2) 161-kilovolt, 600-ampere, 3-pole, single-throw, motor-gang - operated, horizontal - upright, outdoor-type disconnecting switches; two (2) 161-kilovolt, 600-ampere, 3-pole, single-throw, manually-gang-operated, horizontal upright, outdoor type disconnecting switches with manually - gang - operated grounding blades; three (3) 161-kilovolt, 600-ampere, 3-pole, single-throw, manually-gang-operated, horizontal-upright, outdoor - type disconnecting switches; four (4) 161-kilovolt, 600-ampere, 3-pole, single-throw, manually-gang-operated, horizontal-underhung, outdoor-type disconnecting switches; nine (9) single-pole, thyrite or autovalve, outdoor, station-type lightning arresters arranged for base mounting, and suitable for service on 115,000-volt, 3-phase, grounded-neutral circuits; for Kortes Switchyard, Kortes Unit, Wyoming, Missouri Basin Project. The apparatus will be installed by the Government. No charge for copies of the specifications to prospective bidders; to others $0.75, not returnable.

4/7/47 43
Motor-Driven Fans
Bids Wanted
COLUMBIA BASIN PROJECT, Wash.—Until May 8, 2 p. m. bids will be received by the U. S. Bureau of Reclamation, Customhouse, Denver, Colo., under Spec. 1778 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Odair, Washington, nine (9) centrifugal-type, motor-driven fans, each with a capacity of not less than 12,500 cubic feet per minute; one (1) centrifugal-type, motor driven fan with a capacity of not less than 10,000 cubic feet per minute; one (1) centrifugal-type motor-driven fan with a capacity of not less than 8,000 cubic feet per minute; one (1) centrifugal-type, motor-driven fan with a capacity of not less than 7,500 cubic feet per minute; one (1) centrifugal type, motor-driven fan with a capacity of not less than 5,000 cubic feet per minute; one (1) centrifugal-type, motor-driven fan with a capacity of not less than 3,000 cubic feet per minute; four (4) propeller-type, motor-driven fans each with an operated shutter and each with a capacity of not less than 20,000 cubic feet per minute, automatic fire louver and hand-operated dampers; for Grand Coulee Right Power Plant, Columbia Basin Project, Washington. The apparatus will be installed by the Government. No charge for copies of the specifications to prospective bidders; to others $0.75, not returnable.

4/7/47 43
Disconnecting Switches
Low Bidder
CENTRAL VALLEY PROJECT, California.—The following submitted bids which were opened at the U. S. Bureau of Reclamation, Customs House, Denver, Colo., under Spec. 1705 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Antioch, Calif., two (2) 69,000-volt, 600-ampere, 3-pole, single-throw, manually-gang operated, outdoor type disconnecting switches for Clayton and Ygnacio Canal pumping plants 69-kv. transmission line, Central Valley Project, California. The apparatus will be installed by the government:
Southern States Equipment Corp., Hampton, Va., $1,100; Delta-Star Electric Equipment Corp., Philadelphia, Pa.; Pacific Electric Manufacturing Corp., San Francisco, Calif., and E. B. Chance Co., San Francisco, Calif., all bid $1998; f.o.b. destination; terms net. Equalization offered. 30% price clause.

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the Division of Architecture, Public Works Building, 12th and "N" Streets, Sacramento, California, up to 2:00 P.M., Tuesday, April 15, 1947, said bids thereafter on said day to be publicly opened and read for Additions to Public Works Building, Sacramento, California, in accordance with plans and specifications therefor.

The work includes alterations and construction of a partial fifth and sixth story addition on the existing Public Works Building. The addition will be of structural steel and reinforced concrete, and comprises 17,000 square feet approximately.

Separate bids only will be entertained for the following segregate parts of the work:

General Work.

Plumbing, Heating and Air Conditioning.

Electrical Work.

Authority Notice: Approval for this construction was granted by the Civilian Production Administration with Serial No. 9-1-5375.

Prevailing Wage Scale: In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

	Hourly Rate
Asbestos Workers	$1.75
Bricklayers	2.50
Bricklayers' Hod Carriers	1.47½
Carpenters	1.75
Cement Finishers	1.87½
Elevator Constructors	1.96
Elevator Constructors' Helpers	1.37
Electric Workers	2.00
Material Hoist Operator	1.65
Glass Workers	1.65
Iron Workers, Structural	2.00
Iron Workers, Architectural	1.85
Iron Workers, Reinforcing Steel	1.75
Laborers, Building	1.25
Lathers	2.00
Painters	2.00
Plasterers	1.87½
Plasterers' Hod Carriers	1.65
Plumbers	1.87½
Roofers	1.75
Sheet Metal Workers	1.75
Steam Fitters	1.87½
Tile Setters	1.75
Tile Setters' Helpers	1.25
Transit Mix Operator (5 Yds.)	1.45
Any classification omitted herein not less than	1.25

Overtime—One and one-half times the above rates.

Apprentices may be employed provided they are properly indentured to the contractor in full compliance with the provisions of Section 1777.5 of the Labor Code.

Plans and specifications for examination are on file in the office of the Division of Architecture, Public Works Building, Sacramento, and Room 803 State Office Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Contractors who are desirous of securing plans, specifications and proposal forms for the purposes of preparing and submitting a proposal for this work may do so subject to certain conditions as hereinafter stated by requesting same in writing from the Division of Architecture, Public Works Building, Sacramento. Such request shall be accompanied by a deposit of Twenty Five ($25.00) dollars. Check shall be made payable to the Division of Architecture. Such deposit is required to guarantee the safe return in good condition of the plans and specifications to the Division of Architecture within 30 days after the date set for opening bids.

Failure to so return the plans will cause forfeiture of the Deposit to the State.

Prequalification: Plans, specifications and proposal forms will only be issued to those contractors who are prequalified with the Department of Public Works by having filed a statement of experience and financial condition on a standard questionnaire form in accordance with the provisions of the State Contract Act. Such statement must have been filed and approved not more than one (1) year and not less than five (5) days previous to the date set for receiving and opening bids. Contractors may obtain standard questionnaire forms from the Division of Architecture.

No bid will be accepted from a contractor who has not been licensed in accordance with the provisions of the Contractor's License Act or to whom a proposal has not been issued by the Department of Public Works.

No bid will be considered unless it is presented on a proposal form furnished by the Division of Architecture and accompanied by a bidder's bond, cash, a cashier's or certified check made payable to the Director of Public Works, in the sum of at least ten per centum (10%) of the amount of the bid.

The Department of Public Works reserves the right to reject any or all bids and to waive any informality in any bid received.

No bidder may withdraw his bid for a period of thirty (30) days after the time set for opening thereof.

PLANS and Speculations

A plans loan was authorized by federal works administration today so that plans may be started for a primary school at Norwalk in Los Angeles County, (estimated cost, $267,320), including classrooms, toilets and an administration unit. The loan was for $10,200.

oOo

Fallbrook union elementary school district of San Diego County will received a $6,700 loan from FWA to facilitate plan preparation for a $156,368 elementary school additions development.

oOo

The navy department has approved plans for construction of a new drawbridge across the Napa River south of Napa. Plans were prepared by the state department of public works.

oOo

Four parking sites will be purchased by the City of Salinas, at a cost approximating $400,000.

oOo

Berkeley city council has approved a $101,000 program of street resurfacing and improvement in that city from second quarter state gas tax funds.

oOo

Menlo Park city council has begun proceedings to bring inside the city limits a 168-acre tract owned by Claude T. Lindsay Co. which lies directly across San Francisquito Creek from Palo Alto.

oOo

Support was pledged by Gratton Grange for a proposed community hospital near Hughson.

oOo

Shasta County supervisors have unanimously rejected petitions calling for establishment of a county library.

Dun & Bradstreet List Contractor's Profit at 1.42%

WASHINGTON.—A recent survey by the Dun and Bradstreet review showing the contractor's average profit as 1.42 per cent on highway construction work, has gone a long way to combat the popular notion that the road builders have been making exorbitant profits in their operations.

Profits for other types of business included in the survey averaged 3.99 per cent, more than double that for the contractor.

In reference to this result, while addressing a large group of highway engineers, a spokesman for the Associated General Contractors of America said, "I hope you have a willingness to understand that a contractor is not gouging anyone with a 1.42 per cent profit."

Over the past year there has been a disposition on the part of highway contractors to complain about the strict scrutiny to which state highway departments and the Public Roads Administration have subjected bid prices. Where these have run a certain percentage above pre-war costs for comparable work, the figuring has been particularly close.

"Yet, by that careful study and careful awarding of contracts," the AGC spokesman said, "these agencies were able to show the executive departments and legislatures of states or the federal government that public funds were being spent wisely for highways. A willingness to understand the problem of the highway department will allow the contractor to see that this carefulness probably prevented a drastic curtailment of highway work."

In the main, contractors have favored PRA's policy of a percentage ceiling on bids.

Senate Committee Action May Delete PHS $50 Million Lid

WASHINGTON.—A senate appropriations subcommittee this week started hearings on the house-approved labor-social security appropriations bill which deals with public health funds and administration of the hospital construction program.

Administration officials, it was said, now have indicated willingness to accept the house-passed version which provides appropriations for federal aid to non-federal hospital and clinic construction.

Officials In Accord

The public health service administers the new program under the Hospital Survey and Construction Act. As passed last August, this legislation called for a flat sum for purposes of administration in the fiscal year starting July 1, 1947. Following review by the budget bureau, the amount asked was $50 million.

Two weeks ago the house struck out this request and replaced it with a clause under which the government, pursuant to the enabling act, recognizes its contractural obligation to put up one dollar for every two dollars appropriated in any state for hospital construction.

This clause is now before the senate subcommittee of which Senator William F. Knowland of Oakland is chairman.

It was believed earlier that house action would work against acceptance of the plan and hamper its progress through congress substantially. It was learned today, however, that the public health service subscribes to the wisdom of accepting the house plan.

Dr. V. M. Hoge is director of the hospital facilities division of the public health service. This division is responsible for administration of the huge hospital construction program.

No Requests In

His office expects that requests from states for federal assistance with their hospital building programs will start coming in June or July. So far no requests have been received.

Under the Hill-Burton Act covering hospital survey and construction a state submits to the public health service a comprehensive program for hospital and clinic construction.

With PHS approval, eligibility may apply to state, county, city, even voluntary non-profit private hospitals.

The current high costs of construction probably will keep state and local applications well under an aggregate of $50 million during the coming fiscal year. However, under the house-approved measure it would be possible for applicants to obtain as much as $150 million for hospital and clinic construction during the coming fiscal year.

Remove Limitation

This is true because the original enabling legislation authorized the government to contribute $75 million each year for five years. The period would cover 1947 through 1951. It also provided that money not used in one year could be accumulated for use in a subsequent year.

If the senate finally adopts the house-approved version, it is believed that $50 million limitation written into the appropriation bill by the administration will not hold.

#

SPEAKS ON HOUSING

WASHINGTON. — Housing, the Nation's No. 1 need, will be the subject of an address by Norman P. Mason, president of the National Retail Lumber Dealers Association, to be given at the 35th annual meeting of the U. S. Chamber of Commerce in Washington on April 29.

GROOVER AND I

TOO SIMPLE?

It has been asked if the present 400 million to Greece and Turkey is the beginning or the end.

☆ ☆ ☆

The answer has been given. We will have many more moral obligations which must be met with American dollars.

☆ ☆ ☆

Our policy is to fight the spread of Communism anywhere in the world Communism threatens Democracy.

☆ ☆ ☆

A question has been asked from the floor of the Senate. It is a good question:

☆ ☆ ☆

Why do we not IMMEDIATELY STOP sending aid and relief to communistic Russia and her communistic satellite countries?

☆ ☆ ☆

Somewhere there should be an answer to so simple a question.

Highway Engineers Can Help Contractors Bring Down Price

WASHINGTON. — Highway engineers can cooperate with road building contractors to bring the price of highway construction down in the opinion of Dwight W. Winkelman of Syracuse, N. Y.

Winkelman is vice - president of the Associated General Contractors of America, an organization of more than 4,100 general contractors.

Specifically, Winkelman suggests that highway engineers make up clear and definite specifications. When these are clear and definite, and when quantities can be estimated with reasonable accuracy, contractors can make close bids, he said.

Conversely, the more specifications are left open to the discretion or determination of the engineer, the more the contractor must add contingencies to offset his possible whims. Consequently, an added construction cost results.

The AGC vice-president points out that some items of highway costs can be influenced by cooperation between engineers and contractors. These are those items exclusive of the contractors' own province.

Highway costs now are higher than before the war, Winkelman reminded engineers. So, he said, are all other costs. Actually, he believes costs of highway construction have increased less than any other costs.

These two observations with respect to costs are interesting:

"1.—Highway costs will not go down if construction programs are halted or drastically curtailed. An idle contractor does not gain in efficiency. Construction should proceed on a moderate but increasing scale on projects where adequate competition indicates fair price.

"2.—Understanding is required by state, county, city, town, and other governmental units that wars are inflationary and prices never recede to previous levels."

#

OKAY FRESNO PLANS

Plans have been approved for construction of a new postoffice station in Fresno at Wishon and Olive Avenues. Bids will not be asked until sometime after July 1.

Manufacturers Laud Bricklayer's Leader For Procuring Apprentices Thru Locals

WASHINGTON.—All eyes of industry as well as government seem to be focused these days on the anticipated labor shortage in the construction industry.

Many steps already have been taken toward forestalling this blow to housing and heavier types of building as the country enters the summer construction season.

But in spite of these concentrated efforts—including the increase of apprenticeship training programs—most of those who watch trends closely fear a labor shortage of near-crippling proportions.

'Muster Support'

That's one reason why Roy A. Shipley, president of the Structural Clay Products Institute, commended Harry C. Bates, president of the Bricklayers, Masons and Plasterers International Union of America, for urging local unions to admit many new apprentices as are needed to meet future building needs.

Shipley's organization represents the brick and tile manufacturers of the United States.

Bates sent a letter to all subordinate unions of his organization calling on them to muster all the labor forces they possibly could through new apprentice enrollment.

Commenting on this move, Shipley wrote:

"Your far - sighted action in strongly urging your local unions to make sure that a sufficient number of bricklayer apprentices is trained, is a genuine service to our entire industry, to the veterans who are seeking homes, and to the community and nation in general.

Have Full-Time Staff

"This is an example which might well be followed by the leaders of all the unions whose members compose the building trades. Without such action there is grave danger that the volume of future building might be held well below the national need.

"You may rest assured that brick and tile manufacturers will lend their full support and encouragement to the local apprentice training programs which will multiply in number as a result of your appeal.

"The Structural Clay Products Institute has assigned a staff of seven full-time specialists to aid in the establishment of joint apprenticeship committees in every part of the country."

Shipley assured Bates that his national organization would continue its cooperation in assuring that potential shortages of masons are averted before the activity is slowed down for lack of skilled men.

Since V-J day, 260 such committees have been formed and nearly 8,000 apprentices have entered training. Eighty per cent of these are World War II veterans.

Opportunity Unlimited

Shipley added:

"The huge volume of masonry construction which will be required in the record-breaking building program ahead of us assures these men of attractive employment opportunities and steadier work than the building trades have known at any time in the past.

"We shall continue to urge that the unions admit sufficient apprentices to meet the full need for it means better days ahead for all concerned—producers, contractors, and workers."

#

'SLUMLESS AMERICA" IS TOPIC OF PLANNING & HOUSING ASSOCIATION

Bleecker Marquette, executive secretary of the Cincinnati Better Housing League, will address a luncheon meeting of the San Francisco Planning and Housing Association at the Bellevue Hotel, Wednesday.

"America Can Be Slumless" is his topic. Marquette is a member of the American Public Health Association's committee on hygiene of housing; the committee on Ohio state mental health program; and president of the Ohio Housing Council.

Incomes of Half of Housing Projects' Tenants Too High

Support for the charge that public housing projects are occupied by people who can afford to pay private rents was given today by Philip F. Heraty, president of the Associated Home Builders of Alameda County, Inc., in urging defeat of the W-E-T housing bill now pending in congress.

"Public opinion will not allow this bill to become law if the true facts about public housing can be made generally known," Heraty said. "This $7 billion bill would create 500,000 additional units of subsidized housing. The people living in 40 million other dwellings would help pay rent of the privileged few living in the 500,000 subsidized units.

Median Rent Less

"Many Americans would be willing to do this of the people selected to live in these projects represented those most in need of housing and those of lowest incomes. But public housing does not take care of this group—and everybody should know it.

"We have obtained from the federal public housing authority itself the latest figures available on the income of people now living in government low rent housing. The FPHA states that the median income of its families in the second quarter of 1946 was $32.33 per week. This means that half the families who are now having help from the government have incomes of more than $32.33 per week and half have incomes below that figure.

This figure should be contrasted with the median urban rent throughout the country to determine the relative capacity of public housing tenants to pay their own rent bills, according to Heraty. The median rent throughout the country for urban areas is $30.25 per month, according to the special report on housing issued by the bureau of the census, May 16, 1946.

In Top Bracket

"Since it is an accepted rule of thumb that the rent a family can afford to pay is roughly 25 per cent of its monthly income, it is clear that the median income of families in public housing projects—$32.33 per week—is sufficient to pay the median urban rent—$30.25 per month," Heraty said. "And, further, these figures incontrovertibly show that half of the families in public housing have incomes large enough to be counted in the top half of the population as far as rent-paying ability goes."

LESTER S. READY SUCCUMBS AT 58

Funeral services will be held for Lester S. Ready at 10 a. m., Monday, from the Grant D. Miller Mortuary at 2850 Telegraph Avenue, Oakland. The San Francisco consulting engineer died Thursday, at the age of 58. He had suffered a heart attack in Fresno two weeks ago and succumbed there.

He was a member of the California water resources board and former consulting engineer for the California public utility commission and the federal power commission in Washington.

Interment will be in the Sunset View Cemetery in Berkeley.

CPA PERMITS GRANTED

SAN FRANCISCO. — The Civilian Production Administration, Gilbert H. Kneiss, district director, 1355 Market Street, has announced the following permits granted for construction of commercial and industrial buildings in the San Francisco area.

BUILDING (general contractor), $48,000; Mason and North Point, San Francisco; owner, Larsen & Larsen, 629 Bryant, San Francisco.

ROOM (grocery store), $1700; Santa Cruz and Yosemite, Modesto; owner, Pete Ruffino, 827 Cycamore, Modesto.

OFFICE (lumber distribution), $10,000; San Mateo County; owner, Gamerston & Green Lumber Co, 1800 Army St, San Francisco.

RESTAURANT (drive-in, for Junior college area), $19,000; near Santa Rosa; owner, John A Matulich, et al, 301 S. A St, Santa Rosa.

SERVICE STATION, $2000; Clay and Embarcadero, San Francisco; owner, Charles E Dossl, 1457 Grant, San Francisco.

OFFICES (doctor's), $2000; 15 S 14th St, San Jose; owner, Eugene Perez, M D, 15 S 14th St, San Jose.

BUILDING (truck repairs), $23,500; 10th and E Sts, Modesto; owner, Mrs Ira Bridge, 722 2nd St, Modesto.

ALTER DRUG STORE, $6000; Santa Rosa; owner, Medico Drug Co, 401 Mendocino, Santa Rosa.

PLANT (manufacture crane hoists), $12,000; Brannan at 6th St, San Francisco; owner, Universal Crane-hoist & Monorail, 593 Market St, San Francisco.

STOREROOM (hardwood flooring), $8500; Vista and Pacific, San Mateo; owner, Robert Duncan, 444 22nd Ave, San Mateo.

REPAIR BUILDING, $12,615; 21 E Santa Clara, San Jose; owner, Herbert C Jones, 2nd and Santa Clara, San Jose.

SCHOOL (elementary) $200,000; Bancroft at 143rd, San Leandro; owner, San Leandro Elementary School District, 451 Hepburn, San Leandro.

BUILDING (truck sales and repairs), $11,680; Railroad Ave, Fresno; owner, D R Getchell, 2401 Stanislaus, Fresno.

BUILDING, $57,000; N Canal St, South San Francisco; owner, Colett-Week-Nibecker, Box 631, South San Francisco.

STOREROOM (for stock), $4500; 921 Macdonald, Richmond; owner, Geo H Johnston, 919½ Macdonald Ave, Richmond.

OFFICE BUILDING, $3010; 3710 Judah, San Francisco; owner, R L Hutchins, 1500 41st Ave, San Francisco.

WAREHOUSE (home builder), $3300; San Mateo; owner, H H MacDonald, 2215 El Camino, San Mateo.

GARAGE (auto repair), $7000; Fresno; owner, Donald W Sahagian, 3124 Butler, Fresno.

BUILDING (flight training), $8500; Lawrence and Bayshore, Sunnyvale; owner, Santa Clara Valley Airport, 351 Carroll, Sunnyvale.

FHA PERMITS ISSUED

SAN FRANCISCO, Calif.—Federal Housing Administration, D. C. McGinness, district director, 815 Montgomery St., San Francisco, Calif., has announced the following list of permits granted by the above office for the construction of dwelling or rental units (other than for owner-occupancy) in the San Francisco area for applicants as noted:

5 UNITS—San Francisco; Marvel Home Builders, 2015 29th Ave, San Francisco.

2 UNITS—Oakland; Richard H Lincoln, 1352 62nd Ave, Oakland.

1 UNIT—Richmond; Aalbu & Son, 920 Carleton St, Berkeley.

2 UNITS—Porterville; Andy J Rogers, 906 3rd St, Porterville.

1 UNIT—Sacramento; Frank C Wells, Route B, Box 627, Roseville.

1 UNIT—San Leandro; W D LeCount, 1315 Primrose Dr, San Leandro.

1 UNIT—Oakland; Cleatus H Buckley, 1324 100th Ave, Oakland.

1 UNIT—Sacramento, Frank Cookson, 2025 35th St, Sacramento.

2 UNITS—Willows; Gordon C Weems, 672 N Murdock, Willows.

3 UNITS—Stockton; Howard H Mead, 409 N Windsor Ave, Stockton.

1 UNIT—Richmond; C J Shinn, 3317 Rheem Ave, Richmond.

30 UNITS—San Francisco and San Bruno; Ed Rosemont, 176 Duboce Ave, San Francisco.

1 UNIT—Modesto; M R Sherman, 1506 Eureka St, Modesto.

1 UNIT—Stockton; A H Davies, Box 351, Stockton.

6 UNITS—San Francisco, H Barber & Son, 280 Justin Dr, San Francisco.

6 UNITS—Marysville; R W Aldrich, Box 1461, Marysville.

8 UNITS—San Mateo; Robert Duncan, 1731 S El Camino Real, San Mateo.

12 UNITS—San Mateo; Herman Christensen, 135 Clark Dr, San Mateo.

2 UNITS—Sacramento; Harry H Wrinkle, 1116 Markham Way, Sacramento.

2 UNITS—Oakland; Carl Ashman, 182 Grand View Ave, San Francisco.

6 UNITS—Fresno; Roy Martin, 149 N Calaveras St, Fresno.

6 UNITS—San Francisco; Bernard Lewis, 1466 Waller St, San Francisco.

4 UNITS—San Francisco; Mayfair Heights Corp, 200 Masonic Ave, San Francisco.

1 UNT—Fresno; Jack Krusie, 3044 Pine Ave, Fresno.

2 UNITS—Sacramento; Jerold Kasnek, 1422 101st Ave, Oakland.

1 UNIT—Sacramento; Wm R Draper, Route 6, Box 900, Sacramento.

2 UNITS—San Francisco; Jack Bisinger, 2199 Jackson St, San Francisco.

3 UNITS—Sunnyvale; The Sunnyvale Realty Co, 218 S Murphy, Sunnyvale.

2 UNITS—San Francisco; R Valaris, 405 Montgomery St, San Francisco.

1 UNIT—Walnut Creek; Vincent M Aylward, 1307 Harrison St, Oakland.

7 UNITS—Santa Cruz; W G Gaston, 3832 Kirkham St, San Francisco.

1 UNIT—Richmond; Earl W Flory, 5400 S Brante Ave, Richmond.

3 UNITS—Berkeley; C C Lula, 1820 Euclid Ave, Berkeley.

10 UNITS—Sacramento; Hager & Sutter, 3838 W. Land Park Dr, Sacramento.

1 UNIT—Sacramento; G D Fraser, 410 22nd St, Sacramento.

1 UNIT—Tiburon; P A Bates, Box 660, Tiburon.

1 UNIT—Visalia; C E White, 1618 Sanders St, Visalia.

1 UNIT—Sacramento; F G Hill, 915 28th St, Sacramento.

1 UNIT—San Francisco; R Valaris, 405 Montgomery St, San Francisco.

6 UNITS—Menlo Park; Alexander Beltramo, 860 Encinal Ave, Menlo Park.

6 UNITS—San Francisco; Herman Christensen, 1390 21st St, San Francisco.

2 UNITS—Oakland; Douglas H Prather, 2218 107th Ave, Oakland.

12 UNITS—San Francisco; Heyman Homes, 5150 Geary Blvd, San Francisco.

2 UNITS—Stockton; Delucchi Co, Inc, 125 W W Robinson St, Stockton.

4 UNITS—Oakland; Al Neft, 607 E 8th St, Oakland.

SUB - BIDS WANTED

General contractors desiring sub-bids on any job are invited to make known their requirements in this column. There is no charge for this service

Juvenile Hall, Plumas County; Bids due April 25, 2:30 P. M.
L. G. Shaiz, Route 1, Box 142, Chico (Chico 1088)
Bingham Constr. Co., 6329 Eastern Ave, Sacramento (Sacto. 6-6419)
B. & R. Constr. Co., 110 Market St., San Francisco (DOuglas 7516)

Officers' Quarters and Utilities; Spec. 1268, near Merced; Castle Army Air Field; Bids due April 22, 2 P. M.
Jas. I. Barnes Constr. Co., 941 Russ Bldg., S. F. (EXbrook 5532)
Erbentraut & Summers, 696 Pennsylvania St., S. F. (ATwater 2420)
Hiltwell Constr. Co., 4745 Geary Blvd., S. F. (HAyview 5947)
Midstate Constr. Co., 427 Bryant St., San Francisco (YUkon 6-2811)
Williams & Burrows, Inc., 10 California Dr., Burlingame (Burl. 4-1790)
M. & K. Corp., 200 Financial Center Bldg., San Francisco (EXbrook 7621)
Robert McCarthy, 1050 Kirkham St., San Francisco (OVerland 4050)
Carl N. Swenson Company, Post Office Box 558, San Jose, California. (Ballard 2902)

Officers' Quarters and Utilities, Two-Rock Ranch, Sonoma County; Bids Due April 15, 2:00 P. M.
Erbentraut & Summers, 696 Pennsylvania St., S. F. (ATwater 2420)
Robert McCarthy, 1050 Kirkham St., San Francisco (OVerland 4050)
B. & R. Construction Co., 110 Market St., San Francisco (DOuglas 7516)
M. & K. Corp., 200 Financial Center Bldg., S. F. (EXbrook 7624)
Whalin Brothers, 2942—23rd Street, Oakland (KEllog 4-2900)
J. A. Bryant, 1815 Capitol St., Vallejo (VAllejo 2-4446)

Municipal Sewage Works Enlargement, No 46-3, Palo Alto; Bids Due April 28, 3:00 P. M.
Central California Constr. Co., Inc., 116 Erie St. S. F. (HEmlock 7926)
DeLuca & Son, 1745 Filbert St., San Francisco (ORdway 3600)
Stanley H. Keller, 114 26th Ave, San Francisco (SKyline 3862)
Clinton Constr. Co. of California, 923 Folsom St., S. F. (SUtter 3440)

Emergency Housing; Spec. 18376, Stockton; Bide Due April 16, 2 P. M.
Henry Arian Construction, 4142 Geary Blvd., San Francisco (HAyview 3170)
Haas & Rothchild, 326 Merchants Exchange Bldg., S. F. (EXbrook 1205)
S. C. Giles & Co., 319 Elks Bldg., Stockton (Stockton 3-9469)
Wallace D. Harkins, Inc., 406 Sutter St., San Francisco (GRaystone 3022)
MacDonald, Young & Nelson, 127 Montgomery St., S. F. (SUtter 8296)
Clem Anderson, 2048-A Lincoln Ave., Alameda (LAkehurst 2-1432)

Addn. to Lincoln School, Heedley, Calif.; Bids Due April 14
Midstate Constr. Co., 427 Bryant St., San Francisco (YUkon 6-2811)

Partially Construct Elmwood Elementary School, Stockton; Bids due April 18, 4:00 P. M.
S. C. Giles & Company, 319 Elks Bldg., Stockton (Stockton 7-7849)
Wallace D. Harkins, Inc., 406 Sutter St., San Francisco (GRaystone 3022)

Electric Powerhouse, Amador County; Bids Due April 16
Utah Constr. Co. (Att. D. W. Moffat), 111 New Montgomery Street, San Francisco (Garfield 6743)
Vennell Company, Inc., 111 Sutter St., San Francisco Calif., (Ordway 7675)
MacDonald, Young & Nelson, Inc., 127 Montgomery St., S. F. (SU 8296)
Clinton Constr. Co. of California, 923 Folsom St., S. F. (SUtter 3440)
H. H. Larsen Co., 64 South Park, San Francisco (EXbrook 3190)
Guy F. Atkinson Co., 30 West Orange Ave., South S. F. (Juniper 4-8129)

Factory Building, American Radiator & Standard Sanitary Corporation Richmond, California; Bids Due April 18.
Louie C. Dunn Company, Monadnock Building, San Francisco, California. (YUkon 6-1471)
Swinerton & Walberg, 1723 Webster Street, Oakland, Calif., (HIgate 4322) and 225 Bush St., San Francisco (GArfield 2980)
Empire Constr. Co., Ltd., 344 Harriet St., San Francisco (HEmlock 3400)
Parker, Steffens & Pearce, 135 South Park, S. F. (EXbrook 6539)
Haas & Rothchild, 326 Merchants Exchange Bldg., S. F. (EXbrook 1205)
Elmer J. Freethy, 1431 Kearney St., El Cerrito (LAndscape 5-3811)
Barrett & Hilp, 918 Harrison St., San Francisco (DOuglas 0.00)
Clinton Constr. Co. of California, 923 Folsom St., S. F. (SUtter 3440)

Turlock Theater; Bids Due May 1, 11 A. M.
Swinerton & Walberg, 225 Bush St., San Francisco (GArfield 2980)

Factory Bldg., Eastman Tag & Label Co., Richmond; Bids due May 5, 3 P.M.
Swinerton & Walberg, 1723 Webster St., Oakland (HIghgate 4322) and 225 Bush St., San Francisco (GArfield 2980)
E. S. McKittrick, 610—16th Street, Oakland (TWinoaks 5073)
Clinton Constr. Co. of California, 923 Folsom St., S. F. (SUtter 3440)
MacDonald, Young & Nelson, 127 Montgomery St., S. F. (SUtter 8296)
Parker, Steffens & Pearce, 135 South Park, San Francisco (EXbrook 6539)

Public Works Bldg. Addn., Sacramento; Bids Due April 15, 2 P. M.
Lawrence Constr. Co., 3020 V St., Sacramento (Sacramento 6-3835)

School Bldg., Willow and Western Ave., Hayward; Bids due April 29, 8 P.M.
Willis F. Lynn, 1040 Folger Ave., Berkeley (BErkeley 6044)
Swinerton & Walberg, 225 Bush St., San Francisco (GArfield 2980) and 1723 Webster St., Oakland (HIgate 4322)
Pacific Coast Builders, 2530 18th St., San Francisco (HEmlock 5388)

Conversion of Bldgs. to Officers' Apts.; Spec. 1278, Mather Field, Sacramento Bids Due April 29, 2 P. M.
Wallace D. Harkins, Inc., 406 Sutter St., San Francisco (GRaystone 3022)
Robt. McCarthy Co., 1050 Kirkham St., San Francisco (OVerland 40-50-51)

Standard Oil Truck Service Sta., Reno, Nev.; Bids Due Approx. April 15
Walker Boudwin Constr. Co., 311-A Park St., Reno Nevada (REno 5511)

Conversion of Mess Halls to Family Apartments, Ft. Ord; Bids due April 24, 2:00 P. M.
Robt. McCarthy Co., 1050 Kirkham St., San Francisco (OVerland 40-50-51)
Stolte, Inc., 8451 San Leandro Blvd., Oakland (TRinidad 1064)

School Addn., White Oaks Grammar School, San Carlos; Bids due April 28
Robt. McCarthy Co., 1050 Kirkham St., San Francisco (OVerland 40-50-51)

Owner Taking Bids—Due May 1, 2 P. M.—Officers' Quarters and Utilities; Spec. 1290

FAIRFIELD - SUISUN Army Air Field, Calif., Solano County.
Owner—Sacramento District, Corps of Engineers, War Dept., Wright Bldg., Sacramento, Calif.
Plans by Engrg. Dept. of Owner.
Work involves:
(1) 13 buildings, officers' quarters, type H modern;
Electrical Distribution System
(2) 1,450 l.f. 2-in. conduit in place, including trenching and backfill;
(3) 470 l.f. 1¼-inch do;
(4) 2,100 l.f. wire No. 2/0 TW or RW in place;
(5) 2,500 l.f. wire No. 1/0, TW or RW in place;
(6) 1,400 l.f. wire, No. 2 do;
(7) 1 each transformer, 4160-120/240 V, 25-kva, subway in place;
(8) 1 each transformer, 10 kva, reverse and salvage;

Sanitary Sewer System

(9) 1,110 l.f. 8-in. vit. clay pipe, in place;
(10) 2,440 l.f. 6-inch do;
(11) 40 l.f. 8-in. CI soil pipe, in place,
(12) 5 each vit. clay pipe Y-branch, 8x8x6-in., in place;
(13) 81 each vit. clay pipe Y branch, 6x6x6-in in place;
(14) 6 each standard sewer manhole 5-ft. or less in depth, in place;
(15) 5 l.f. standard sewer manhole each addi. ft. over 5 ft. in depth;
(16) 16 each surf. cleanout, in place;
(17) 2 each connection of new 8-in. sewer to existing manhole;
(18) 1 each connection of new 6-inch sewer to existing manhole;
(19) 1 job construct manhole over existing sewer;

Gas Distribution System

(20) 1,080 l.f. 3-in. wrapped steel pipe in place;
(21) 260 lf. 2½-inch do;
(22) 340 l.f. 2-inch do;
(23) 530 l.f. 1½-inch do;
(24) 1,280 l.f. 1¼-inch do;
(25) 1 each 6x3-in. tapping sleeve, in place;
(26) 1 each 4x3-inch do;
(27) 1 each 3x3-inch do;
(28) 3 each 3-in. tapping valve, in place;
(29) 1 each 3-inch lubricated plug valve in place;
(30) 1 each 2½-inch do;
(31) 4 each 2-inch do;
(32) 4 each 1½-inch do;
(33) 4 each 1¼-inch do;
(34) 4 each drip in place;
(35) 1 job furnish and install 4-inch lub valve in existing gas line;

Water Distribution System

(36) 560 l.f. 6-in. CI pipe, in place;
(37) 1,120 l.f. 1-in. galv. wrought iron pipe in place;
(38) 686 l.f. 1½-inch do;
(39) 500 l.f. 2-inch do;
(40) 140 l.f. 3-inch do;
(41) 3 each 10x6-in. tapping sleeve, in place;
(42) 1 each 10x3-in. do;
(43) 3 each 6-inch tapping valve, in place;
(44) 1 each 3-inch do;
(45) 2 6-inch gate valve, in place;
(46) 4 each 2-inch do;
(47) 2 each fire hydrant, in place;
(48) 8 each 1¼-in. curb stop in place;
(49) 1 job sterilization of additions to water distribution system;

Paving, Drainage and Sidewalks

(50) 450 c.y. excavation;
(51) 8 roller hours compaction rolling one tractor with one 8-ft width tamping roller;
(52) 4 roller hours compaction rolling each addl. 8-ft. do;
(53) 10 roller hours compaction rolling, one power roller;
(54) 70 M. gals. water for compaction applied as directed;
(55) 290 tons type 1 base course graded aggregate in place;
(56) 580 tons type 2 base course pit run material in place;
(57) 150 tons asphl. concrete surf. in place;
(58) 9 tons paving asph. 120-150 penetration at mixing plant;
(59) 3 tons liq. asph., type MC-2 for prime coat;
(60) 1½ tons pave. asph., 200-300 penetration for seal coat, in place;
(61) 18 tons screenings for seal coat
(62) 200 c.y. concrete for headwalls and sidewalks in place;
(63) 66 l.f. thick wall concrete pipe, 15-in. diam., in place;
(64) 36 l.f. standard concrete pipe, 12-in. diam., in place;
(65) 6 l.f. 8inch diam do;
(66) 95 l.f. remove and salvage 4-in. diam., open joint drain tile.

Alternates

Alt A-1—360 l.f. 6-in. asbestos cement pipe in place.
Alt. A-2—13 bldg. if fireplaces and appurtenances are omitted deduct from Item 1 for each bldg.
Alt. A-3—13 buildings if doors on kitchen cabinets are omitted deduct from Item 1 for each bldg.

UNIFORM INSULATION.—In a survey conducted at the Frozen Foods Exposition recently held in the San Francisco Auditorium, it was found that Fiberglas insulation was used in every one of the 26 lines of frozen food equipment demonstrated at the show. In 24 cases, according to Gayle Dutton, president of Western Fiberglass Supply, Ltd., Fiberglas insulation was used exclusively; while on the other two, it was used in conjunction with other types. Among the larger manufacturers featuring Fiberglas insulted equipment at the convention were: Weber Showcase & Fixture Company; Hussman Refrigeration, Inc.; Fraser & Johnston Company, and York Corporation.

Residential Electric Wiring Fast Obsolete, Investors Emphasize

WASHINGTON. — New developments in electrical usage are coming onto the market so fast that home owners and prospective buyers are being urged to check their wiring carefully.

One of the greatest benefits that can result to home owners from such investigation might derive from their mortgage plans. It is pointed out that better home mortgage deals can be arranged if the owner is familar with his wiring installations.

Is is simply a matter of any home with a well-designed wiring system being a better investment risk because it has a much better re-sale value.

Therefore, it is wise for home planners to check the wiring in their architect's drawings or to inspect installations carefully if older houses are being bought.

On the basis of today's need and current electrical standards installed wiring can become obsolete in a few years.

Bankers as well as electrical technicians point to homes built 20-odd years ago. They were wired for lights principally and perhaps for a few small appliances.

Today, they point out, the average house has at least 11 appliances and twice that number of lamps and fixtures.

The 20-year old homes already are obsolete electrically and this necessitates the wide use of exposed extension cords. In most cases, the experts say, the wire itself is too small to supply sufficient current for expanded electrical loads. And the result is sluggish, inefficient and costly operation of electrical equipment.

As an end result of all this, appraisers are placing wiring high on the list of factors to be checked as contributors to home depreciation and early obsolescence.

Likewise, bankers are placing new emphasis on the advice that home owners make certain their wiring is adequate for present an future needs before approving blueprints or purchase contracts.

#

RECORD PRODUCTION

WASHINGTON.—Production of oil burners reached an all - time high of 580,326 units last year, the Department of Commerce reported today. Shipments totaled 579,453 units, as compared with the prewar high of 333,250 units in 1941.

PORTABLE POWER SAW.—For rapid on-the-job tile cutting a new power driven diamond saw has been developed by Hyatt Lapidary Equipment Company of East San Diego. It has a rigid one-piece aluminum housing and light weight (28½ pounds) construction. Dimensions are 11x21x6 inches. The patented saw guard keeps the saw and cutting contact amply supplied with water for maximum sawing speed and minimum wear.

Plasterer's Hawk Weighs Little And Increases Comfort

A boon to the plasterer is a lightweight plasterer's hawk made of magnesium—industry's lightest structural metal. The magnesium product weighs a mere one pound and eleven ounces and should contribute materially to reduction of worker fatigue because of the decreased weight which need be supported. A sponge rubber hand cushion is bonded to the woden handle making for greater comfort of the worker.

A new lightweight magnesium brick tongs is now being fabricated and merchandised by The Dow Chemical Company's specialty products division at Bay City, Mich. The weight of the magnesium tongs is only 2 ¼ pounds whereas a comparable steel tongs weighs about 6 ½ pounds, or nearly three times as much as the magnesium product. Tension spring and tooth gears permit quick and easy adjustment for all types of bricks and insure safer handling.

CASTING OUTPUT SLIPS

WASHINGTON.—Shipments of malleable iron castings during February amounted to 74,716 short tons, according to a report released today by the Bureau of the Census. This was a slight decrease from the 76,898 tons shipped during January 1947, which was probably caused by the shorter working month in February.

York-Shipley Firm Announces Sales, Service Expansion

George Frank, manager of the industrial division of York-Shipley, Inc., York, Pa., announces an expanded sales and service organization in line with the increasing public demand for oil-fired industrial heating and power-plant equipment.

F. W. Cooper is assistant manager of the industrial division; J. Walz, Jr., is district manager for the middle-west; R. P. Lindemuth is district manager, middle Atlantic; and C. M. Keady, southern district manager.

W. S. Tallon is application engineer for the industrial division; E. W. Hagblom and B. S. Shewell are field service engineers.

The York-Shipley Industrial Division has also expanded its distributor organization in recent months and now has exclusively franchised distributors in the western cities of Chicago and Denver.

Each distributor has his own dealer organization through which York-Shipley sales and service can be localized in each territory. York-Shipley industrial equipment includes oil-fired conversion burners and self-contained steam generator units ("Steam-Pak") for industrial heating and power applications.

An FWA plans and spec advance was authorized today for Compton Junior College district for gymnasium additions and alterations (at Compton), estimated cost $121,500, federal advance, $5,050.

Timber Structures Tell Development of New Framing Anchor

WASHINGTON.—Almost every day somebody somewhere announces a new gadget or process which promises to further modernize construction methods.

The latest device of this type revealed in Washington is the new timber connector which is known as a framing anchor.

Used principally in home and light construction work, this development was announced by the Timber Engineering Company, a research concern currently spending much money, time and effort on investigations in the construction field. Trussed rafters were perfected by this organization a few months ago.

The new timber connector, according to company claims, will increase rigidity around window and door openings and give added strength in floor and wall framing. It is said that architects and engineers have been quick to give the device unqualified approval.

Made of 18 gauge zinc coated, corrosion resistant sheet steel the anchors are joined to the wood with non-splitting full bodied nails that develop maximum shear without splintering the lumber.

The researchers have named their newest product the Trin-L-Grip framing anchors. The simple device was tested at Georgia Tech.

These connectors now are specified in joining joists to beams, beams to posts, studs to sills, rafters to plates, studs to girts and other house framing connections. They are said to develop both shear and tension. Costs have been reduced through eliminating currently used "cumbersome and expansive methods" which are said to require more material than with the new product.

The company claims that toe nailing uncertainties are replaced, bridging is eliminated in attaching joists on trusses and that notching is unnecessary with the new angle irons.

In descriptive material put out by the Washington concern the Trip-L-Grips are advocated as affording good wind anchorage in tieing rafters tight, guarding against uplifting roofs.

A Florida builder has found them a solution to many small but highly important problems arising in the general framing of wood construction. The anchors fit naturally into at least 90 per cent of housing frame joints, this user said.

If connections to be joined are at odd angles, the flanges can be bent accordingly, Timber Engineering points out.

Their use is not limited to home building but spreads over into farm buildings, prefabricated housing, timber trusses, form work, scaffolding, platforms, jigs and templates.

The new style timber connectors already have been used by federal, state, army and navy architects. Several federal public housing authority jobs have specified these products. They also have been tested in a number of private housing developments throughout the south, particularly in Georgia and Florida.

Some industrial firms have used the angle connectors in their expansions in those states and a few of the anchors have been installed in churches, hospitals, schools and theaters.

The local Timber Structures office is at 220 Montgomery Street, telephone YUkon 6-0407

Water Usage Groups Meet April 21-23rd

Members of three organiaztions concerned with water usage in agriculture and industry will hold joint or consecutive meetings in Portland the three days of April 21 to 23, bringing together delegates from all parts of the Pacific slope and western Canada.

The three-ply session will start off with the annual meeting of the Columbia River Basin Water Forecast committee Monday morning, April 23, when, under the chairmanship of J. C. Marr of Boise, Idaho, water supply reports for the season will be heard from all parts of the Columbia river basin.

The Western Snow conference will start that afternoon and continue through the next forenoon with R. A. Work, Medford, as chairman. Speakers will report on many aspects of snow surveys and related scientific work with snow.

The third and final part of the session will be a meeting of the North Pacific Regional Section of Hydrology of the American Geophysical union. Dr. J. C. Stevens, Portland, will be chairman of this section which will bring together engineers from many parts of the region to discuss water supplies, measurement and handling.

$15 Million Flood-Control Repair Bill Timed for Passage

WASHINGTON. — Representative Sid Simpson of Illinois has introduced legislation to authorize an emergency appropriation of $15 million to repair and strengthen flood-control works damaged by floods this year.

Representative Overton Brooks of Louisiana might have hinted at the reason for Simpson's timing of his new bill when he said he had heard that the appropriations committee was considering "omitting" funds for flood control from the spending program for the fiscal year 1948.

"I hope republican economy will not go so far as to deny the help to our own people which we freely give to other peoples of the world," Rep. Brooks said.

SHEARING JIG PLANS AVAILABLE TO BUILDERS

NEW YORK. —A new device known as the Shearing Jig has been developed to speed the cutting of Flexboard, a Johns-Manville asbestos cement building material, it was announced today by H. R. Berlin, Vice President of Johns-Manville Sales Corp. and General Manager of the Building Products Division.

A patent has been applied for and plans for the construction of the Shearing Jig are available by license through Johns - Manville dealers

Acoustic Tile (Install)
Bids Wanted
SAN FRANCISCO, Calif. — Until Apr. 16, 1:30 p. m. informal bids will be received by the City & County of San Francisco, Dept. of Public Works, Rm. 282, City Hall, San Francisco, Calif., for installing acoustical tile in Rm. 106, Health Center Bldg., San Francisco, Calif.
Specifications obtainable from office of City Architect Dodge A. Riedy, Rm. 265, City Hall, San Francisco, Calif., upon deposit of $5 refundable.

4/11/47 44
Sump Pump, Etc. —Low and Only Bidders
YUMA, Arizona. — Service Heat & Power Company, 636 21st Street, Oakland, Calif., at $994.00, submitted low bid to the Federal Works Agency, Public Buildings Administration, Office of the District Engineer, 838 U. S. Appraiser's Building, San Francisco, California, for additional sump pumps, etc., at the U. S. Post Office Building, Yuma, Arizona. Other bidders April 9th were:
Jerry Doyle, Walnut Creek, Calif., $1,290.
C. H. Welch & Son, Phoenix, Arizona, $1,821.

4/11/47 44
Entrance Doors—Low and Only Bidders
VACAVILLE, Calif., Solano Co.—George T. Gerhardt Company, Ltd., 1030 Golden Gate Ave., San Francisco, Calif., at $7,195, submitted low bid to the Federal Works Agency, Public Buildings Administration, Office of the District Engineer, 838 U. S. Appraiser's Building, San Francisco, Calif., for new entrance doors, etc., at the U. S. Post Office Building, Vacaville, Calif. Other Bidders April 9th were:
R. A. Newman, McMinnville, Oregon, $985.
Nick Hemminga, San Francisco, Calif., $1,185.

4/11/47 44
Oil Burning Equipment—Low and Only Bidders
MC MINNVILLE, Oregon. — Service Heat & Power Company, 636 21st Street, Oakland, California, at $1,632, submitted low bid to the Federal Works Agency, Public Buildings Administration, Office of the District Engineer, 838 U. S. Appraiser's Building, San Francisco, California, for new oil burning equipment for heating and hot water at the U. S. Post Office Building, McMinnville, Oregon. Campbell & Norquist, Portland, Oregon, at $1,849, submitted only other bid April 9th.

4/11/47 • 44
Relocating Refrigerating Compressor and Condensing Unit
Low and Only Bidders
SAN FRANCISCO, Calif.—Comfort Air, Inc., 2100 17th St., San Francisco, Calif., at $547, submitted low bid to the Federal Works Agency, Public Buildings Administration, office of the district engineer, 838 U .S. Appraiser's Building, San Francisco, Calif., for relocating refrigerating compressor and condensing unit at the U. S. Post Office Bldg., Rincon Annex, San Francisco, Calif.
Pacific Marine Refrigeration Co., San Francisco, Calif., at $1492.91, submitted only other bid April 9.

4/11/47 • 44
Recovering of Roof and Walls
Bids Wanted
RICHMOND, Calif., Contra Costa Co.—Until April 21, 8 P. M., bids will be received by the City of Richmond, C. A. Pitchford, city clerk, City Hall, Richmond, Calif., for recovering with corrugated aluminum siding roof and walls of city warehouse, city corporation yard, north of the A. T. & S. F. Railroad Co., between 13th and 12th Sts.
Specifications obtainable from the office of City Engineer E. A. Hoffman, City Hall, Richmond, Calif., upon deposit of $5, refundable.

4/11/47 • 44
Electric Wiring
Contract Awarded
MONTEREY, Calif., Monterey Co.—Eis-Hoklin & Galvan, 551 Mission St., San Francisco, Calif., at $10,721, awarded contract by the Monterey City School District, Board of Education, 216 Calle St., Monterey, Calif., for the installation of electric wiring at the Walter Colton School, 700 Pacific St., Monterey, Calif.
Plans by Architect Robert Stanton, Pebble Beach, Calif.

4/11/47 44
Acoustical Tile—Low and Only Bidders
SACRAMENTO, California. —L. D. Reeder Company, 1224 I Street, Sacramento, California, at $1,649.00 submitted low bid to the Sacramento Municipal Utility District, James E. McCaffrey, General Manager and Chief Engineer, 4th and J Streets, Sacramento, California, for furnishing and installing perforated surface acoustical tile on ceiling of commercial office at 1325 K Street, Sacramento, California, Western Asbestos Company, Sacramento, California, at $1,886.06, submitted only other bid April 8th.

Official Proposals

Spec. No. 75—Special Pipe Fittings for Second Mokelumne Aqueduct

NOTICE TO CONTRACTORS

Sealed proposals for furnishing welded steel pipe and special pipe fittings, lined and coated with cement mortar, for a large pipe line in Contra Costa County, California, will be received at the office of the East Bay Municipal Utility District, Room 205, 512 Sixteenth Street, Oakland, California, until 5:30 P. M., Wednesday, April 30, 1947, and will at that hour be opened and read.
Work to be covered by the proposals includes the furnishing of certain of the required materials for, and the fabricating of, steel pipe and steel pipe fittings, ranging in sizes from 60-inch I.D. to 66½-inch I.D., and the delivery of the pipe and fittings to the District's Bixler and Walnut Creek pumping stations. Included in the material to be furnished are straight pipe sections, special wye and crossover fittings, multiple joint bends, tapered sections, bulkheads and steel pipe supports. The fabricated wyes and crossovers are to be stress relieved, and all fittings are to be lined and coated with cement mortar.
Contractors are invited to submit bids covering the complete job only. Proposals shall be submitted on forms contained in the specifications. Plans and specifications may be obtained by prospective bidders at the above named office upon application at Room 406.
DANIEL READ,
Secretary.
Oakland, California.
April 10, 1947.

Santa Clara County
0.1 Mile Grading and Surfacing

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received by the Department of Public Works, Division of Highways, at the office of the District Engineer, 2001 Van Ness Avenue, San Francisco, until two (2) o'clock P. M., on Thursday April 17, 1947, at which time they will be publicly opened and read, for performing work as follows:
In Santa Clara County, about 1¼ miles west of Merced County Line (IV-SC1-32-C), about one-tenth (0.1) mile in length, to be graded and bituminous surface treatment applied.
Plans and specifications, and forms of proposal, bonds, and contract may be obtained at the above address.
No bid will be considered unless it is made on a proposal form furnished by the District Engineer, and is made in accordance with the provisions set forth under Section 2, "Proposal Requirements and Conditions" of the Standard Specifications. Each bid must be accompanied by a proposal guaranty in accordance with the requirements of article (f) of the said Section 2 of the Standard Specifications.
The Department of Public Works reserves the right to reject any or all bids.
The quantities listed in the State Highway Engineer's Estimate hereinafter stated, are approximate only, being given as a basis for the comparison of bids, and the Department of Public Works does not, expressly, or by implication, agree that the actual amount of work will correspond therewith, but reserves the right to increase or decrease the amount of any class or portion of the work, or to omit portions of the work, as may be deemed by the Engineer to be necessary or advisable.
Bids are required on the entire work described herein.
In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Asphalt plant dryerman or fireman	$1.60
Carpenter	1.75
Flagman	1.15
Jackhammer operator	1.75
Laborer	1.15
Mason	2.05
Motor grader operator	2.10
Oil distributor bootman	1.275
Oiler power shovels or cranes	1.60
Operator of power shovel or other excavating equipment, shovel type controls (up to and including 1 cubic yard)	2.25
Operator of power shovel or other excavating equipment, shovel type controls (over 1 cubic yard	2.35
Roller operator	1.95
Tractor driver	1.95
Truck driver (8 cubic yards water level capacity or more)	1.875
Truck driver (6 cubic yards and less than 8 cubic yards water level capacity)	1.50
Truck driver (4 cubic yards and less than 6 cubic yards water level capacity)	1.4075
Truck driver (less than 4 cubic yards water level capacity)	1.2625
Any classification omitted herein not less than	1.15

Overtime: one and one-half (1½) times the above rates.
Sundays and holidays: one and one-half (1½) times the above rates.

State Highway Engineer's Estimate
Item 1. 4,400 cubic yards roadway excavation;
Item 2. 320 cubic yards placing salvaged surfacing;
Item 3. Developing water supply and furnishing watering equipment;
Item 4. 20 thousand gallons applying water;
Item 5. 6 stations finishing roadway
Item 6. 17 tons liquid asphalt, SC-3 or SC-4 (bituminous surface treatment);
Item 7. 2,000 square yards preparing, mixing and shaping surface (bituminous surface treatment);
Item 8. 22 cubic yards rubble masonry;
Item 9. 10 each, guide posts;
Item 10. 70 lineal feet metal plate guard railing.

GROOVER AND I

WALLACE LAYS AN EGG

When Henry A. Wallace, ex-many things, recently arrived in London it is reported he was carrying a basket of eggs.

☆ ☆ ☆

Wallace, a former prince of the present Administration, left the royal household not of his own choosing. He is doing all within his power to create dissention and disruption, at the same time selling his own Nation and his President "short".

☆ ☆ ☆

Mr. Wallace is a very confused, frustrated man. His thinking seems to "mount a horse and ride off in all directions".

☆ ☆ ☆

It is most unfortunate that Wallace's various audiences cannot understand how completely he speaks for himself alone.

☆ ☆ ☆

Wallace's talks could be called anything from poor taste to treason. A minimum comment is he has a high center of gravity.

☆ ☆ ☆

It is difficult to understand Wallace's ultimate objective, unless he is running for President of the Soviet Republic, anyway—

☆ ☆ ☆

We hope the British remember Wallace brought along his own eggs.

Release of Scrap Held by Government Urged by Industry

Formation of a joint committee by five large industry associations to drive for release of "millions of tons" of government-held scrap to relieve the shortage of scrap and avert serious curtailment of steel production was announced today.

Robert Wolcott is head of the scrap committee of the American Iron & Steel Institute. The new group is to be known as the steel, foundry and scrap industries committee for expediting iron and steel scrap. It is composed of: The American Iron & Steel Institute; Institute of Scrap Iron & Steel; Steel Founders' Society of America; Gray Iron Founders' Society, Inc., and the American Malleable Society.

SHEET METAL MEN HOLD CONVENTION

CHICAGO.—Discussion of the apprentice problem is scheduled for a high place on the agenda when the fourth annual convention of the National Sheet Metal Contractors' Association opens here at the Hotel Stevens, on April 28.

Liberalization of the ratio of one apprentice to four journeymen will be asked through interpretation, Pebble Beach, Calif., that the ratio on a community, rather than shop, basis.

WAA CHANNELS METALS

WASHINGTON—About $33 million worth (estimated cost) of strategic materials, such as copper, lead, tin and zinc, have been channeled into industry by War Assets Administration during the past year, a WAA report stated.

JOHN SMITH DIES

Funeral services for John G. Smith, 64, former Belmont building inspector, will be held Wednesday morning from the Layng and Tinney Mortuary in Redwood City. He died at his home in Belmont Sunday after a long illness.

Nations Indebted to United States Might Supply Much-Needed Copper if Tariff Abandoned, Says Congressman

WASHINGTON.—On the desk of Congressman Robert A. Grant of Indiana, is an ashtray. It is a brass ashtray and is in the shape of a Mexican sombrero. As ashtrays go, it is fairly practical. Congressman Grant regarded it gloomily.

"There," he said, "is an example of what happens when the price and production of raw materials get out of control. That ashtray weighs about a pound. The raw copper in it, even at today's high price, didn't cost much more than 25 cents. It isn't a hand-carved job. The ashtray was cast from molten brass, given a machine polish—and I paid three dollars for it in a Washington store.

"A few years ago I could have bought an identical ashtray for a dollar. Slightly smaller ones were selling for a quarter in the five-and-dimes. What has happened in this country to skyrocket the price of brass ashtrays?

"Labor costs are higher. That is admitted. Other costs are higher. But we have a 200 per cent jump in the cost of an article that involves but a few minutes of labor, no additional merchandising costs.

"The reason that dollar ashtrays sell for three dollars is that the copper in them is so much in demand for essentials that it really had no business being used in an ashtry. And the reason that brass, once used extensively for ornament, is now so high is because basic industry must have brass and copper."

The congress, Congressman Grant said, has been backing and filling on the question of copper for months. There is evidence that there is not an adequate supply of domestic copper and there is also evidence that never again will this nation be able to produce enough copper to meet its domestic demands.

"Yet, when we try to remove the excise tax on copper, when we try to make available to this nation the world supply of copper at a fair price, we are balked by political compromises and political tirades that must be completely mysterious to the average voter.

"We are sending billions to nations throughout the world. We are only getting back about half. Some of the nations have copper in abundance. It seems to me that it makes sense to accept badly needed copper in payment for our goods. Yet we permit an unnecessary tariff wall to stand in the way of our collecting a small part of what is rightfully ours."

Senate Bills Increase Force Account Limits, Abolish Competitive Bids and Public Notice

By PHILIP G. BRADY

SACRAMENTO. — Senate committees are now considering bills which would alter public works contract provisions at both the state and municipal level. Four bills in particular increase the limit under which contracts may be let without competitive bidding.

James J. McBride (d., Ventura) has two bills pending before the governmental efficiency committee, of which he is a member, which would radically alter public works contract-letting. The committee on local government is considering bills which would allow municipal supervisors to proceed by day's labor almost at will.

S.B. 665, filed by McBride, an insurance agent, redefines "project" as any state improvement costing more than $4000 instead of $1000. It increases to $10,000, from $4000, the maximum cost of a project which can be carried out by any state agency without recourse to the Department of Public Works.

Bidders would not get the customary public notice unless the project cost over $50,000 instead of the present $15,000 maximum. Emergency construction by day's labor is now confined to situations caused by failure of bridges or other highway structures. McBride's measure broadens this to include emergency caused by fire, flood, accident or other casualty.

It would also permit letting of contract by informal bids on any portion of work proceeding on basis of day's labor instead of any subdivision or unit of such work.

McBride's other bill, S. B. 664, raises from $500 to $1000 the contract miuimum requiring competitive bidding for renewal or relocation of structures in lieu of payment to owner of property over which highway right of way has been acquired. The same bill would require labor and material bonds only on state or local contracts for public works in excess of $1000 instead of the present 100.

George J. Hatfield, (r., Newman) has a bill (S.B. 1106) now under consideration which would permit boards of supervisors to reject all bids for construction of public works and proceed by day's labor. As an alternative, the boards could re-advertise but are not so obligated.

Another bill (S.B. 619), filed by Ben Hulse (r., El Centro) would allow work on municipal or county buildings, costing between $500 and $2000, to go to the lowest of three offers when no bids are received after advertising. It requires filing of signed refusals by contractors to perform work when offers cannot be obtained.

Other measures affecting public works construction now under consideration before senate committees are listed in order:

S.B. 213 amends public resources act to allow work on beach development and cliff erosion control to be done, directly or by contract, by state park commission and al-

(Continued on Page 7)

Legion Presses for Last-Minute Revision Of Wolcott Measure

WASHINGTON.—The American Legion today announced its intention of making a last-minute effort to modify the Wolcott bill (H.R. 2780) which would remove the remaining government controls over building activity.

Congressman Wolcott expects to report the bill from his banking and currency committee Wednesday. It would amend the act entitled "An Act to expedite the provisions of housing in connection with national defense, and for other purposes."

The Legion has sent out a message to all its membership urging quick action in support of certain recommendations made to the committee during open hearings on the bill.

When he appeared before Wolcott's group, Vice-Commander R. C. Cadwallader, chairman of the Legion's national housing committee, recommended the following amendments to H. R. 2780:

On controls:

1—Rigid controls on all non residential construction should be retained.

2—Continue allocation of raw materials to manufacturers.

3—Limitation of total floor area of a home and the limitation of one completed bath to each unit (should be retained).

4—Assistance to be given to building materials producers in securing equipment and machinery.

5—Housing must be suitable for year-around occupancy.

On termination of rent controls:

1—That the objective to determine the termination of rent control be the completion of 2½, 3 or 4 million housing units whatever the facts disclosed as being needed in order to relieve the acuteness of the housing shortage. The American Legion maintained that the calender date of March 31, 1948, which was being considered, was not a suitable objective.

The Legion message stated:

"We have information that this bill will be reported by the committee without incorporating the recommendations made by American Legion, and it is the opinion of your national housing committee that failure to include these recommendations will lead to chaotic conditions in the veterans' housing program."

California Building Program Spurs Tile Apprentice Training

LOS ANGELES,—Unprecedented demand for tile in California's post-war building progress, with a consequent demand for more tile setters, is reflected in expansion of the state's tile apprentice training program, inaugurated here a year ago.

Need 1700 Setters

Starting with a bare handful of apprentices, the local program has grown to a night advanced class of 32 young men, 90 per cent of whom are war veterans, and a similar program is being organized in San Francisco and planned in other principal California cities.

Richard F. Bailey, local manufacturer and West Coast advisory committee member of the Tile Council, estimated that more than 1700 tile setters would be required in California, or approximately three times as many setters as are presently available.

These facts have been reflected in the Los Angeles apprentice class a joint union-employer project under the Los Angeles board of education, for every one of its members works by day alongside a journeyman mechanic, gaining practical experience while attending the advanced night course at the Frank Wiggins Trade School.

Furnish Supplies

The weekly night class, covering 10 months a year, fulfills the State Apprenticeship Board's requirement of 144 hours of classroom instruction annually. Normally, the apprentices are indenture for three years, but with on-the-job experience, practically all members of the current class will qualify for journeyman cards in considerably less time. Aptitude tests taken before entering the class also are an important factor in determining the length of the term.

Tools, work- and class - room quarters and general overhead for the class are provided by the city school system with the union and contractors taking care of extra expense. Adequate supplies of tile are furnished by southern California manufacturers through the Tile Council. By using a pseudo-cement, the tile, having been set, can be torn down and used over and over.

Subs Participate

The class is under supervision of a joint apprentice committee consisting of three representatives of employing contractors and three of Local 18 of the A.F.L. tile setters union.

IMPROVE BRIDGE

Improvement of the bridge across the Stanislaus River and the Riverbank crossing from county funds has been demanded by Escalon civil organizations

Army-Navy Board Meets Tuesday to Begin Rail Study

The joint army-navy board will reconvence to study costs of rail facilities into San Francisco over four proposed crossings: the combination cause-way-tube recommended by the present board; a high level

GARRISON H. DAVIDSON

bridge along the same line (Army St. to 5th St. in Alameda); a high level bridge and a low level bridge between Bay Farm Island and the south side of Hunters Point, as reported on b ya board in 1941.

This was revealed at a press conference called Monday by Brig. Gen. Garrison H. Davidson, senior member of the board. He said that the study had been ordered in a directive just received from the Secretary of War, and that the initial meeting would be held Tuesday, at 2 p. m. The study is expected to take three months.

The cost estimate, according to the general, probably will cover the cost of connecting with existing mainlines, location of yards and other facilities, and perhaps a central passenger terminal and freight facilities.

Ventilation in the tube may prove to be a major problem, the engineer said, and provision for rail facilities may require electrification of the trans while they are passing through the tube.

General Davidson said he assumed that the rail facilities are in addition to the six lanes recommended in the report, as fewer would be inadequate.

Possibility that the question of the type and place of crossing would be reopened is remote since the army-navy board has stipulated exactly which proposals are to be considered in the rail cost estimate.

There will be difficulties in compiling the information. For one thing, the army engineers already have over-spent their budget and have applied to Washington for a deficiency appropriation. For another, army engineers are not experts on railway costs and engineering problems.

There will be three major railroads to consider and a facility equally available and suitable will be sought. Probably some of the railroads could easily furnish the technical cost information desired by the board. Whether or not they will cooperate is a matter of conjecture since the army-navy board, already broke, could not easily pay to hire experts. Their refusal might seriously delay the survey.

Since the study is altogether technical, there will be no open

CPA PERMITS GRANTED

SAN FRANCISCO. — The Civilian Production Administration, Gilbert M. Kneiss, district director, 1355 Market Street, has announced the following permits granted for construction of commercial and industrial buildings in the San Francisco area.:

STATE HIWAY MAINTENANCE STATION, $10,300; near Fort Ross; owner, Calif. Div. of Highways, Box 1499, Sacramento.

2 STORE BUILDINGS, $11,500; 1910 16th St, Sacramento; owner, Robt Finley, 1607 J, Sacramento.

HIGHWAY MAINTENANCE STATION, $11,000; Mono; owner, Calif. Div of Highways, Box 1499, Sacramento.

BUNKHOUSE, sawmill, $7,000; Omo Ranch, Calif; owner, Wetsel Oviatt Lbr Co, Omo Ranch, Calif.

ALTER TELEPHONE EXCHANGE $5,000; 64 Throckmorton, Mill Valley; owner, Pacific Tel & Tel, 140 New Montgomery, San Francisco

FINITURE STORE, $8,000; 847 B St, Hayward; owner, Minnie Schammel, 278, Euclid, Oakland.

REBUILD UNSANITARY SYRUP ROOM, $12,560; Decoto; owner, Campbell Packing Corp, Decoto.

MFG CONCRETE FORMS, $12,500; South Park& Center, San Francisco; owner, Wm J Barbach, 1932 Jefferson, San Francisco.

GENERAL STORES, $4,500; Ripon; owner, Walter Francelli, Route 1, Box 137, Ripon.

MOUNTAIN CABINS, $4,500; Boulder Creek; owner, Elroy Ford Boulder Creek.

HANGAR at FLYING SCHOOL, $7,500; Visalia; owner, Sol Sweet, 119 Highland, Visalia.

TO COMPLETE GENERAL AUTO REPAIR, $200; Kettleman & So Hutchins, Lodi; owner, N C Reiswig, Route 2, Box 140B, Lodi

ALTER HOSPITAL at PRESTON SCHOOL of INDUSTRY, $12,000; Ione; owner, State of Calif, Div. of Arch, Sacramento.

FURNITURE WAREHOUSE, $6,500; owner, C C Richardson, 745 Main, Chico.

RESTAURANT, $9,750; E 14th & Maude, San Leandro; owner, Homer H Johnson, 1509, 39th, Oakland.

PLUMBING & HEATING DISTR. $47,320; Roberts & Brittain, Santa Rosa; owner, Tay-Holbrook, Inc, 165 8th St. San Francisco.

LIVESTOCK EXHIBIT BLDG, $208,320; Geneva & Rio Verde, San Francisco; owner, No 1 Dist Agric Assn

GARAGE (auto repair), $1500; 4299 Piedmont Ave, Oakland; owner, Roy Holman, 566 Commercial, San Francisco.

FIRE ESCAPES (on hotel), $10,000; 371 13th St, Oakland; owner, P L Giacometto, 104 Blaney, Supertino.

ALTER CHURCH, $65,000; Van Ness Ave and Broadway, San Francisco; owner, Roman Catholic Archbishop of San Francisco, 1100 Franklin St, San Francisco.

ALTER STORE, $1300; 1125 Burlingame Ave, Burlingame; owner, Margaret Burnham's, Inc, 4632 Telegraph Ave, Oakland.

FHA PERMITS ISSUED

SAN FRANCISCO, Calif.—Federal Housing Administration, D. C. Meiggnaes, district director, 815 Montgomery St., San Francisco, Calif., has announced the following list of permits granted by the above office for the construction of dwelling or rental units (other than for owner-occupancy) in the San Francisco area for applicants as noted:

30 UNITS—San Jose; Tilmar Construction Co, 51½ Glen Eyrie Ave, San Jose.
10 UNITS—Sacramento; Roy R Hurst, 924 8th St, Sacramento.
1 UNIT—Piedmont; H P Fisher, 376 17th St, Oakland.
2 UNITS—Fresno; Edward E Harte, 639 Olive Ave, Fresno.
1 UNIT—Oakland; A Russello, 1809 14th Ave, Oakland.
1 UNIT—Santa Cruz; W J Edwards, general delivery, Capitola.
1 UNIT—Brisbane; C A McIntosh, Box 185, Brisbane.
1 UNIT—Walnut Creek; Jesse Busse, Contra Costa, Route 1, Concord.
2 UNITS—Menlo Park; Sunlite Homes Inc, 446 Emerson St, Palo Alto.
1 UNIT—Santa Cruz; R E Grate, Rte 3, Box 346C, Santa Cruz.
2 UNITS—San Jose; Arthur G Phillips Jr, 195 N 15th St, San Jose 12.
4 UNITS—Oakland; Barnett Greenberg, 10326 E 14th St; Oakland.
2 UNITS—Watsonville; V A Pipkin, 21 Main St, Watsonville.
1 UNIT—Yuba City; Wm Graff, Rte 3, Yuba City.
2 UNITS—Pittsburg; C L Zocchi, Route 1, Box 290, Pittsburg.
2 UNITS—Sacramento; C E DeCuir, 2739 Marshall Way, Sacramento.
2 UNITS—Watsonville; Carl L Petue, 303 Manor Ave, Watsonville.
1 UNIT—Redding; Clement Soubrian, 1810 Linden Ave, Redding.
2 UNITS—Oakland; Manuel A Pereira, 3321 Columbian Dr, Oakland.
1 UNIT—Sacramento; A R Meister, 1204 39th St, Sacramento.
2 UNITS—San Jose; Walter Thorne, 119 Sunol St, San Jose.
1 UNIT—Fresno; Simon Simonian, 2126 Ventura Ave, Fresno.
2 UNITS—Santa Cruz; Harold Springer, 113 Buena Vista Ave, Santa Cruz.

hearings and prcbably no report on proceedings until they are complete.

Make-up of the board is not established, but probably will include Colonel George Mayo, retired San Francisco district engineer, Col. E. H. Marks, South Pacific division engineer, who is scheduled to retire before the three months required for the study lapse, Commodore L. N. Moeller, superintending civic engineer, Western Sea Frontier, and his associate, Capt. Baker.

General Davidson explained the decision of the board against the Bay Land (or Nishkian) Crossing was because its members were "apprehensive of its effect on the tidal flow." He said the action of the board was taken after much consideration for preservation of the San Francisco waterfront.

He said that effect of the Nishkian plan could be determined through a study that would have to be done in a laboratory where a comparable model would be set up and studied. It would take about six months.

Davidson's statement may serve to dispel a current rumor that pressure from big steel interests helped to defeat the Bay Land Crossing proposal.

PLANS and Speculations

Members elected to the new sanitary board in Escalon last week are Paul A. Ekholm, Sam Jones and Frank Cavaleiri.

oOo

A softball diamond is tentatively planned on property owned by the city of Vallejo, near the waterfront.

oOo

Buildings at the Chicago Bridge and Iron Company in Eureka have been offered for sale by sealed bids by WAA. Bids will be opened in the San Francisco office at 10 a. m., April 29

oOo

PG & E has been invited to inspect tracts in Escalon as a possible location for industrial sites.

oOo

Shasta County supervisors have authorized expenditure of any county money if additional funds are needed by the state to complete the $18,000 Fall River Mills-Dana highway.

oOo

Bids will be opened here May 26 on the WAA sale of the Moore Drydock Company west yard in **Oakland.** It cost $11,029,415. It is offered only as a complete unit, and it covers 53 acres.

oOo

Work will start very soon on installation of traffic signals at two intersections in the downtown section of San Bruno.

oOo

Senator O'Gara's interim housing committee has just reported its findings: need of a $25 million appropriation for loans to local communities, to be followed by a special election on issuing a $100 million fund "to stimulate private construction of rental property and for loans to limited-dividend housing corporations."

oOo

The Salvation Army opened a drive for a $650,000 building fund Monday, with a rally at the St. Francis Hotel. The money will be used only for construction of new units and repair of existing ones.

oOo

$80,000 in federal funds has been earmarked for Buchanan Field, near Martinez, for improvement and maintenance of runways, according to a reliable source.

oOo

Pleasanton's city council is to vote on a resolution calling for development of the Alameda County fairgrounds as a year round recreation center.

oOo

Prefabricated housing is still "from ten to twenty years away from making a real impact on American living" according to a recent article in **Fortune** magazine.

MODULAR COORDINATION TOPIC OF CONFERENCE

As part of the lengthy educational conference being held at the College of the Pacific, Stockton, by the Lumber Merchants' Association of Northern California, C. W. Kraft, president of the Kraftile Company of Niles, will join Geo. E. Solnar, Jr., and R. H. Brown in presenting a two-hour program on April 16.

Solnar, manager of Clay Brick Manufacturers' Association, will develop basic information on the subject; Brown, who is manager of the architectural products division of Gladding, McBean & Co., will explain questions of modular coordination; and Kraft will comment on the many types of clay products manufactured by California companies

Among the stressed subjects on the conference schedule are commercial lumber properties, mill work, wood shingles, paints and finishes, hardware, busines law, estimating, and pricing.

Order All Electrical Equipment for Rec's Heart Mountain Job

Electrical control equipment and a power switchboard have been ordered by the bureau of reclamation for the Heart Mountain power plant in Wyoming, Commissioner of Reclamation Michael W. Straus announced today. The contract amounting to $51,723 was awarded to the Control Corporation, Minneapolis. Delivery is to be made in eight months.

Construction of the power plant is now in progress to meet increased demands for power in northwestern Wyoming, particularly for the rapidly expanding oil-drilling activities, the commissioner said. Power imported from adjacent systems no longer is sufficient to meet the increasing requirements. The plant will have an installed generating capacity of of 5,000 kilowatts, capable of producing an estimated ultimate average of 41 million kilowatt-hours of firm energy annually.

The Heart Mountain power plant is a unit of the Heart Mountain division, one of the five comprising the bureau of reclamation's Shoshone project. The division, located in northwestern Wyoming near Yellowstone National Park, comprises a total irrigable area of approximately 30,500 acres of land adapted to diversified farming and livestock raising. Sufficient construction on the division has been completed to provide irrigation water for about 14,000 acres of land, Commissioner Straus said. An additional 18,500 acres will receive irrigation water on the completion of a 3½-mile section of the main canal and laterals and drains now under construction.

Colorado Proj. Awarded Morrison - Knudsen, Peter Kiewit Sons Combine on $2,176,708 Bid

WASHINGTON.—Construction amounting to more than $2,750,000 that will make a significant advance in the development of the Colorado-Big Thompson project has been placed under contract by the bureau of reclamation, Secretary of the Interior J. A. Krug announced today.

Two power plants—Estes and Marys Lake—together with switchyards, penstock gate structures and penstocks are included in the construction. Also to be built are the Aspen Creek Siphon, the Prospect Mountain Conduit and Marys Lake Reservoir Dikes.

The work will be done under two contracts. The contract for the power plants and appurtenant structures was awarded to Morrison-Knudsen, Inc., and the Peter Kiewit Sons Company, of Denver, Colo., on their joint low bid of $2,176,708. That for the Aspen Creek Siphon, the Prospect Mountain Conduit and Marys Lake Reservoir went to Horner and Switzer, also of Denver, on their low bid of $1,611,953.

The Colorado - Big Thompson project, Commissioner of Reclamation Michael W. Straus said, will divert surplus Colorado River water from the western slope of the Rocky Mountains through the 13-mile Alva B. Adams tunnel under the Continental Divide to provide supplementary irrigation for about 615,000 acres of land in northeastern Colorado. Work on several important features of the project already has been completed, the commissioner said, and a considerable amount is under way. The Adams tunnel has been excavated and lined with concrete, and a contract has recently been awarded for the construction of the Granby Pumping Plant which will lift water from Granby Reservoir to provide flow into Shadow Mountain and Grand Lakes from which it will flow through the tunnel. The Green Mountain Dam and the Shadow Mountain Dam are completed. The construction of Granby Mountain Dam and Dikes is already well under way by the Granby Constructors and the John R. Austin Company.

While irrigation is the principal purpose of the project, several opportunities are available for the development of power from falling waters, Mr. Straus said. Some of the power will be required for operating the project. The balance will be available for sale to a waiting market.

Under present plans the Estes Power Plant will have an installed generating capacity of 45,000 kilowatts, provided by three 15,000 kilowatt generators capable of producing an estimated average of 100,800,000 kilowatt-hours of firm power and 31,000,000 kilowatt hours of non-firm power annually. The Marys Lake plant will have a single generator of 8,100 kilowatt capacity, capable of producing an estimated average of 43,800,000 kilowatt-hours of firm energy and 10,000,000 kilowatt-hours of non-firm energy annually.

The work of the Aspen Creek Siphon, Prospect Mountain Conduit and Marys Lake Reservoir Dikes must be completed in about 24 months after the contractor receives the notice to proceed. The power plants and appurtenant construction must be completed in about 30 months after the contractor receives notice to proceed.

GROOVER AND I
PRICES AND PISTOLS

President Truman devoted a recent meeting of his Economic Advisory Council to worrying over high prices going higher.

☆ ☆ ☆

Foods which have shown the strongest price tendency are the same foods for which the Government spends taxpayers' money in subsidizing the prices in order to keep those prices up!

☆ ☆ ☆

We work so damned hard complicating the simple things.

☆ ☆ ☆

Frank Sinatra, of whom you may have heard, has the habit of offering to punch newswriters in the nose "when they say things about him".

☆ ☆ ☆

After Frankie's last escapade the police canceled his permit to carry a concealed weapon.

☆ ☆ ☆

I don't know anything to say about Sinatra which would make any difference one way or the other, unless it be that his permit to "tote a pistol" indicates his own estimate of himself as a crooner.

☆ ☆ ☆

Democratic footnote: One of the **Thinking Clubs** of the **Democratic Party** has come up with a suggested slogan for the 1948 campaign: **"The Truman Way is the Human Way".**

☆ ☆ ☆

If its corn they want, why not settle for: "TRUMANATARIANS".

Less Than 1% of Nation's Pig Iron Output Allocated to Soil Pipe—Gov't Spokesmen

WASHINGTON.—Less than 1 per cent of the country's pig iron output is now being allocated by the government.

Robert E. Johnson, deputy housing expediter in charge of the office of production, made that statement today in reply to criticism from some quarters that the housing program is disturbing other parts of the nation's economy.

Since March 31, producers of cast iron soil pipe and fittings are the only ones receiving pig iron on allocations, or certifications. The amount certified for April is 36,300 tons of pig iron of foundry and malleable grades. Total April production of all grades of pig iron (foundry and malleable plus the basic grades used in steel-making) was estimated — before the coal stoppage—at 4½ to 5 million tons, including 400,000 to 450,000 tons of foundry and malleable grades.

Johnson pointed out that the 36,300 tons of pig iron certified for cast iron soil pipe producers in April represents a sharp drop from the March certifications, which exceeded 150,000 tons. The March certifications, however, included pig iron for producers of pressure pipe, radiation, heating and plumbing equipment and other housing items which are no longer included in the certification system.

"Much of the difficulty is due to the increased amount of pig iron used by the steel industry," Johnson said. "The steel mills of this country normally use 85 to 90 per cent of the country's pig iron production, with the foundry industry using the balance.

"**Because of the high prices for steel scrap in today's market, the steel mills have naturally preferred to use the lower-cost pig iron made in their own blast furnaces. And a one per cent increase in the use of pig iron by the steel mills can mean a cutback of 8 to 10 per cent in the availability of foundry iron if there is no over - all increase in pig iron production.**

Encourage Output

"The effect of the steel industry's current 'take' is best shown by a comparison with 1929, the pre-war year most comparable current conditions because of a maximum output of such items as automobiles, homes, and consumer goods. In 1929, 15 per cent of all pig iron produced was in foundry and malleable grades. In January 1947, only 10 per cent of all pig iron production was in these same grades. In an economy which needs both iron castings and steel products, the unbalance that can be caused by a cutback of one-third of foundry and malleable grades is apparent."

He stated that the office of the housing expediter, working with war assets administration and the civilian production administration, has effected the opening of blast furnaces at Everett, Mass., Indiana Harbor, Ind., and Gadsden, Ala. These furnaces have added roughly 50,000 gross tons per month to the supply of foundry iron since last fall.

"In addition," he declared "the premium payment plan, offering incentive payments for extra output of foundry iron, has caused other furnaces to maintain or increase foundry iron output."

Proportion Small

"These actions indicate the desire of this agency to reduce the impact of the needs of the housing program on the general economy," Johnson said.

One criticism of the government's certification system has been that producers of building materials receiving assistance are today consuming 35 to 40 per cent of the foundry iron, whereas before the war they consumed only 15 per cent. CPA has reported that before the war those producers of building materials took 32 per cent of foundry iron output, and in the fourth quarter of 1946—when pig iron allocations were at their peak—they received less than 35 per cent, even though the need was more acute than before the war because of the housing shortag.

(Continued on Page 7)

Extension of Highway Aid Fund Favored by House Public Works

WASHINGTON.—The American Road Builders' Association has joined the optimism of other interested groups in looking forward to passage by congress of the federal aid extension bill (H. R. 1874).

This measure, which would assure use of unexpended funds for postwar road construction beyond June 30, has been given unanimous approval by a house public works subcommittee.

Construction Ruled Out

A spokesman on Capitol Hill said today that he doubted if the bill would undergo full committee consideration before April 22, next date on which the public works committee will go into session. With the unanimous approval of the smaller group, however, observers are quite certain that the extension measure will meet with near-unanimous favor in the whole committee and will not be seriously opposed in either house or senate after it gets on the floor.

Charles M. Upham, engineer-director of the ARBA, testified before subcommittee members, reasserting the cramped condition in which highway departments have found themselves because of steel, lumber, labor, equipment and trained personnel shortages.

All these restricting influences have, along with lack of bids and excessive high estimates, made it virtually impossible for states to take advantage of the Federal-Aid Highway Act during 1946 and 1947.

Upham pointed this out to the committeemen, telling of salary increases ranging from eight to 60 per cent. Though these salary boosts have been given in almost every state in the union, he said, they are not sufficiently high to entice trained engineers that are needed.

Reverts to Treasury

Another witness, Thomas H. MacDonald, commissioner of the Public Roads Administration, testified that only 60 per cent of the first year's federal-aid funds had been obligated. This means, he said, that 31 per cent of $500 million must be programmed by June 30, 1947, or revert (under the present law) to the U. S. Treasury. He recommended enactment of the extension legislation.

Others heard by the subcommittee included C. W. Phillips, president, American Association of State Highway Officials; R. F. Ortegren, vice-president, National Rural Letter Carriers Association, and Thomas G. Walters, director of the Rural Department, National Association of Letter Carriers.

ALUMINUM OUTPUT DECLINES BY 10 PERCENT

WASHINGTON.—February net shipments of aluminum wrought products declined to 120 million pounds, 10 per cent less than the 134 million pounds shipped in January, according to a report released Tuesday by the bureau of the census. Only production of rolled structural shapes, rod, bar and wire was not lower than the comparable figures for January.

CPA PERMITS GRANTED

SAN FRANCISCO. — The Civilian Production Administration, Gilbert H. Kneise, district directcr, 1355 Market Street, has announced the following permits granted for construction of commercial and industrial buildings in the San Francisco area.

APRIL 14, 1947

CONTRACTOR'S Office, $5500: 2125 McKinley, Fresno: owner, Fisher & Stiritz Constr. Co., 2125 McKinley, Fresno.

ELECTRIC and machine shop, $1360; Minnesota St., Port Chicago; owner, J. R. Wojciechowski, Columbia Park, Pittsburg.

COMMUNITY Hall, $15,000; 184 Castro St., Hayward; owner, Trinity Episcopal Church, premises.

COMPLETE camera shop, $500; 1409 Burlingame Avenue, Burlingame; owner, Mayer's Camera Shop, 1407 Burlingame Ave., Burlingame.

TRUCK service station, $7230; Third and 19th, San Francisco; owner, Standard Oil of Calif., 225 Bush St., San Francisco.

REARRANGE partitions in office, $16,576: 225 Bush St., San Francisco; owner, Standard Oil of Cal., 225 Bush St., San Francisco.

UTILITY bldg. for trailer camp, $2,700; Latimer at Highway, Modesto; owner, E. F. Wiens, 326 S. Highway 99, Modesto.

BAKERY, $9800: Felton; owner, F. Belardi, Felton.

FIRE HOUSE, $4500; Chowchilla; owner, City of Chowchilla.

PLUMBING warehouse, $50,000; Poinhemus and Stockton, San Jose; owner, Tay-Hoibrook, Inc., 165 8th St., San Francisco.

BANK, $59,600; Murphy and Washington, Sunnyvale; owner, Capital Co., 1 Powell St., San Francisco.

FLUORESCENT lighting in bank, $1,560; 650 Montgomery Street, San Francisco; owner, Capital Co., 1 Powell St., San Francisco.

SOUNDPROOF ceiling, fluorescent lighting, $1170; 2nd and E Streets, Hilmar; owner, Capital Co., 1 Powell St., San Francisco.

BANK, $1333; Neal and Main Sts., Pleasanton; owner, Capital Co., 1 Powell St., San Francisco.

VARIETY Store, $7000; 101 High way, Greenfield; owner, L. L. Dyer, 396 17th St., Paso Robles.

REPAIR fire damage to office bldg., $100,000; 300 Montgomery St., San Francisco; owner, Capital Co., 1 Powell St., San Francisco.

NOW You Can Get that "EXTRA" building You've Wanted!

ALL-STEEL "QUONSETS" AT LOW-COST
Versatile, rugged—
Easy to use and maintain
Yes, an economical, durable "Quonset" is the answer to your building problem. In its simplest form with an open front, it makes a fine loafing barn for livestock, or a roadside stand; equipped with sliding doors, the fire-resistant, weatherproof "Quonset" provides protection for implements and vehicles; fitted with a solid front panel, it becomes a sturdy toolroom, workshop, or warehouse. If additional space is needed, the building is easily extended by adding as many 12-foot sections as you wish.

Pig Iron Channeling
(Continued from Page One)

With the allocation or certification system limited only to producers of cast iron soil pipe since March 31, the amount of foundry and malleable pig iron affected in April is about eight per cent of the total produced, or less than one per cent of pig iron of all grades.

Is Still Critical

"Cast iron soil pipe is one of the most critically short items for home construction," the housing official explained. "It has increased sharply in output with governmental assistance in obtaining raw materials. However, it is still so short that thousands of homes are still uncompleted for lack of soil pipe, and th shortage must be eliminated to encourage additional home-building."

PLANS and Speculations

The Water Users' Association in the Anderson-Cottonwood irrigation district has named a committee to study possibilities of obtaining Shasta Dam power for distribution to members.

oOo

Woodland will need 1,087 more homes to take care of her predicted population increase by 1960, according to Ford Shaffer, chairman of the Yolo County planning commission.

oOo

The Livermore Women's Improvement Club and other civic groups are writing letters advising Washington headquarters of the office of the housing expediter that a swimming pool is urgently needed there, and that the high school district should be given priority on materials for its construction.

oOo

An assembly committee on conservation, planning and public works approved inclusion of the Sausalito lateral and the Marina approaches to the Golden Gate Bridge into the state highway system.

oOo

Ceremonies April 20th at Hayward Army Airport will feature presentation of a deed to the two million dollar port to the City of Hayward.

oOo

Creation of a new city in southern Alameda county comprising seventeen small towns was proposed at a recent meting sponsored by the Hayward Area chamber of commerce.

oOo

Construction of a Nazarene Church in Walnut Creek has been delayed because some fifty residents of the area surrounding the site protested the application for a permit to build.

oOo

Ambrose park recreation and parkway district recently received a $2500 loan. It is located near Martinez.

oOo

Members of the Tulare County Historical Society are frantically searching for architectural plans for a historical museum in Mooney Grove Park, which were drawn several years ago.

oOo

Widening and otherwise improving the Porterville - Woodville bridge across the Tule River will be discussed by a joint meeting of the chambers of commerce of the two cities.

oOo

First step in improvement of the Merced County fairgrounds will be construction of a livestock show ring with sheds and corrals. Later, a recreation area (including a baseball field, grandstand and bleachers for 1700 to 10,000) would be started.

oOo

Sacramento city planning commission has given tentative approval to a proposal to widen the H Street Subway, a project expected to cost $500,000.

oOo

Bids may be asked early in the summer for construction of a four-lane divided Golden State Highway north from Bakersfield to the Snow Road. District Engineer Earl T. Scott announced that nearly all necessary rights-of-way had been acquired.

oOo

Martinez officials are studying a $150,000 highway improvement plan to reroute trucks off Martinez city streets and open up a new residential area large enough for construction of 1000 homes.

Congress Committees Investigate Shortage Of Building Supplies

WASHINGTON. — Members of small business committees in both house and senate rolled up their sleeves this week as thy began investigations into building material shortages.

Steel Represented

The steel subcommittee of the senate's small business committee held its first hearings on steel problems affecting the interests of small business in particular on Tuesday. Chairman of the subgroup is Senator Edward Martin of Pennsylvania.

First complaint heard was that of Karl Koch Erecting Company, Bronx, N. Y. This firm claimed unfair practices by the large steel companies. These malpractices resulted, it was claimed, in the inability of independent steel erectors to participate in the construction of veterans hospitals.

Testimony was heard from Robt. M. Koch of the Bronx firm; R. S. Willey of the Washington office of Bethlehem Steel Co., and C. A. Johnson, general manager of sales for fabricated steel construction, Bethlehem Steel Co., Bethlehem, Pennsylvania.

Others scheduled to testify included Brigadier General John S. Bragson, director of military construction for the war department, and Heron Todd of the Heron Todd Construction Co., Washington, D. C., an independent erector.

Many Complaints

On Friday, the house small business committee plans to begin its investigations into why small contractors cannot get sufficient steel, pipe, lumber and other scarce building materials to complete home building programs. Representative Walter C. Ploeser of Missouri is chairman of this committee.

The house committee said it was holding the hearings "as soon as possible" because of "a great many complaints from small business contractors". Most of these complaints, the committee spokesman said, tell of home construction that is being held up until necessary materials are found. Naturally, much of the delays complained of are on projects being built for veteran use.

It appeared that congress was on the verge of really probing the material shortage problem after months of industry explanations that item shortages were standing in the way of home completions in communities all over the country.

Hear Contractors

First witness before the house sessions is to be Edward R. Carr, Washington, D. C., president of the National Association of Home Builders. Joseph Meyerhoff, Baltimore, former NAHB president, also is scheduled to testify.

Small contractors expected to be heard include Joseph E. Merrion, Chicago; Ralph Duke and Robert Berkeley, St. Louis, Mo.; M. M. Robinson, Detroit; V. F. Buchek, San Antonio, Texas, and Alfred Gross, Jamaica, N. Y.

DOUGLAS FIR OUTPUT REACHES NEW PEAK

PORTLAND. — March lumber production in the Douglas fir region continued at a high level, breaking all records during the past 24 months, according to H. V. Simpson, executive vice president of the West Coast Lumbermen's Association.

Weekly output averaged 137,976,000 board feet during March. This record production from West Coast sawmills exceeds February output of 132,183,000 board feet, and climaxes a steady increase each month since the relaxation of government controls last year.

TODAY'S THE DAY,

Today is the Day . . .
Hope you have not forgotten the date, as it is the 57th annual dinner of the San Francisco Builders' Exchange . . .
It will be at the Palace Hotel, at 6:30 p. m.
There are still a few tickets available.

REA Announces Loan Allocations

WASHINGTON.—Rural Electrification Administrator Claude R. Wickard has announced loan allocations totaling $6,207,000 to 23 rural electric systems in 16 states. Loans provide for line construction to extend electric service in the area of the systems named.

Montana, Cascade: Sun Rives Electric Cooperative, Inc., Fairfield, $165,000, including $46,500 for previously approved construction.

Washington 8 Benton: Benton Rural Electrification Assn., Prosser, $180,000 including $20,000 for previously approved construction.

Oregon 26 Wasco: Wasco Electric Cooperative, Inc., The Dalles, $100,000 including $22,000 for system improvements and $61,500 for previously approved construction.

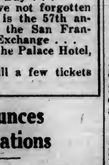
SELL SHIPS FOR SCRAP

WASHINGTON. — The maritime commission continued its contribution to alleviate the scrap metal shortage by announcing yesterday that it would offer 12 more average merchant vessels for open sale.

Bids for these dozen ships must be submitted by May 7 to be valid.



To date, the maritime agency has sold 151 over-age vessels totaling 563,786 tons.

Labor Bills Restrict Unions and Management Demand Changes in Workmen's Compensation

By PHILIP G. BRADY

SACRAMENTO.—With the exception of a few extreme measures destined to get no more than a cursory hearing, proposed labor legislation under consideration by the senate apparently aims at re-defining the rights of management and employees.

While union excesses, such as unlawful and violent picketing, are scheduled for debate, certain management practices regarding discrimination in employment and withholding of earned pay are also due to be aired.

In addition, requested changes in workmen's compensation and unemployment insurance laws flood the committee dockets and may, observers believe, result in updating both acts.

Although most bills are in the labor, social welfare and governmental efficiency committees, two stringent anti-picketing measures have strayed to the transportation committee where their author, Senator Dilworth, is vice chairman.

A Dilworth bill, S.B. 756 requires all peace officers to direct persons to move where they are obstructing free passage to a place of business. Failure to move would be punishable as a misdemeanor. The companion measure, S.B. 757, makes congregation, obstruction of passage, threats or use of force to prevent persons from engaging in lawful employment a misdemeanor.

With passage of the "hot cargo" and secondary boycott acts already behind it, the senate has scheduled early hearings on the following:

S.B. 139 provides department of industrial relations may investigate and mediate labor disputes when any bona fide party, rather than all such, requests intervention.

S.B. 606 provides that membership or non-membership in labor union shall not be a condition of employment, discharge or agreement by employer. Provides civil relief for any act or threat to abridge right to work.

S.B. 611 provides maximum work week for state employees is 40 hours and that overtime is compensable at regular pay.

S.B. 613 makes discrimination in employment on basis of injury or infirmity a misdemeanor where employee is capable of performing duties.

S.B. 615 specifies punishment for violation of law preventing withholding on any part of agreed wages.

S.B. 748 makes unlawful, and provides injunctive relief, any attempt to cause, induce or compel violation of collective bargaining agreement or to attempt to cause employer to recognize a bargaining unit which has not been designated under existing procedures.

S.B. 761 makes compelling or attempt to compel person to join a labor union unlawful and provides injunctive relief.

S.B. 1100 prohibits unofficial bargaining unit from employer recognition.

S.B. 1492 provides that attempt to cause violation of collective bargaining agreement is unlawful and provides injunctive relief.

S.B. 1493 prohibits employers from recognizing or bargaining with unofficial bargaining units.

Workmen's Compensation Bills

S.B. 179 provides for appointment of $8000 medical director to industrial accident commission with assistants compensated proportionately.

S.B. 217 increases weekly maxi-

(Continued on Page 7)

GROOVER AND I

IT'S BEGINNING TO HURT

Sometime ago the Thinking Bureau of the State Department "thunked-up" a wild pitch in the form of a short wave radio broadcast beamed to Russia, telling about America, the Beautiful.

☆ ☆ ☆

Here in the United States a family with only one radio receiver is on the thin edge of destitution. Countless things absolutely essential to our lower-bracket subsistence would be undreamed of luxuries in the Soviet.

☆ ☆ ☆

In the vastness which is Russia places will be found where a man is a Prince if he owns a pair of stout boots and six goats—and you may search many villages without ever finding a radio receiver.

☆ ☆ ☆

The State Department overlooked the little item that the majority of the Russian people they wanted to reach did not own, and perhaps in some cases, had never heard of radio. As a result, there was no Russian reaction to these broadcasts for many months—but now Russia is beginning to howl and protest.

☆ ☆ ☆

I can offer only one guess—the State Department has finally secured a sponsor for their radio program and—

☆ ☆ ☆

the singing soap commercials are just a little more than the Russians can take.

Coal Shutdowns to Bring Only Slight Drop in Steel Rate

WASHINGTON.—No sharp drop in steel ingot output is expected because of the soft coal mine shutdowns, it was said here today.

While the government-union differences over safety measures closed almost all of the country's soft coal pits for a number of days, and still threatens the supply of soft coal, steel mill operators have not expressed much concern that they would be forced to close their plants.

Scrap Price Down

Last week the steel production figure dropped down only one-half of one point to 95.5 per cent of rated capacity. The rate this week is expected to change but little.

Word reached Washington, however, that some open hearth furnaces in the Pittsburgh area were forced to close because of the shortage of some pig iron which comes from blast furnaces fed with beehive coke. These furnaces were banked last week.

Meanwhile, the price of scrap moved downward at important steel centers. In Chicago, Pittsburgh, Cleveland, New York and Philadelphia markets quotations were off.

The Iron Age scrap price composite figure of $37.33 last week moved down to $35.42, a drop of $1.91.

The trend also was reflected in Carnegie-Illinois Steel's decision to revise its alloy strip prices downward. This action eliminated an 8.2 per cent increase in the base price previously allowed by the office of price administration and extras were revised as well.

Moderate Drop

Certain pessimistic steel sources predicted that deliveries would remain tight throughout 1947. A more general opinion among the trade, however, held that some of the heavier steel products will come into better supply soon.

All agreed that many months would elapse before business witnessed a normal steel market again.

At the same time, Iron and Steel Institute predicted that steel production would "drop moderately" for the third straight week as a result of work stoppages in some soft coal mines.

96.4% In March

Steel mills will operate at an average rate of 94.8 per cent of capacity this week, the Institute said. They will turn out 1,653,700 tons of ingots. This will represent a decline of 0.6 of a point or 0.6 per cent from last week's operation of 95.1 and last week's output of 1,664,200 tons.

A month ago the country's steel mills were operating at 96.4 per cent of capacity and their production totaled 1,686,000 tons, Iron and Steel Institute said.

35— DOCKS, PIERS & HARBORS

4/17/47 35
Owner Taking Bids—Due April 28, 4 P. M.—Reconstruct Floats and Pontoons
NEWPORT BEACH, Calif., Orange County, Yacht Anchorage.
Owner—City of Newport Beach, city clerk, City Hall, Newport Beach.
Plans by Engrg. Dept. of Owner.
Reconstruction of existing floats and pontoons.
Specifications obtainable from the above office.

38— ELECTRIC LIGHTING TRANSMISSION LINES

4/17/47 38
Owner Taking Bids—Due May 23, 10 A. M.
Transmission Line
COLUMBIA BASIN PROJECT, Wash. Approx. 7 miles north of Pasco, Wash.
Owner—U. S. Bureau of Reclamation, Coulee Dam, Wash.
Plans by owner.
13.8 kilovolt transmission line from Pasco substation to Pasco pumping plant including a 13.8-kilovolt, 3-phase, single-circuit, 60-cycle, single-wood-pole transmission line approximately 13.7 miles long, including taps, to each of six pumping plants and to a communication farm well. The transmission line will be connected to the 115/13.8-kilovolt Pasco substation of the Bureau of Reclamation. The conductor for the transmission line will be either 336,400-circular mil aluminum cable, steel-reinforced; No. 4/0 Awg. copper conductor; or No. 4/0 Awg. copper equivalent copper-weld-copper conductor for 9.2 miles of the transmission line and either No. 2 Awg. aluminum cable, steel-reinforced, No. 4 Awg. copper conductor; or No. 4 Awg. copper equivalent copperweld-copper conductor for 4.3 miles of the transmission line. The 110-footlong, 115-kilovolt, 3-phase tap from the existing Bonneville Power Administration 115-kilovolt, 250,000-circular mil copper transmission line to the 115/13.8-kilovolt Pasco substation will be constructed of No. 4/0 Awg. copper conductor. Connection between the existing line and the tap to the substation will be made with 18 parallel groove clamps. The transmission line and the taps are designed for heavy loading conditions of one-half inch of ice and a wind pressure of 8 pounds per square foot at 0° F.
Specifications obtainable from the above office; no charge to prospective bidders; to others $2 not refundable.

39— SEWERS

4/17/47 • 39
Owner Taking Bids—Due May 6, 8 P. M.
Bay Farm Island Interceptor Sewer
ALAMEDA, Calif., Alameda County.
Owner—City of Alameda, J. P. Clark, city clerk, City Hall, Alameda, Calif.
City Engineer—Carl Froerer, City Hall, Alameda, Calif.
The work involves:
Pumping Station
(1) 650 cu. yds. excavation;
(2) 750 lin. ft. piling cast in place;
(3) lump sum, reinforced concrete;
(4) 250 sq. yds. waterproofing;
(5) lump sum, pipe and fittings;
(6) lump sum, pump motors and appurtenances;
(7) lump sum, miscellaneous work;
(8) lump sum, painting;
Sanitary Sewer Interceptor
(9) 1210 lin. ft. 21-in. vitrified clay pipe;
(10) 2850 lin. ft. 18-in. vitrified clay pipe;
(11) 900 lin. ft. 15-in. vitrified clay pipe;
(12) 3 lin. ft. 12-in. vitrified clay pipe;
(13) 9 lin. ft. 8-in. vitrified clay pipe;
(14) 6 lin. ft. 6-in. vitrified clay pipe;
(15) 22 each standard manholes;
(16) 5 cu. yds. street reconstruction (portland cement concrete);
(17) 30 sq. yds. street reconstruction (asphalt concrete);
(18) 150 tons street reconstruction (crushed rock and prime coat);
Sanitary Sewer Force Mains
(19) 3230 lin. ft. 8-in. cast iron pipe;
(20) 100 lin. ft. 16-in. cast iron pipe;
(21) 1120 lin. ft. 16-in. ball and joint pipe;
(22) lump sum, anchors and valve pits;
(23) 240 lin. ft. piling cast in place;
(24) 1200 lin. ft. 15-in. vitrified clay pipe;
(25) 5 each standard manholes;
(26) lump sum, Krusl pump station connections;
(27) 20 cu. yds. street reconstruction (portland cement concrete);
(28) 120 sq. yds. street reconstruction (asphalt concrete);
(29) 3 cu. yds. curb and gutter.
Specifications obtainable from the office of the city engineer upon deposit of $10, refundable.

LARGEST CONSTRUCTION DAILY IN THE WEST

SECTION TWO THURSDAY, APRIL 17, 1947 PAGE 9

Praises Shop Fabrication

WASHINGTON.—New construction materials and methods submitted to the federal housing administration for engineering tests indicate long forward strides are just ahead in residential building efficiency and economy, Raymond M. Foley, national housing administration and FHA commissioner, said today.

The much discussed mass production methods of home fabricators, FHA officials point out, are not yet universal practice in the building industry. Yet, they say, shop fabrication of essential parts of homes such as panels, walls, roofs and partitions is speeding up the volume of building in all sections of the country.

The federal housing administration, in cooperation with other government agencies such as the bureau of standards, Department of Agriculture, and the forest products laboratory, has been testing materials for their acceptability in houses offered as security for FHA insured mortgages for the past 12 years. During this period more than 700 types of construction have been submitted to the FHA for rulings of acceptability.

While many have failed to meet the requirements imposed by FHA, scores are now in general use throughout the building industry, including wood and wood products, concrete, and steel.

"The notion that all prefabricated homes are built in factories, shipped to sites, and put down ready for use is misleading", Curt C. Mack, Assistant Commissioner, Underwriting, FHA, said. "There is, in fact, relatively little of this today in the building industry. On the other hand, there is a great deal of shop - fabricated material going into the so-called conventional house, and this is resulting in a greater degree of efficiency in the industry while effecting economies in the total cost of construction.

Building Progressing

"More than a dozen years ago the federal housing administration began testing new materials and new construction techniques to determine their eligibility for use in the building of homes offered as security for FHA - insured mortgages. Basically, of course, FHA was interested in seeing that such materials and practices were sufficiently sound to warrant general use. Coincident with the proving operation, however, there has developed over the years a process through which important economies have been made. In the several hundred types submitted to the FHA, dozens of new methods have been introduced which today result in important savings to the home buyer.

"It is frequently said of the building industry that no important advances in production methods have been made in the last 25 years and the builders today are employing the same methods used several generations ago. This is not true. There has been a constant increase in the use of shop-fabricated units in the so-called conventional type of construction. Last year, approximately 40,000 homes involving shop - fabricating systems were produced. In the coming year the total will be considerably larger.

Assembly Line Technique

"The most successful of these operations are those in which the builder produces the wall panels or sections in a factory or a shop on the development site and assembles them on the lot. In some cases, poured concrete houses for example, the structure is completed in a few days. In one case in Florida a builder completes a partially fabricated dwelling in eight hours which fully meets FHA's minimum construction requirements.

"Mass production of housing parts in factories is currently hastening efficient, speedy, and economical construction of tomorrow's low-cost houses."

Pre-Cut Hayward Homes Popularity Grows in Bay Area

Twenty-two Hayward Homes have been erected in the Bay Area. They are samples of the pre-cut type home—one of many variations under the general heading of prefabrication.

These two-bedroom homes are sold only to contractors. This tested and proved innovation comes complete down to nails required for construction. Wiring and plumbing are not included.

Erection of the pre-cut home can be accomplished within ten days after delivery. It takes a crew of four men but five days to erect the house and have it ready for the initial inspection.

This type of building meets the specifications of many building codes in the Bay Area, and is approved for FHA mortgage insurance. Distributor Walter H. Edwards, 1102 East 12th Street, Oakland, describes the Hayward Home as a "strong factor in the competitive market."

Building Materials Shipments by Truck Gaining Popularity

WASHINGTON.—With the nation's railroad boxcar shortage as acute as any time since the end of the war, shippers are turning to the use of truck trailers in increasing numbers.

This applies to the manufacturers of building products as well as hundreds of other producers who are faced with the problem of finding additional means of moving their production.

Highway freight carriers are being used to overcome worst delays in short hauls. Building materials often are destined for short haul shipment, from plant to distributor or distributor to yard and to job. Because of this the materials trade is taking increasing advantage of the fact that single semi-trailer rigs assigned to short hauls can do the work of five boxcars.

In many ways the truck transportation is more adaptable to speedier shipping. It has greater flexibility than freight car hauling and quicker turn-around time.

Many shippers who operate their own fleets of vehicles use two or three trailers per tractor. This enables them to spot one trailer for loading and one for unloading while the power unit is pulling the third.

Julius L. Glick, president of the Truck-Trailer Manufacturers Association, said in Washington today that the truck-trailer inventory picture is better than the general automotive inventory situation. Anyone desiring to obtain a trailer from today's stocks on hand probably could get immediate delivery, he said.

"Our industry inventory is not yet back to prewar volume," he added, "but we are rapidly approaching that level and many manufacturers have been building some trailers for inventory since as long ago as last October."

66% OF APPRENTICES ENTER BUILDING FIELD

SACRAMENTO. — During the month of March, 1191 new apprentices were registered with the division of apprenticeship standards, it was announced today by Paul Scharrenberg, state director of industrial relations and administrator of apprenticeship. Of these, 1083 were World War II veterans, many of whom will receive benefits under the G. I. Bill in addition to their regular apprentice wages.

Emphasis in the apprentice training program has been placed on the building trades, because of the veterans' housing program, with the result that 66 per cent of the new apprentices indentured in March are in the construction industry.

Prefab Dwellings Is Subject of Noted Architect Writers

Two well-known architects and a professional writer are the authors of "The Prefabricated House," a book designed to clear up some of the confusion surrounding the development of "packaged" houses. The book, which will be published by Doubleday & Co. on March 20, is aimed at prospective home owners, and explains the advantages and limitations of prefabricated houses compared with speculative and custom-built houses. It is by Raymond K. Graff, Rudolph A. Matern, and Henry Lionel Williams.

"Prefabs," the authors warn, "are one of the most-talked-about and least-understood products of twentieth century technology. To the unitiated the word 'prefabrication' conjures up visions of houses rolling off assembly lines like so many automobiles, all neatly packaged and delivered ready for setting upon a chosen site."

Find Confused Public

Enthusiastic publicity, political storms in Washington, claims and counter-claims of builders and designers have served mainly to confuse the public, the authors feel. Pointing out that there is not even an agreed-upon definition for "prefabrication", they state, "Packaged homes may consist of anything from precut individual pieces of lumber to a house complete with plumbing and electrical wiring, ready to be placed on a foundation and connected to the utilities."

Graff, Matern and Williams note that the prefabricated house represents an ideal that has not been, and may never be, wholly achieved. Nevertheless, great strides have been made in recent years, and in this type of home construction "lie the germs of a revolution in house building methods that is long overdue," they say.

After discussing the meaning of prefabrication for the layman, and pointing out the differences between a prefab and a speculative or custom-built house, the authors set forth in detail the necessary information for prospective house owners who are thinking of investing in this type of housing. They point out the steps that should be considered in selecting the prefab and a suitable site, and outline the procedure for financing the purchase. The book is illustrated throughout.

Raymond K. Graff and Rudolph A. Matern are both New York architects. They co-operated in developing the John D. Pierce prefabricated house which the Glenn Martin Aircraft Co. built in large numbers during the war. As partners, they later designed their own patented prefab, several hundred of which were erected at Newport News for the government.

FHA INSURANCE ON RENTALS CLIMBING

WASHINGTON. — Applications for FHA mortgage insurance on new privately built housing units, especially those for rent, continued rising sharply in March, Raymond M. Foley, Commissioner of the Federal Housing Administration, announced today.

During March applications were received covering 31,000 new housing units, a more than seasonal increase of 26 per cent over February. Approximately 9,500 of these applications involved 253 separate multi-family rental housing projects, the largest amount ever received by FHA in a single month. Veterans will receive occupancy preference in the projects.

DIVIDENDS INDICATE SUCCESS OF PROGRAM

WASHINGTON. — Dividends of $4,500,000 for approximately 81,000 families financing their homes under the mutual mortgage insurance program of the federal housing administration have now been declared, it was announced today by FHA Commissioner Raymond M. Foley.

The dividends, Foley explained, are made on small-home mortgages insured under Section 20' of the National Housing Act.

CONSTRUCTION UP 30%

WASHINGTON—New construction put in place in March 1947 totaled $785 million, an increase of 6.9 per cent over February, but slightly below the January volume, the construction division, Department of Commerce, announced today.

The March figure represented an increase of 30.6 per cent over Mar., 1946.

Haven Saw & Tool Company Opens Modern New Store to Serve Northern California

Just a few months ago the lot at the corner of 21st and Jay Sts., Sacramento, Calif., was an unsightly junk lot. Today there stands at that spot one of the showplaces in the west—the modern, streamlined building recently erected by the Haven Saw & Tool Company.

When Haven had their grand opening on Saturday, March 29, nearly 3500 visitors helped them celebrate 20 years of service to builders, contractors, business men and farmers in northern California.

The company was started 20 years ago by Coley E. Haven, who saw a need for a western source of supply for the leading lines of electric wood and metal working tools. A small store was opened in Oakland—but business grew so rapidly it was necessary to build a larger and better store at 950 E. 14th Street, Oakland. Later another store was acquired in San Francisco at 1072-6 Howard St.

The Haven organization is novel

Left to right, Allen Haven, Clayton Haven, Coley Haven, Claude Haven, Vic Haven and Reyn Reynolds

in the fact that the father, four sons and a son-in-law are all equal co-partners, with definite assignments and responsibilities to each. Vic Haven is at Sacramento; Claude and Allen are in San Francisco; Clayton Haven and Reyn Reynolds are in Oakland. Mr. Haven is everywhere.

Principal items handled by Haven are contractor's saws, mill supplies, electric portable drills, saws and tools, milling machines, band saws, jointers, planers, motors, grinders and other portable and power wood and metal working equipment of leading makes. Their largest market is in building and contracting.

STANDARD MACHINERY BUILDING.—Now set up in its new headquarters at 450 Bayshore Boulevard, Standard Machinery Company is equipped to offer new services including increased repair facilities, more complete parts stocks, and an expanded rental fleet. A wide selection of new equipment is available.

Standard's new phone number is ATwater 2883. In opening their own quarters Bob Hughes, Carroll Wiegod and Howard Wilson invite their friends to pay them a visit.

SALES MANAGER.—O. A. Williams has been named LeTourneau's western sales manager with headquarters at the Stockton office. Formerly eastern sales manager, he has had 20 years' experience with the Missouri state highway department and a Missouri contracting and engineering firm.

CHIEF ENGINEER. — A. M. Newman, former western service manager, has been named chief service engineer for LeTourneau's western area. He has been with the firm since 1932, and spent four years before that as operator and foreman on various construction jobs for R. G. LeTourneau.

34—DAMS, RESERVOIRS & DREDGING

(Continued from First Section)

4/16/47 24
Owner Will Take Bids—Due May 12, 10:30 A. M.—Work Under Way on 1st Unit—Cherry Creek Dam (outlet works)
ARAPAHOE COUNTY, Colo. About 6 miles SE of Denver and ½ mile upstream from existing Kenwood Dam on Cherry Creek.
Owner—U. S. Government, District Engineers Office, Col. Craig Smyser, Dist. Engr., 200 Railway Exchange Bldg., 909 17th St., Denver. Private plans.
Includes outlet works. Involves approx. 375,000 c.y. excav.; 31,000 c.y. reinf. concrete; 4,000,000 lbs. reinf. steel; 150,000 lbs. misc. metals, etc.
Work consists of slide gates and accessories; 15-ton overhead crane; oil pumping unit; control and safety valves for oil pressure system; water level transmitter, indicators and recorder; access manhole castings, etc.
Contractor (1st unit)—David G. Gordon Constr. Co., 1900 31st St., Denver, Colo., and Brown & Devanda Constr. Co., Los Angeles, Calif., (joint venture), $1,381,425.

39—SEWERS

4/16/47 39
Low and Only Bidders
Interceptor Sewer System
VANCOUVER, Wash.
Owner—City of Vancouver, Geo. Carson, City Clerk, City Hall, Vancouver, Wash.
Consulting Engineers — Stevens & Koon, Spalding Bldg., Portland, Ore.
Work, under four schedules, is listed as follows: Part A, 21,140 l. f. of 10-in. to 42-in. pipe, 72 manholes and excavation to a depth of 20 feet; B, 11,789 l. f. of 18in. to 30-in. pipe, 34 manholes and excavation to a depth of 18 feet; C, 11,110 l.f. of 21- to 27-in. pipe, 34 manholes and excavation to a depth of 22 feet; D, outfall sewer, involving 1103 l.f. of 42in. 305 l.f. of 30-in. pipe and excavation to a depth of 15 feet.
Bids submitted Apr. 9 were:
Natt McDougall, Portland, schedule A, $435,333; B, $158,004; C, $138,919; D, $59,370. Total $791,627.
Stateside Seattle: Schedule B, $157,295; schedule C, $136,040. No bid A and D; total of B and C, $295,335.
P. S. Lord, Portland: Schedule A $291,451; B, $138,350; C, $112,450; D, $25,442. Total of $567,094.

4/16/47 39
Bond Election in Amount of $135,000 Set for May 20 (Time Extended From May 6)
Sanitary and Industrial Sewers
KINGSBURG, Calif., Fresno County.
Owner — City of Kingsburg, Oscar Erickson, city superintendent, City Hall, Kingsburg, Calif.
City Engineer—A. J. Ross, City Hall, Kingsburg, Calif.
Survey on industrial sewer costs by Engineer Charles Gilman Hyde, professor emeritus of engineering, University of California, Berkeley, Calif.
Includes $85,000 for sanitary sewer system and remainder for improvement in system carrying industrial waste. If the bonds are passed, three large industries in the area will contribute $75,000 and an additional $15,000 if necessary, which, plus the city contribution of $50,000, will provide for a $140,000 industrial sewage system.

40—STREETS AND HIGHWAYS

4/16/47 40
No bids Submitted
Street Improvement Res. No.2603
SACRAMENTO Calif., Sacramento County. Arnold Tract No. 2.
Owner—City of Sacramento, H. G. Denton, city clerk, City Hall, Sacramento, Calif.
City Engineer — Fred Klaus, City Hall, Sacramento, Calif.
Improvement of streets, etc.

4/16/47 40
No bids Submitted
Street Improvement Res. No. 2638
SACRAMENTO Calif., Sacramento County. Streets adjacent to Buckman Court, Van Olsten Tract and Macneve Tract.
Owner—City of Sacramento, H. G. Denton, city clerk, City Hall, Sacramento, Calif.
City Engineer — Fred Klaus, City Hall, Sacramento, Calif.

4/16/47 40
Hearing of Protests Set for April 21, 7:30 P. M.
Street Improvement; Res. No. 578
NAPA, Calif., Napa Co. Madrona St. from Gesford St., to Hartson St.
Owner—City of Napa, Chas. E. Martin, city clerk, City Hall, Napa, Calif.
City Engineer—H. A. Harrold, City Hall, Napa, Calif.
Includes cement concrete curbs and gutters, paving street with asphalt macadam pavement 37 ft. 4 in. wide.

4/16/47 40
Liquid Asphalt
Low and Only Bidders
SACRAMENTO, Calif., Sacramento Co. —Following submitted bids Apr. 11 to State Purchasing Agent, Sacramento, Calif., under Quo. 54167, Req. 88208, for 120 tons liquid asphalt (SC-4), delivered vendor's spreading equipment on shoulders 40 miles east of Baker on U. S. Highway 91.
Richfield Oil, $2220.00; total $5.50 for spreading.
Newhall, $2112.00; $6.00.
Square Oil, $1920.00; $5.50, awarded.
Douglas Oil, $2040.00; $5.50.

4/16/47 40
Contract Awarded Cost $8,500
Rough Grading
STOCKTON, Calif., San Joaquin Co.
Part of site of Edison High School.
Owner—Stockton Unified School District, Thomas H. McCandless, purchasing agent, lobby of Administration Bldg., 324 N. San Joaquin St., Stockton, Calif.
Architect—John U. Clowdsley, Exchange Bldg., Stockton, Calif.
Contractor—Louis Biasotti & Son, W. Clay St., Stockton, Calif.

4/16/47 40
Hearing of Protests Set for May 5, 8 P. M.
Street Improvement; Res. No. 46-23
SAN MATEO, Calif., San Mateo Co.
Glenwood Heights (26th Ave. and Sequoia Ave. from Dolores Lane; Mason Lane and westerly one-half of Dolores St. from Beresford Park to 100 ft. northwesterly of 26th Ave.).
Owner—City of San Mateo, Wm. J. O'Farrell, city clerk; Arthur Sullivan, city engineer, City Hall, San Mateo, Calif.
Includes grading, paving, curbs, gutters, sidewalks, sanitary sewers, storm drains, electroliers, conduits and cables.

4/16/47 40
Contract Awarded Cost $61,882
Surfacing
SAN JOAQUIN CO., Calif. Thornton Road, located in Sections 13, 14 and 25 of Township 3 North, Range 5 East and Sections 30, 31 and 32 of Township 3 North, Range 6 East, M.D.B. and M extending from the southerly line of State Route 12 southerly to the Eight Mile Road.
Owner—County of San Joaquin, R. E. Graham, county clerk, Courthouse, Stockton, Calif.
County Surveyor—Julius B. Manthey, Highway-Agricultural Bldg., Hazelton Ave. and B St., Stockton, Calif.
Contractor—S. M. McGaw Co., Elks' Bldg., Stockton, Calif.

4/16/47 40
Hearing of Protests Set for May 5, 8 P. M.
Street Improvement; Res. 46-26
SAN MATEO, Calif., San Mateo Co.
Hobart Ave., Woodland Dr., MacArthur Ave., Barneson Ave., from westerly boundary of Aragon Terrace Subdivision to Park Blvd. and the westerly 15 feet of Park Blvd. from southerly boundary of Aragon Terrace to Hobart Ave.
Owner—City of San Mateo, Wm. J. O'Farrell, City Clerk, Arthur Sullivan, City Engineer, City Hall, San Mateo, Calif.
Includes grading, paving, curbs, gutters, sidewalks, sanitary sewers, lateral sewers, catchbasins, etc.

4/16/47 40
Contract Awarded
Grading Cost, $146,107.45
PERKINSVILLE - WILLIAMS HIGHWAY, Arizona. From a point 1.5 miles south of Williams southerly.
Owner — Arizona State Highway Commission, 17th and Jackson Sts., Phoenix, Ariz.
Plans by engineering department of owner.
Includes grading, draining and base material.
Contractor—Bowen, McLaughlin & Lynch, Box 4037, Phoenix, Ariz.

4/16/47 40
Contract Awarded
Highway Improvement Cost $383,312.55
KINGMAN-ASHFORK HIGHWAY, Arizona. From 62 miles east of Kingman along U. S. Route 66 to point 7.5 miles west of Seligman.
Owner — Arizona State Highway Commission, 17th Ave., and Jackson St., Phoenix, Ariz.
Plans by engineering department of owner.
Includes subgrading, seal coat, etc.
Contractor—Bowen, McLaughlin & Lynch, Box 221, William, Ariz.

4/16/47 40
Owner Taking Bids—Due May 2, 5 P. M.
Street improvement; Res. 2595
SACRAMENTO, Calif., Sacramento Co. Rodeo Way from J St., to L St., and K St. from Rodeo Way to 53rd Street.
Owner—City of Sacramento, H. G. Denton, City Clerk, City Hall, Sacramento, Calif.
City Engineer — Fred Klaus, City Hall, Sacramento, Calif.
Work involves:
(1) 904 cu. yds. excav. and grading;
(2) 6 cu. yds. fill grading;
(3) 930 lin. ft. curb and gutter cut No. 6, to const.;
(4) 724 lin. ft. curb and gutter No. 12, to const.;
(5) 9636 s. ft. 3½ inch conc. sidewalk to const.;
(6) 25,468 sq. ft. 5½ inch conc. pavement to const.;
(7) 6 st. monuments to place;
(8) 1 gutter drain No. 11, to const.;
(9) 854 lin. ft. 6 in. VI sewer pipe to const.;
(10) 66 lin. ft. 4 in. VI sewer pipe to const.;
(11) 6 6x6x4 in. VI sewer pipe wyes to place;
(12) 4 6x6x6 in. VI pipe tees to place;
(13) 4 6x6x4 in. VI pipe tees to place;
(14) 2 manholes to const.;
(15) 1 manhole to reconstruct;
(16) 90 sq. ft. driveway to remove;

Gibson, district engineer, 50 Higuera St., San Luis Obispo, Calif., for rental of (1) one pugmill type road mixing machine and (2) one booster tank truck, 2200-gallon capacity, and (3) two 4-cu. yd. duck trucks:
Sargeant Transportation Co., Santa Barbara, (1) $13.75 per hour; (2) $6 per hour.
Earl Thyguson, Solvang, (3) $3.70 (A) power loading; $3 hand loading; $3.35 other types loading; $3.00; (B) $3; $3.
J. D. Easter Trucking Co., Santa Maria, (3) $3.75; (A) $3.45; $3.60; $3.75; (B) $3.45; $3.60.

4/14/47 43
Vertical Gates
Contract Awarded
TUCUMCARI PROJECT, New Mexico.—Morse Bros. Machinery Co., Denver, Colo., at $8576.70, awarded contract by the U. S. Bureau of Reclamation, Customs House, Denver, Colo., under Spec. 1694 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Tucumcari, N. M., at the option of the bidder, 167 screw-lift vertical gates and gate lifts for Hudson Canal lateral unit No. 5 and Smith, Trautman and Harris laterals, Tucumcari Project, New Mexico. The gates will be installed by the government.

4/14/47 43
Outlet Pipe—Low and Only Bidders
COLORADO - Big Thompson Proj., Colo.Following submitted bids Apr. 7 to the U. S. Bureau of Reclamation, Customs House, Denver, Colo., under Spec. 1710 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Fort Collins, Colo., two 72-inch outlet pipes with expansion joints, manholes, supports, bends, flanges and flange bolts for installation in the outlet works of the Horsetooth Dam, Colorado-Big Thompson Project, Colorado. The outlet pipes will be installed by the government:
Thompson Pipe & Steel Co., Denver, Colo., $55,270; ship 180 days; 465,000 lbs.; f.o.b. Denver; terms net. No equalization offered.
Darby Corp., Kansas City, Kan., $55,944; ship 360 days; 430,000 lbs.; f.o.b. Kansas City; terms net. No equalization offered.
Western Pipe & Steel Co. of California, Los Angeles, Calif., $61,325; ship 180 days; 455,000 lbs.; f.o.b. Los Angeles; terms net. No equalization offered.
Pacific Coast Engrg. Co., fob Alameda, Calif., $56,725, 435,000 lbs.; ½% 10 days. No equalization.

4/15/47 43
Disconnecting Switches
Low Bidders
FORT PECK PROJECT, Montana.—Following submitted low bids Apr. 9 to the U. S. Bureau of Reclamation, Customs House, Denver, Colo., under Spec. 1716 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Fallen, Montana, two (2) 69,000-volt, 600-ampere, 3-pole, single-throw, manually-gang-operated, outdoor type disconnecting switches, with manually-gang operated grounding blades, for the 57-kv. Fallon and Fallon reliff pumping plants transmission line. Fort Peck Project, Montana. The apparatus will be installed by the government.
Graybar Electric Co., Inc., Denver, Westinghouse Electric Corp, E. Pittsburgh, Pa., Delta Star Electric Co., Chicago, Ill., Railway and Industrial Engineering Co., Greensburg, Pa., Southern States Equipment Corp., Hampton, Ga.; Electric Power Equipment Corp., Philadelphia, Pa.; A. B. Chance Co., San Francisco, Calif.; General Electric Co., Denver, Colo.; and Pacific Electric Mfg. Corp., San Francisco, Calif., all bid the following: $2886; f.o.b. destination; terms net. Equalization is offered. 30% price clause. The exceptions are listed below:
Graybar Elec Co., ship 90 days; 8658 lbs.—Melrose Park, Ill.
Westinghouse Elec Corp., ship 365 days; 8658 lbs.—Pittsburgh. Witness test—$730.
Delta Star Elec. Co., ship 420 days, 5932 lbs.—Chicago and 2920 lbs.—Barberton, Ohio.
Railway and Industrial Engineering Co., ship 270 days; 8885 lbs.—S. Greensburg and 2772 lbs.—Baltimore, Md., Lima, N. Y. and Barberton, Ohio.
Southern State Equipment Corp., ship 90 days; 8600 lbs.—Hampton.
Electric Power Equip. Corp., ship 90 days; 7000 lbs.—Philadelphia.
A. B. Chance Co., ship 180 days; 8600 lbs.—San Francisco. Operation test—$300.
General Electric Co., ship 140 days Approx.; 6150 lbs.—Philadelphia and 2510 lbs. Baltimore.
Pacific Electric Mfg. Corp., ship 180 days; 8658 lbs.—San Jose.

4/15/47 43
Check Valve—Contract Awarded
PROVO RIVER PROJECT, Utah.—Chapman Valve Co., Indian Orchard, Mass., at $1050 for items 2 awarded contract by U. S. Bureau of Reclamation, Denver, Colo., under Spec. 1692 for one 24-inch 12-lb. flanged check valve of non-slam tilting disk type faced and drilled for the Jordan Narrows Pumping Plant, Deer Creek Division.

4/15/47 43
Power and Control Conduit Supports
Low and Only Bidders
CENTRAL VALLEY PROJECT, California.—The following submitted bids on April 8th to the U. S. Bureau of Reclamation, Customs House, Denver, Colo., under Spec. 1715 for furnishing and delivering f.o.b. cars at Concord, Calif., power and control conduit supports and 60-kv. switch and takeoff structures for Clayton and Ygnacio pumping plants, Central Valley Project, California. The material will be installed by the government:
Independent Iron Works, Inc., Oakland, Calif., $1963; ship 15 and 75 days; 7000 lbs.; f.o.b. Oakland; terms net. No equalization offered.
Fabri Steel Co., Inc., Oakland, Calif., $1903; ship 15 and 75 days; 9000 lbs.; f.o.b. Oakland; terms net. No equalization offered.
George T. Gerhardt Co., Inc., San Francisco, Calif., $2640; ship 15 and 75 days; 7000 lbs.; f.o.b. San Francisco; terms ½ of 1% 20 days. No equalization offered.
L. Schaefer & Co., f.o.b. San Francisco, Calif., $2786, 7000 lbs.; terms ½% 10 days. No equalization.

4/15/47 43
Slide Gate and Gate Lifts
Low Bidders
TUCUMCARI PROJECT, New Mexico.—The following submitted low bids April 10 to the U. S. Bureau of Reclamation, Customs House, Denver, Colo., under Spec. 1728 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Tucumcari, N. M., at the option of the bidder, slide gates and gate lifts for the lateral system, Units 2, 3 and 4, and Conchas Canal, station 3243+17 to station 3517+70, Tucumcari Project, New Mexico. The slide gates and gate lifts will be installed by the government:
Morse Bros. Machinery Co., Denver, Colo., total bid, $9997.31; ship 120 days; 46,509 lbs.; f.o.b. Denver; terms ½ of 1% 20 days. No equalization offered.
Valley Iron Works, Yakima, Wash., total bid, $12,090; ship 120 days; 39,690; f.o.b. Yakima; terms net. No equalization offered.
Pacific Coast Engineering Co., Alameda, Calif., total bid, $9068; ship 90 days; 38,920 lbs.; f.o.b. Los Angeles; terms 2% 30 days. No equalization offered.

44— SUB-CONTRACT INFORMATION

4/14/47 44
Sub-Contracts Awarded—Foundation Work Under Way
Fenery (Sausage)
SAN FRANCISCO, Calif. Oakdale Ave.
Owner — Cariani Sausage Co., John Poletti, John and Alfred Cariani, partners, 333 Broadway, San Francisco, Calif.
Architect—Otto A. Deichmann, 1026 Market St., San Francisco, Calif.
Reinforced concrete, 2½ stories and basement.
Contractor—S. J. Amoroso Construction Co., 2100 Oakdale Ave., San Francisco, Calif.
Roofing—Regal Roofing Co., 930 Innes Ave.
Plumbing—Scott Co., 243 Minna St.
Electric Wiring—Hampton Electric & Manufacturing Co., 1234 Folsom St.
Heating—Western Plumbing & Heating Co., 445 Golden Gate Ave.
Sheet Metal—Gullfoy Cornice Works, 445 Golden Gate Ave.
Tile Work—Donlon Tile Co., 1234 Howard St.
Iron Work- E. G. Ruber & Son, 87 Rockwood Court.

Columbia Basin's Bacon Tunnel Is Driven Both Ways

COULEE DAM, WASH. — The 10,000-foot Bacon Tunnel of the Columbia Basin Irrigation Project in eastern Washington is being driven simultaneously from both the intake and outlet portals, Resident Engineer E. J. Niemen of the bureau of reclamation's Coulee City office reported today.

Crews of T. E. Connolly, Inc., which holds the contract for driving the 24 - foot - diameter bore through a wall of solid basalt south of Coulee City, have made initial cuts on the intake pilot tunnel. They will advance toward other crews who have penetrated 9,000 feet from the outlet portal.

The outlet-portal crews, operating on an around-the-clock basis, are working in solid rock, said Niemen, and timbering is required only in occasional "blow holes," or loose-rock formations encountered in the extremely tough basalt. The intake-portal men, also working three shifts, have removed several hundred cubic yards of columnar basalt near their portal to minimize the danger of slides.

Described as the largest irrigation tunnel in the Pacific Northwest, the $3 million Bacon Tunnel will have a rough diameter of about 24 feet and a finished diameter of 23 feet 3 inches. The pilot bores, being driven along the top half of the tunnel, are 12 feet high and 19 to 20 feet wide. The entire tunnel will be lined with concrete.

Niemen also said that J. A. Terteling & Sons, who are building the northerly 7.7 miles of the main canal, of which the Bacon Tunnel is one unit, have begun "Schedule 3" of their $1,548,000 contract. This covers completion of the canal between the Bacon Tunnel outlet and a valley leading to Long Lake. This section of the Main Canal has a bottom width of 120 feet and will be 217 feet from bank to bank. It will have a capacity of 13,200 cubic feet of irrigation water per second, sufficient to serve 1 million acres of land.

U. S. Chamber Acts To Reverse Trend Of Runaway Prices

WASHINGTON.— The Chamber of Commerce of the United States has thrown its weight back of the President's effort to effect a reversal in the price trend.

Responsibility Manifold

All that the chamber of commerce has said about backing this White House move can be applied to the efforts of its construction division to do something about building costs. A spokesman said over the weekend that the construction division has always felt that lower prices mean wider markets and has been working toward stabilization of real estate and construction costs.

"No group is more aware of the danger of runaway prices than is the business community," reads the chamber's comment on President Truman's stand on prices.

"It is unfair to hold business solely responsible for the sharp rise in prices that has taken place in recent months. Other groups in the economy must share the responsibility. Labor's successful efforts in obtaining wage increases have been reflected in the price structure. It is now demanding a second round of wage increases.

Can't Afford Strikes

"Where supply is overtaking demand, some prices already are beginning to fall. Stability in prices means lower prices—will be attained most effectively by keeping production at full tide. We cannot afford another round of strikes."

KUMP, HASKELL ON AIA CONVENTION PROGRAM

WASHINGTON—More than six hundred architects from all parts of the country are expected to attend the annual convention of the American Institute of Architects in Grand Rapids, Mich., April 29-May 1, it was announced.

Ernest J. Kump, San Francisco architect, and Douglas Haskell, technical editor of the Architectural Record, are members of a group of experts who will conduct a panel discussion of "Contemporary Trends in Architecture."

AGC 1947-48 Meets Announced; Spring Session At Seattle

WASHINGTON. — Times and places of future meetings of the Associated General Contractors of America have been announced by Managing Director H. E. Foreman as follows:

Spring Meeting, Governing and Advisory Boards, Seattle, Wash. May 19-21, 1947 in the Olympic Hotel.

Fall Meeting, Governing and Advisory Boards, Des Moines, Ia., Sept. 28 - Oct. 1, 1947 in the Savery Hotel.

29th Annual Convention, Dallas, Texas, Feb. 9-12, 1948 in The Baker and Adolphus Hotels.

For the meeting in Seattle, the association's chapters in Idaho, Montana, Oregon and Washington will be the hosts. A Northwest Branch Committee has been selected, of which A. L. Atherton is chairman and C. W. Erickson is co-chairman. Both are from Seattle. President of the Seattle chapter is John H. Sellen.

For the meeting in Des Moines, both of the association's Iowa chapters will be the hosts. Presidents of the Iowa chapters are T. L. Sears and R. W. Weitz.

For the convention in Dallas, the Dallas chapter will be host. A general convention committee has been appointed, headed by Hal C. Dyer, President of the chapter is D. H. Cowdin.

Bumper Flaxseed Crop Is Predicted

WASHINGTON. — Paint users who have been fighting the scarcity problem since the war—and even before V-J Day—will be glad to learn that government officials now are forecasting a domestic flaxseed crop this year exceeding the 5 million-acre goal set by the Department of Agriculture last November.

Shortage of flaxseed and the linseed oil coming from it has seriously curtailed the paint supply in spite of government agency efforts to supplement this country's supply with imports from Argentina.

Department of Commerce now says that on the basis of current surveys farmers (as of last week) intended to plant 4,900,000 acres in harvest this summer. Another farm - to - farm telephone survey conducted early in February indicated only 4,480,000 acres would be planted this year.

The U. S. Department of Agriculture is basing its more optimistic predictions on the feeling that a wide open market awaits the summer crop. This opinion, in turn is based on the six dollar a bushel U. S. No. 1 Minneapolis basis set by USDA, January 10.

Both Commerce and Agriculture are confident farmers will be encouraged by this to increase spring flax plantings.

The 3675 cent per pound price for 41,000 tons of Argentine linseed oil recently sold to the United States was based on a $6.28 flaxseed price, these officials said.

SMOKE CONTROL CODE SUBMITTED TO STATE

WASHINGTON.—There's a big long name in Washington that applies to a little known activity.

The Industrial Hygiene Engineering Advisory Committee has been organized by the Labor Department's division of labor standards and in its initial meeting drew up the government's recommendations on a proposed international labor office exhaust ventilation code.

The preliminary code draft recently decided upon will be sent to all states for use as a reference and guide in preparation or revision of their own codes.

Only $600,000 of State Highway Fund Still Not Allocated; Federal Aid to Double It

SACRAMENTO.—Unless federal aid moneys are forthcoming, California will have only $15 million for new highway construction during the fiscal year. If federal aid is made available by congress, the state will have $27 million as estimated in the budget of the California highway commission for the next fiscal year.

This positive sattement was made today by Director of Public Works C. H. Purcell, who is chairman of the highway commission. It was in reply to the most recent assertion of opponents of an increase in gasoline tax that the state will net more than $75 million from gasoline taxes during 1947 and "will have ample funds for highway building".

Purcell told a Daily Pacific Builder correspondent:

"As of today there is remaining $14,400,000 for budgeted construction projects on the state highway system. There can be no addition-

THROW OUT BIDS

Richard Wilson, office engineer, state highway commission, Friday cautioned contractors regarding the preparation of their bid bonds. He stated that bonds had been submitted for work made out on old, obsolete forms and also incorrectly signed, necessitating referral to state attorney regarding validity and involving inconvenience to award of contracts, etc.

Two low bids were rejected this week because of faulty bid bonds.

al money for construction projects over and above this amount because all money for state highway projects for this fiscal year ending next June 30 has now been paid into the state highway fund.

All Allocated

"These funds have been allocated by the California highway commission to the following budgeted construction projects, all of which will be advertised for bids and contracts awarded before July 1.":

Route 68, U. S. 101 Alt., South San Francisco, Southern Pacific overpass, $741,600;

Route 5, the approach to the S. F.-Oakland Bay Bridge, increased toll facilities, $575,000;

Route 69, the East Shore Highway in the city of Oakland, south city limits to 6th and Oak Streets, grading and structures, $1,850,000;

12th Street in the city of Sacramento, 12th St. grade separation (cooperative project, Federal, city and county funds) $470,000.

Route 25, near Nevada City grading and surfacing, $67,000;

Route 56, near Fort Bragg, superstructure on Noyo river bridge, $401,500;

Route 56, near Santa Cruz - San Mateo county line, Waddell Creek to Finney Creek, grade, surface and structures (cooperative project, Federal funds), $1,650,000;

Route 2, U. S. 101, near San Luis Obispo, grade and surface, $755,000;

Route 4, U. S. 99, through Fresno, Monterey St. separation (cooperative project, state and federal funds), $1,650,000;

Route 4, U. S. 99, north of Bakersfield, grade, pave, and structures, $1,440,000;

Routes 2 and 165 in the city of Los Angeles, intersection of Hollywood and Arroyo Seco parkways, interchange structure, $2,000,000;

Route 4, U. S. 99, Ridge Route, Whitaker Summit to Piru creek, grade, pave and structures, $1,717,000;

Route 26, U. S. 66 bet. Colton and Ontario, railroad separation structure, $511,000;

Routes 34 and 65 through the city of Jackson, grade, surface and structures, $460,000;

Route 11, Sacramento county, substructure of bridge over Three Mile Slough, $225,000;

Miscellaneous bridge construction and repair, $688,400;

Miscellaneous traffic signals and

Sub-Trades Combine In Effort to Halt Upward Price Trend

WASHINGTON. — A concerted effort among the sub-trades to force down construction prices and thus avert a market calamity in the building field is mushrooming into nation-wide proportions, it was learned here this week.

First sounding the note of caution was a statement that went out about five weeks ago to members of the National Electrical Contractors' Association. It called on manufacturers to turn the price trend downward before charges reach a point outside the realm of feasible economic operation.

Now watch for the plumbers and pipe men to follow with a similar admonition in the next few weeks.

It can be said that this amounts substantially to a buyer's strike.

For example, electrical contractors all over the country for many weeks have been sending those invoices "refused" because they either fail to list firm prices or set out delivery schedules. This practice is tough on manufacturers and dealers but the electricians feel that the pressure against the dangerous upward trend in construction costs must stop somewhere and they are determined to halt the upward trend before it gets completely out of hand.

Within some sub-trades there has been considerable strife in working out general policies regarding an overall attitude toward this problem. This has developed in instances where firm representation was found alongside the contractors. But this is being ironed out as the sub-contractors come up with their buyer resistance plans.

In view of the White House move to do something about pricing prices at this time, construction men can look for an announcement from the President soon that will affect their industry as vitally as any other.

Some spade work already has been done in the Commerce Department, it is understood. Secretary Harriman, in conferences with business representatives, has been "knocking heads together" over the soaring price curve.

In his consideration of the entire price structure, President Truman is armed with a letter from the National Electrical Contractors Association which brings to his attention the need for an immediate reversal of cost trends.

The entire distribution system is out of line, NECA says. This fact causes contractors to add on their prices due to delay contingencies. Labor is being forced to rest on the job while awaiting deliveries. Combination of homes and commercial jobs as well are held to a minimum because of these enforced delays.

All sub-trade groups would like to see firm price listings and delivery schedules return to the invoices and they appear determined to do something about it.

BLUME MOVES

Structural Engineer John A. Blume has moved his offices to the sixth floor of the Balboa Building at 593 Market St., San Francisco 5. His telephone number—Sutter 2673—remains the same.

State Buildings Aided under Proposed Bills; Millions Asked for Flood Control Projects

By PHILIP G. BRADY

SACRAMENTO.—Measures calling for millions of dollars worth of new public buildings, in addition to those already scheduled in the budget, are getting serious attention from senate committees which foresee a greater availability of labor and materials in the near future than was hoped for a few short months ago.

Impetus to such planning is given by one bill, S.B. 309, which would make available funds under the Construction and Employment Act for additional projects including county jails, courthouses, office buildings and libraries.

Revenue from horse racing would be allowed to be used for building construction by county and district agricultural associations under S.B. 939.

Philip G. Brady

Permanent facilities for the Department of Motor Vehicles at a cost of $1,276,000 is authorized by S.B. 892. Of that amount $500,000 is specifically earmarked for construction and equipment of buildings for use as substations for resident officers.

The Department of Professional and Vocational Standards would lose its present authority to construct and maintain state buildings with passage of S.B. 1282. Such buildings at is already owns would be transferred to the Department of Finance. To repay agencies, including the Contractor's State License Board whose funds were preempted for construction work, an appropriation of $717,588.18 is asked.

The construction of armories throughout the state is authorized by S.B. 165 which makes an appropriation to the Adjutant General for that purpose.

S.B. 281 appropriates $200,000 from general fund for construction of a new California Institution for Women at Tehachapi.

S.B. 422 appropriates an unspecified amount for a state office building in Stockton.

S.B. 435 appropriates $260,000 to 9th District agricultural association for a new building.

S.B. 1191 authorizes a new $100,000 state armory at Red Bluff.

S.B. 1266 authorizes a new $100,000 state armory at Willows, Glenn county.

S.B. 1427 still another $100,000 state armory at Williams, Colusa county.

*S.B. 1513 appropriates $3,000,000 for construction of an agricultural and horticultural pavilion in Alameda county.

Dams, Flood Control, Bridges

S.B. 271 creates Monterey county flood control and water conservation district.

*S.B. 273 appropriates $3,326,000 to pay cost of cooperation with United States for flood control project on Sacramento River and tributaries.

S.B. 296 appropriates $140,000

YOU GET EXTRA PROFITS from American Mutual's All American Plan
Here's a simple way to get three important extra's . . . **Complete Insurance Protection . . . Protection At Its Best . . .** and **Savings Through Lower Costs.** American Mutual's All American Plan for Contractors shows you quickly and simply how you may get these three extra's for your next contract:
Complete Protection—American Mutual writes practically every type of insurance coverage for all types of construction projects. All forms are modern, and comprehensive to give maximum protection.
Protection At Its Best—Every American Mutual policy is backed by complete service to assure maximum value to you for the insurance dollars you spend.
Savings Through Lower Cost—Since 1887, American Mutual has returned 20% or more to policyholders—more than $100,000,000 in dividends.
